Legislative Report

Performance Data

This data supplement provides the performance data associated with the Human Services Performance Management system, as described in the Human Services Performance Council report: *Human Services Performance Management System* (December 2016.)

Performance data are grouped by system outcome, as follows:

Outcome 1: Adults and children are safe and secure

- Measure: Percent of children with a maltreatment determination who do not experience a repeat maltreatment determination within six months (Table 1)
- Measure: Percent of vulnerable adults with a maltreatment determination with no subsequent determination within six months (Table 2)

Outcome 2: Children have stability in their living situation

- Measure: Percent of current child support paid (Table 3)
- Measure: Percent of children discharged from out-of-home placement to reunification who were reunified in less than 12 months (Table 4)

Outcome 3: Children have the opportunity to develop to their fullest potential

- Measure: Percent of children in family foster care that were placed in a relative home (Table 5)
- Measure: Percent of child support cases with paternity established (Table 6)

Outcome 4: People are economically secure

- Measure: Percent of expedited Supplemental Nutrition Assistance Program (SNAP) applications processed within one business day (Table 7)
- Measure: Percent of SNAP and cash assistance applications processed timely (Table 8)
- Measure: Percent of open child support cases with an order established (Table 9)
- Measure: MFIP/DWP Self-Support Index (Table 10)

Most of these data have been published in various locations, but never in a single document. Tables in this Supplement provide the most recent three years of data for all measures for all counties with the most recent year's denominator.

Minnesota gives its counties and political subdivisions broad authority to work cooperatively. Two or more Minnesota “governmental units” may create a new and distinct governmental entity whenever the existing governing boards determine that a new entity offers a better way to meet a duty or obligation. For example, Faribault and Martin Counties are reported together, and counties in the Southwest Health and Human Services (SWHHS) consortium are reported as a group. As counties joined the consortium, their numbers were included in the group. Dodge, Steele, and Waseca recently became MNPrarie.

Human Services Performance Management System – Data Supplement

In these cases, past year data where those counties were not members reports those counties separately. Where measure data precede their membership, data for these counties is provided at the bottom of the table. This varies by measure as some are calculated for calendar year, while Child Support measures are by federal fiscal year and the MFIP/DWP Annualized Self-Support Index is for April to March of each year.

Where counties have fewer than 20 people in the denominator, percentages are listed in the tables, but the actual denominator is not provided. These data should be interpreted carefully as those counties had very small numbers, which can result in widely varying percentages from year to year.

Table 1. Percent of Children with a Maltreatment Determination Who Do Not Experience a Repeat Maltreatment Determination within Six Months

County	Threshold	High Performance Standard	2013	2014	2015	2015 Denominator
