

Directions for CoP:

Have staff review the Myths and Facts document. Discuss what agreement they have or discrepancy they see with the information. Emphasize that the RESEARCH is the driver for all of this, and so understanding what the research supports is the biggest thing. Some staff may agree with some of the myths, and likely some of this will cause some great discussion and respectful disagreement amongst staff, which leads back to the research as the driver of what we do and what is supported/not.
