Customized living provider standards/qualifications

Licensure requirements and other state regulations for customized living services clearly distinguish these services/settings from institutional licensure or regulations.

Customized living services are provided in housing with services establishments with the service provider directly licensed as a comprehensive home care provider by the Minnesota Department of Health. Customized living services provide an individualized package of regularly scheduled health-related and supportive services provided to a person who resides in a qualified, registered housing with services establishment.

Customized living service definitions that support the setting requirements

Customized living (CL) and 24-hour CL services include component services designed to meet the person's assessed needs and goals. Individualized CL services may include supervision, home care aide tasks (e.g., assistance with activities of daily living), home health aide task (e.g., delegated nursing tasks), home management tasks, meal preparation and service, socialization, assisting enrollees with arranging meetings and appointments, assisting with money management, assisting participants with scheduling medical and social services, and arranging for or providing transportation. If socialization is provided, it must be part of the service plan, related to established goals and outcomes and not diversional or recreational in nature.

For more details about the component services, including what is covered and distinctions between each see [Customized Living Component Service Definitions, DHS-6790H \(PDF\)](https://edocs.dhs.state.mn.us/lfserver/Public/DHS-6790H-ENG) (<https://edocs.dhs.state.mn.us/lfserver/Public/DHS-6790H-ENG>).
