Tackling the OPIOID CRISIS
State Targeted Response (STR) to the Opioid Crisis grants

FEDERAL FUNDING
In the summer of 2017, Minnesota received a two-year, $10.6 Million State Targeted Response to the Opioid Crisis grant from the Substance Abuse and Mental Health Services Administration. The grant is for two years, and runs until July 1, 2019.

THE GRANTS
Across Minnesota, STR grantees are working to tackle the opioid crisis. Grants focus on:

- Expanding medication-assisted treatment, in both the number of providers and their geographic reach. Medication-assisted treatment combines behavioral therapy and medications to treat substance use disorders.
- Making it easier and faster for people to receive a substance use disorder for treatment services.
- Increasing opioid-specific peer recovery and care coordination.
- Piloting the Parent Child Assistance Program, a peer support program for pre- and post-natal mothers.
- Expanding access to naloxone — a drug that serves as an immediate life-saving antidote to opioid overdose — for opioid treatment programs and emergency medical service teams.
- Launching Fast-Tracker, a website showing real-time treatment bed availability.

At DHS, we work to integrate mental, chemical and physical health care, promote successful treatments and serve people close to their families and communities.
