The facility population on the day of the audit was 1103 inmates. There is a total of 271 staff that have direct contact with the inmate population.

Sexual Assault Forensic Examinations are conducted at Saint Cloud hospital, Saint Cloud, Minnesota. The facility has a SART (Sexual Assault Response Team) that consists of the Administrator, PREA Manager, Investigators, and PREA Support Persons (PSP) who respond as necessary.
PREA Support Persons are staffs who have been trained to assist the victim through all processes, including providing assistance in obtaining outside support services. The Department of Corrections has established a victim advocate program. These staff will provide advocacy service or partner with other agencies to support the inmate victims of sexual abuse.

On the first day of the onsite audit, entrance meetings were held at the facility to discuss any concerns regarding the audit process and finalize the facility tour and interview schedules. The following persons were in attendance: Warden, PREA Coordinator, PREA Compliance Manager, Associate Warden of Operations, Program Lt., Shift (Lt.), 2 Special Investigators, Captain, Corrections Program Director, Human Resources Specialist, and Associate Warden of Administration, Program Director and Watch Commander. Tours were conducted at St. Cloud. The tour included intake processing areas, all housing units, recreation areas, facility support areas, education and vocational area, health service area, food service area, prison industries, and the visiting rooms. Persons of the opposite gender rang a door bell and in sometimes announced themselves each time they entered a housing unit or dormitory.

At the entrance of each building, and sleeping areas there is a PREA bulletin board with the following signs posted (in English and Spanish); Victim support services, Audit notice postings with the PREA auditors contact information, PREA Ways for Reporting, and Zero tolerance to sexual abuse or harassment. This same information is located in all areas of the facility that inmates were present during the facility tour.

Both medical and mental health staff are available at the facility or are available as required. Correctional officers and support staff were noted interacting with inmates in all areas that inmates were located.

All inmates and correctional staff were willing to discuss and provided positive information on the facility’s compliance with PREA.

Interviews were conducted with specialized staff. The interviewed included the PREA compliance manager, warden, assistant warden for operations, one (1) clinical psychologists, investigator, two (2) staff assigned as PREA support persons, retaliation manager, nursing supervisor, volunteer coordinator, personnel director, officers in charge (OIC) for first and second shift, volunteer and medical administrator, PREA Coordinator, two (2) Lieutenants. A facility staff roster was provided by the PREA Compliance Manager and the Auditor randomly chose available staff from the roster to be interviewed.

On day two and three of the onsite audit, the Auditor reviewed ten (10) personnel staff files, fifteen (15) inmate records, fifteen (15) employee training records, fifteen (15) computerized screening instrument, 20 investigative files. One of these investigations were allegations of sexual abuse and investigation was conducted by Minnesota Department of Corrections Office of Investigations.

A total of eighteen (18) correctional staff included in these correctional staff interviews were staff from each shift, intake staff, first responders, med level supervisors, building supervisors, prison industry officers, escort officers and support team staff. A total of forty (40) inmates were interviewed. Included in this inmate population were three (3) inmates identified by mental health staff as having cognitive deficiencies, two (2) inmates that were limited English proficient, two (2) inmates who have made allegations of abuse or harassment, four (4) inmates that were identified during screening as being subject to victimization, three (3) inmates that were identified as sexual predators one (1) inmate that identified as transgender, and twenty three (23) inmate from all living units were interviewed. I did not
receive any correspondence from inmates.

Facility Characteristics

The auditor’s description of the audited facility should include details about the facility type, demographics and size of the inmate, resident or detainee population, numbers and type of staff positions, configuration and layout of the facility, numbers of housing units, description of housing units including any special housing units, a description of programs and services, including food service and recreation. The auditor should describe how these details are relevant to PREA implementation and compliance.

St. Cloud opened in 1889 and served as the oldest prison in Minnesota. St. Cloud’ average offender population is 1091. Saint Cloud serves as the Intake Facility for the Minnesota Department of Corrections and is considered a maximum, closed, medium and minimum security level facility. St. Cloud has several types of housing units within a secure area of the prison with secure doors leading to outside recreation and work areas. The front entrance of the facility houses administrative offices on two floors. Leading out from the administrative area is a central control room that provides a sally port area for persons to enter the secure area of the facility. This area is also one of several areas that monitor cameras that are located throughout the facility. Staff and visitors enter through a front entrance of the facility and are subject to mandatory metal detection, frisk of person and property, and identification verification.

The facility is designed into eight (8) living units. Unit A, B, C, D and E house two man cells on four floors, with a control area located on the first floor of each unit. B annex is a small dormitory. Each of these units have wet cell rooms and a shower and dressing area located in the center of the first floor of each building. These showers have partitions and curtains to provide privacy of inmates to shower and change clothing. The reshape unit is also a dormitory type housing unit. In each of these building and units included a PREA bulletin board with the following signs posted (in English and Spanish); Victim support services, Audit notice postings with the PREA auditors contact information, PREA Ways for Reporting, and Zero tolerance to sexual abuse or harassment.

The facility has a 75-cell segregation unit divided by management needs. Parts of the units are for protective custody including area for separation for other inmates from each other and an area for disciplinary sanctions. The unit also contains one wing that is used for mental health management including suicide watch. The area has cameras in each of the rooms. When the unit is utilized for non-suicide watch or mental health overrides the cameras are turned off. When the unit’s cameras are utilized the control room is designated as a male staff post only. The segregation unit has separate shower areas that are petitioned through the use of showers to allow inmates to shower and change clothing without being viewed by person of the other gender.

St. Cloud has a total of 271 full time staff assigned to supervise the offender population.

The facility has an intake area for inmates who arrive or leave the facility. This area has a private area for inmates to be searched in an area that provides privacy for inmate and staff. There is a showering area located in the intake area. The showers had a small gate that was open during the tour. There was no doorbell entering this area. At the time of the tour there were several inmates in the showering area that had no privacy. The facility has added a higher cover for the entrance area and
curtains in the showers. The facility also placed a door bell and updated the post order for staff working this area to ensure inmates are allowed to shower and change clothing without being seen by staff.

All areas of the facility are surveilled 24/7 by over 650 cameras. All of the shower and dressing areas have privacy curtains and barriers installed. A review of camera monitor stations indicated there where several areas viewed partial nudity of the shower or toilet areas. The facility implemented a corrective action plan and completed these improvements. The facility has a 5-year camera plan and has major enhancements to surveillance program in the last three years.

The Psychology department provides services to all offenders. Services include group counseling, individual therapy, psychological assessments and crisis interventions. The department also offers two programs for drug addiction and sex offender programing. The facility also houses level 3 mental health inmate that provide more intensive services to cognitively impaired and severely persistently mentally ill offenders.

The facility has a visitation area that includes contact visits and small non-contact area. There is a correctional stationed at the entry of the visitation areas and other correctional officers assigned to the visitation area as needed.

The facility has a dining room and food service preparation areas that are divided into cook station such as bakery, and food preparation areas. The facility has a recreation area that includes a full-size gymnasium and small recreation rooms to provide leisure activities.

The education and vocational areas include law library, general library and classrooms equipped with computers and other educational aides. The education program offers GED preparation and testing program. The vocational program includes a block mason programs.

There is a medical clinic area that is operational 24 hours a day seven days a week. There is infirmary on site. There is an officer’s station and additional correctional officers assigned as needed.

At the entrance of the building is a PREA bulletin board with the following signs posted (in English and Spanish); Victim support services, Audit notice postings with the PREA auditors contact information, PREA Ways for Reporting, and Zero tolerance to sexual abuse or harassment. This same information is located in all areas such as warehouse, maintenance shops, and safety office and other areas that inmates were present during the facility tour.

The facility is a key component in Minnesota Department of Corrections implementing PREA throughout the agency. Inmate are provided with PREA orientation and training within the first two days of arriving at the facility. The program includes pamphlets, video presentation, staff presentation, question an answer sessions with inmates and individualized instructions based on the needs of the inmates. While touring other facilities when asked about PREA orientation over fifty percent (50%) of inmates in other facilities respond that they received an orientation to PREA as soon as they got to Saint Cloud.

Medical staff conduct an intake screening on all inmates within 72 hours of an inmate arriving at Saint Cloud Correctional Center. From this screening follow up interviews are conducted by mental health staff
for inmates based on history of victimization, history of predator behavior, screening instrument findings, staff interviews and overall impressions by medical and mental health staff. The mental health staff provides this information to other mental health staff as inmates transfer to other facilities. While touring other facilities when asked about PREA screenings over fifty percent (50%) of inmates in other facilities respond that they received the initial screening the day they arrived at Saint Cloud Correctional Center. Mental Health staff at other facilities interviewed share that Saint Cloud Correctional Center will contact them when mental health inmates or inmates interviewed due to past victimizations and or being followed by Saint Cloud are arriving at the new correctional center. This practice has provided a seamless approach to implementing many PREA mandates.

Number of Standards Exceeded: 6

Number of Standards Met: 39

Number of Standards Not Met:

Summary of Corrective Action (if any)

The facility had 61 allegations of sexual abuse or sexual harassment. One of these allegations was for sexual abuse. The remaining allegations were for sexual harassment. A review of these allegations found that the allegations were investigated by staff of the rank of Lieutenant or higher. The investigations include interviews with victims, witnesses, and predator. The investigations were timely and thorough. However, the investigations did not include a finding. The agency has a policy that provides directives on how facilities should manage inmate on inmate allegations of sexual abuse that would provide guidance on compliance with the standard. The auditor discussed with the facility of complying with agency policy and retrain investigators. Minnesota Department of Corrections PREA coordinator provided guidance for PREA compliance manager and facility wardens on Minnesota Department of Corrections 202.057 Sexual Abuse/Harassment Prevention, Reporting, and Response section “Responding to reports of sexual harassment or staff sexual misconduct.” The agency
coordinator provided support in email indicating compliance with this standard.

Below is the modifications recommended during the tour.

- B-Annex – the urinal stall area needs to have the partition wall extended 1 foot.
- North Dining Room – No PREA poster (framed poster) located in the dining room; this was removed during construction of the bubble and never replaced.
- Intake Shakedown Area – the swing doors leading in to the shakedown area need to be raised to be even with the brick wall. An additional door bells needs to be installed at both doors leading to the intake area.
- Intake Post Orders need to be updated to note that the staff will ensure that the doors to the shakedown room are closed.
- Mason Shop – the partition in the offender restroom needs to be extended between the toilets and the urinal. Auditor noted that the partition should be 1 block by 6 blocks high.

All of these areas were accomplished during the corrective action period.

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor’s analysis and reasoning, and the auditor’s conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.
The agency ensures each facility’s staffing plan takes into consideration the number and placement of supervisory staff in calculating adequate staffing levels and determining the need for video monitoring. Minnesota Department of Corrections Policy: 301.055 Security Rounds mandates compliance with standard. All facilities have developed a staffing plan that provides for adequate levels of staffing and, where applicable, video monitoring to protect inmates against sexual abuse. The facility has documented a staffing plan that provides for adequate levels of staffing and, where applicable, video monitoring to protect inmates against sexual abuse. The facility’s staffing plan takes into consideration the generally accepted correctional practices in calculating adequate staffing levels and determining the need for video monitoring. The agency provided the center with PREA incidents reported including time, place and active action reports. This information is utilized to review the facility staffing plan for the upcoming fiscal year.

The facility’s Warden provided an in depth staffing plan that included consideration of any judicial findings of inadequacy in calculating adequate staffing levels and determining the need for video monitoring and policy requires that the facility’s staffing plan takes into consideration any findings of inadequacy from Federal investigative agencies in calculating adequate staffing levels and determining the need for video monitoring. The facility’s staffing plan takes into consideration any findings of inadequacy from internal or external oversight bodies in calculating adequate staffing levels and determining the need for video monitoring, and that the facility’s staffing plan takes into consideration all components of the facility’s physical plant (including “blind-spots” or areas where staff or inmates may be isolated) in calculating adequate staffing levels and determining the need for video monitoring. The Policy provides that the facility’s staffing plan takes into consideration the composition of the inmate population in calculating adequate staffing levels and determining the need for video monitoring.

The facility’s staffing plan takes into consideration the programs occurring on a particular shift in calculating adequate staffing levels and determining the need for video monitoring and the following: any applicable State or local laws, regulations, or standards in calculating adequate staffing levels; prevalence of substantiated and unsubstantiated incidents of sexual abuse; staffing levels and, any other relevant factors in calculating adequate staffing levels. The facility provided a staffing analysis for 2019 which included all areas of the aforementioned Policy requirements. There have been no findings of inadequacy relevant to this standard.

Minnesota Department of Corrections Policy 300.200 Officer of the Day requires the facility Warden assigned upper management on a rotating basis the collateral duties as Officer of the day. Staff assigned to this task are responsible to making frequent rounds and to ensure that the facility meets the mandatory staffing pattern as determined by the annual staffing analysis. The facility conducts a quarterly camera and staffing compliance and staffing plan and camera needs. All essential posts are filled each shift and no essential posts are kept open for salary savings. When programs are offered, staffing is increased to provide additional supervision. The review of the facility’s PREA rounds logs confirmed intermediate-level or higher-level supervisors, including shift supervisors, (and department heads at a minimum) conduct and document such visits throughout the facility also at night and on the weekends. When programs are offered, staffing is increased to provide additional supervision.

Minnesota Department of Corrections Policy 301.055 Security Rounds requires that facility
heads and facility assistants conduct unannounced rounds on each shift. It also prohibits staff from alerting other staff members that these rounds are occurring unless such announcement is related to the legitimate operational function of the facility. A review of the log books, interviews with staff and supervisor provided documentation that the shift supervisor, assistant director and facility acting superintendent make unannounced rounds in the living units on a routine basis including nights and weekends. Center provided a daily narrative log which includes PREA daily unannounced rounds of all living units. Compliance was determined by review of monthly and quarterly staff meetings, review of policy, review of daily logbooks and PREA logs for Warden, Captain and OIC and interviews with OIC on day and night shift and correctional staff.

Auditor Overall Compliance Determination

☐ Exceeds Standard (Substantially exceeds requirement of standards)
Meets **Standard** (*Substantial compliance; complies in all material ways with the standard for the relevant review period*)

☐  **Does Not Meet Standard** (*Requires Corrective Action*)

**Instructions for Overall Compliance Determination Narrative**

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor’s analysis and reasoning, and the auditor’s conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

Minnesota Department of Corrections Policy: 301.010 Searches provides governance of searches at the facility. The policy establishes procedures that requires all pat searches be conducted by staff of the same gender accept in exigent circumstances and then with the approval of the OIC. Males will pat search only males and female staff may pat search males with prior approval with the OIC. Gender specific staff will conduct all strip searches with the exception of exigent and documented exigent circumstances and with the approval of the OIC. There have been no strip searches conducted by non-gender specific staff at MCF St. Cloud during the last several years. The facility does not house female inmates.

A tour of the facility included the facility shower and toilet areas. The facility has shower partition off from view of staff. The partition allows for staff to observe the head and feet levels of each inmate while block view of the mid-section. During the audit tour three restroom areas did not provide privacy. The facility resolved the problem during the audit. (See corrective action plan)

All staff members are trained on gender specific guidelines. This training includes that all inmates are allowed to shower, perform bodily functions, and change clothing without staff of the opposite gender viewing their buttocks or genitalia, except in exigent circumstances or when such viewing is incidental to routine cell checks. Minnesota Department of Corrections Policy: 301.055 Security Rounds addresses requirement that staff of the opposite gender announce their presence when entering an inmate housing unit. There are posters located in the day room, officers’ stations and other areas throughout the facility that state staff must announce their presence in entering an area of the facility that houses the gender different from the staff member and also a notice that female staff are routinely assigned to work in offender living and work areas.

Part of the Training for initial and then yearly training also confirmed that staff are trained on the mandate that all staff of the opposite gender must announce their presence when entering a housing unit. Minnesota Department of Corrections has issued a statement that is located in all the officers’ stations and on bulletin boards that includes all areas of requirements for cross gender viewing and searches by facilities. Prior to taking over, the oncoming shift announce a female is working the building and then female staff ring a door bell when entering a housing units and also announces their presence again when they enter the living area.

Verification of the requirements was documented in the training logs, during interviews with staff and
inmates and during tours throughout the facility. Minnesota Department of Corrections Policy 301.010 Searches mandates staff will receive training and will comply with policy and that staff do not search or physically examine a transgender or intersex inmate for the sole purpose of determining the inmate’s genital status. Interviews with inmates confirmed that they had been pat-searched by officers properly and professionally. Staff training records and staff interviews verified that they had received training which includes who may be searched and the professional manner to complete searches. Interviews with staff/inmates, personal observations and an examination of policy and supporting documentation confirm compliance with this standard. One transgender inmate interviewed indicated she was allowed to shower alone and had no complaints on any pat down searches.

Staff also may read information to inmates when necessary. Translation services are available through a contracted language service for inmates who are not English proficient for any language.

Communication services are available for inmates who use sign language. The facility does not rely on inmate interpreters, inmate readers or other types of inmate assistants in the performance of first responder duties or during the investigation of an inmate’s allegations. Interviews with first responders, medical, mental health and investigative staff confirmed their awareness of the prohibition of using inmate interpreters for PREA compliance functions. Three inmates with cognitive limitations and two inmates that were limited English proficient one inmate that was hard of hearing were interviewed. The inmate indicated the facility had sign language services available upon their request. The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. The agency provided a number of documents that validate policy for all areas of this standard. These include New Hiring Prohibitions, Promotion Prohibitions, New Employee Hiring Policy, Hiring Process Manual, and External Web Employee. Minnesota Department of Corrections Policy: 103.014 Background Checks for Applicants and Current Employees and Policy: 300.045 Contractor Relationship to Department codifies the requirements for this standard. Each of these documents require Pre-employment background checks, a minimum of background checks within five (5) years of initial employment and background checks for all promotions prior to being offered a promotion.

Minnesota Department of Corrections central personnel office completes all background checks. Ten (10) local personnel files were examined by the Auditor to ensure compliance with all aspects of this standard. All backgrounds had been conducted. All employees who have contact with inmates have had a full field background. Two employees that have been promoted in last twelve months also had documented background checks completed prior to being approved for promotion.

Contractors and volunteers who have regular contact with inmates also have criminal background checks completed prior to having contact with inmates. Volunteer and contractor background checks are repeated yearly. A review of the visitors file provided update background checks. The facility does not hire or promote anyone who may have contact with inmates and does not enlist the services of any contractor who may have contact with inmates who has engaged in any type of sexual abuse or sexual harassment (no exceptions). Employees have a duty to disclose such misconduct and material omissions regarding such misconduct may be grounds for termination.

Submission of false information by any applicant is grounds for not hiring the applicant. The Human Resource Manager was interviewed and confirmed that the agency attempts to contact prior employers for information on substantiated allegations of sexual abuse or resignations which occurred during a pending investigation of sexual abuse. The Human Resource Manager also confirmed the agency provides information on substantiated allegations of sexual abuse or sexual harassment involving a former employee, upon receiving a request from an institutional employer for whom such employee has applied to work. Policy provides that the facility notifies appropriate licensing/certifying agencies when professional staff members are terminated for substantiated allegations of sexual abuse or sexual harassment. A review of personnel and volunteer files and relevant supporting documentation, including interview with personnel manager and volunteer coordinator confirm compliance with this standard.

Auditor Overall Compliance Determination

☐ Exceeds Standard (Substantially exceeds requirement of standards)

☒ Meets Standard (Substantial compliance; complies in all material ways with the standard)
Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor’s analysis and reasoning, and the auditor’s conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

MDC Policy 107.007 Criminal Investigation states that the Office of Special Investigations (OSI) investigates allegations of felony level criminal activity by offenders and assists law enforcement agencies with conducting criminal investigations involving employees, volunteers, contractors, and visitors within the department. Completed investigations are forwarded to the appropriate assistant or deputy commissioner for referral to the appropriate county attorney’s office for criminal prosecution. Any investigative data revealing criminal activity outside of the department is referred to the appropriate law enforcement agency. This was confirmed in an interview with the assigned facility investigator. Criminal Investigation policy mandates that persons conducting investigations must be aware of PREA standards and follow appropriate Sex Abuse investigations protocol.

Policy 500.100 Offender co pay for health services clearly states that no co-payment is required for health services provided subsequent to allegations of sexual assault, abuse, or harassment. No forensic exams were conducted during the prior 12 months.

MCF-St. Cloud has documented evidence of an attempt to engage the services of a community service provider. In lieu of securing a service provider the Agency has established a division to provide victim services including counseling, supporting including accompanying victims through hospital forensic services and consulting with community agencies for additional supporting services. A trained and educational appropriate staff manages this division to provide victim assistance and advocacy for victims of sexual assault. The division has extensive experience and training in victim advocacy. Her contact information is posted in all housing units. Interview with Division Director and with Saint Cloud Hospital confirmed that the hospital’s SANE staff have community volunteers to agree to escort victims going through a victim’s forensic examination. Most of the offenders interviewed confirmed they knew how to contact the victim advocate or were aware of information on the bulletin board and in the handbook, while several others showed no interest in that resource.

Minnesota Department of Corrections Policy 202.057 Sexual Abuse/Harassment Prevention, Reporting, and Response Inmate Sexual Abuse and Sexual Harassment establishes the requirements for first responders, investigators and medical staff to secure the crime scene including the areas of the offense, the victim, and alleged abuser for the preservation of usable evidence. The Policy mandates that persons responsible for investigating allegations of sexual abuse follow a uniform evidence protocol that maximizes the potential for obtaining usable physical evidence for administrative proceedings and criminal prosecution.

Investigators are trained and follow appropriate curriculum for a uniform evidence protocol that maximizes the potential for obtaining usable physical evidence for administrative proceedings and criminal prosecution. Minnesota Department Correction investigations utilizes Department of Justice
“National Protocol for Sexual Assault Medical Forensic Examination, Adults / Adolescents for all investigations.

The facility has developed and trained staff on a Coordinated Response Plan. The facility also has trained all PREA Support Person roles and responsibilities to assist in coordinated responses of sexual abuse. The facility uses the services at Saint Cloud Hospital that maintains a Sexual Assault Nurse Examiner on call at all times. ☐ Does Not Meet Standard (*Requires Corrective Action*)

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor’s analysis and reasoning, and the auditor’s conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

The Minnesota Department of Corrections Policy 202.057 states that offenders, staff, contractors, volunteers, and others deemed necessary by administration must receive training on sexual abuse/harassment/staff sexual misconduct prevention, detection, and the DOC’s response plan. New employee’s policy 103.420 Pre-Service and Orientation Training requires new staff to receive forty (40) hours of training. This training curriculum includes all elements of PREA training noted above. Related education is provided annually during refresher training. The review of lesson plans, training logs and PREA power point presentations confirmed that the provided training also addresses all elements.
identified in the standard.

Employees have PREA information noted on posters available to them and located throughout the facility. They are provided a PREA Brochure developed by the PREA office and all carry a PREA reference card. Staff annual training files were reviewed and contained documentation supporting compliance with this standard. All staff interviewed indicated they received the required PREA training initially and annually.

The agency maintains a Learning Management System for employees, and it maintains all staff records. In order to show completion of the training, staff must first receive the training and pass a test. Staff members are required to use their personal information to enter the course and indicate they have received and meet the minimum test requirements. The extensive training provided and staff knowledge of PREA requirements confirmed that the facility is compliant with this standard. All staff members interviewed were aware of all aspects of the training and each interviewed indicated they had received training in the previous year. Compliance was confirmed by reviewing policies, fifteen (15) training records and interviews with facility staff.

The facility has a person assigned to provide the management of volunteers. Volunteers are managed in accordance with agency policy 300.040 Volunteer Services Program. Part of this policy and new volunteer program orientation includes training on PREA. All volunteers participate in yearly PREA training and document this information on their Volunteer files.

The medical administrator and contracting officer for medical services coordinate for all medical contractor staff. Policy 300.045 Contractor Relationship to Department requires contracting staff must attend facility orientation and training for ten-day at the training academy at central office, prior to working independently in any assignment involving direct and on-going contact with offenders/residents.

A medical staff was interviewed. Each received PREA training and undergoes a yearly background check prior to being allowed into the facility or supervises inmates. One volunteer was interviewed. He had received Volunteer training and could explain zero tolerance and reporting duties.

A review of the PREA training rosters signed by contract staff, a review of the volunteer and training files confirmed all information required to document training. All background checks are maintained in the administrative offices and were reviewed and found up to date. All volunteer or contract staff receives copies of a PREA updates. These updates were noted in the file and were verified through an interview with volunteer coordinator.

Auditor Overall Compliance Determination

☒ Exceeds Standard *(Substantially exceeds requirement of standards)*

☐ Meets Standard *(Substantial compliance; complies in all material ways with the standard for the relevant review period)*

☐ Does Not Meet Standard *(Requires Corrective Action)*

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

Policy 202.050 Offender/Resident Orientation require that newly committed offenders receive orientation regarding sexual abuse/harassment and reporting. Prior to being assigned to this facility each inmate goes through a diagnostic program or processing center. Offenders receive written and verbal information in a language easily understood by the offender, regarding:

a) The DOC zero-tolerance policy on sexual abuse/harassment;
b) How to avoid sexual contact in prison;
c) The risks and potential consequences of engaging in any type of sexual activity while incarcerated, which may include criminal sanctions and/or offender discipline;
d) How to identify and report an incident of sexual abuse/harassment or staff sexual misconduct;
e) What defines a false accusation and the consequences for making a false accusation; and
f) How to obtain counseling services and/or medical assistance if victimized.

During in-processing procedures at St. Cloud, a staff member conducts an education program regarding the PREA, and each inmate is provided a pamphlet describing the agency's PREA compliance program. The information identifies the key elements of the program and informs them of the zero-tolerance policy regarding sexual abuse and sexual harassment and multiple ways to report sexual abuse or sexual harassment. The information also informs the inmates they will be free from retaliation for reporting an incident and that both male and female staff members routinely work in and monitor the housing units. The information is available in English and Spanish languages.

Telephonic translation services are available to inmates who are not proficient in English. Sign Language staff are available for deaf offenders. Staff are available for other offenders who are otherwise unable to
communicate (blind, mentally impaired etc.).

Inmate interviews confirmed that they received PREA information and they were aware of numerous reporting methods to include anonymous and third-party reporting, the zero-tolerance policy and their right to be free from retaliation. The tour of the Facility confirmed that several PREA education posters were prominently displayed in all housing units, the visiting rooms and common/program areas. Each time an Inmate receives training it is documented in his computerized institutional record, which includes an Education Program Search Screen. Two inmates that were not English Proficient were interviewed and verified they received the training in their preferred language. Interviews with staff and inmates; visual observations of posters/notices; examination of policy and other documentation; review of institutional files; and observation of intake procedures confirmed the facility is in compliance with this standard. Saint Cloud serves as the reception center for the Department of Corrections. Each new intake offenders goes through a through training program on PREA within the first two days of arrival at the facility. The facility provided inmate orientation during the first several hours at the facility and then in a formal education program during the first 30 days at the facility. Inmate interviewed also said they are provided additional training during case manager meetings and almost daily by staff. Mental Health staff and case managers confirmed there is an emphasis on PREA compliance. Compliance was further determined by review of the training curriculum, interviews with offenders, staff who provide the training, sign language staff, and interpretive services staff. Further compliance was determined by observing staff providing the training program for new intakes during each of the day’s onsite audit was being conducted.

Auditor Overall Compliance Determination

☐ Exceeds Standard (Substantially exceeds requirement of standards)

☒ Meets Standard (Substantial compliance; complies in all material ways with the standard for the relevant review period)

☐ Does Not Meet Standard (Requires Corrective Action)

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor’s analysis and reasoning, and the auditor’s conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

All new arrivals are seen by a nurse within first two to four hours of arriving at the center and an initial interview can led to referral; all inmates are given a screening instruments; and case mangers conduct further screening within 30 days of arriving at the facility. The facility screening instrument provides that the facility will reassess the intake screening within 30 days of the inmate arriving at the center. Minnesota Department of Corrections Policy 202.057 Sexual Abuse/Harassment Prevention, Reporting, and Response addresses all components of this standard for screening new and transferring inmates. Policy 202.040 Offender Intake Screening and Processing for adult offenders and Division Directive 202.041, “Juvenile Facility Admissions” for youthful offenders. This policy and directive provides all requirements mandated in Minnesota Department of Corrections Policy 202.057. Policy requires health services staff must screen offenders for potential vulnerability to sexual assault and/or tendencies to act out with sexually aggressive behavior using the MN DOC PREA screening. Staff reviews daily Corrections Operational Management System (COMS) for PREA follows up 30-day reviews and behavior or additional information that would mandate further follow up. The facility associate warden of operations (AWO) and facility sexual abuse response team (SART) use the Screening Tool follow-up matrix as a guide to identify the appropriate follow-up response and case-by-case decision making. PREA screenings must be completed in the Corrections Operation Management System (COMS) Obligation. All
follow-up responses are documented in COMS Offenders must not be disciplined for refusing to answer, or for not disclosing complete information, when screened by health services staff completing the MN DOC PREA Screening.

Policy 203.010 Case Management Process require case managers to review screening within first 30 days of arrival at facility. All diagnostic records are confidential and only available on a need to know basis. A review of the screening instrument contains all requirements identified in the standard. The system is password protected for need to know staff. When transferred to another facility, the inmate receives a screening review by the medical staff within the first 72 hours of the inmate’s arrival, but this activity ordinarily occurs within a few hours on the first day of arrival to the facility. This system is computerized on the statewide Minnesota DOC Prison Obligation Dashboard which automatically sends a message to the respective specialized staff whenever a positive response is given. This notification provides a time-frame for the specialized staff to take action, and changes to a red icon, if the response is not timely made, allowing management to immediately take action to ensure the offender receives proper and appropriate services. The review of screening documents by the Auditor confirmed that inmates identified as high risk for sexual victimization or at risk of sexually abusing other inmates were referred to a mental health professional and all received further assessment (10) intake files were examined by the Auditor). Staff also reviews records or other information and information from other facilities.

The inmate tracking system contains all information in computerized inmate files. Information received during the screening process is confidential and only available to staff with a need to know and never to other inmates. Staff and inmate interviews, a review of policy/documentation (including screening documents and inmate tracking system) and observations of the intake process confirmed compliance with this standard. In interviews with the facility management team it was clear that all administrators are aware of the need to review and update screening instruments and utilize this screening instrument in managing the offender population.

Staff and inmate interviews, a review of policy/documentation (including screening documents and inmate tracking system) and observations of the intake process confirmed compliance with this standard. Three inmates who claimed history of sexual abuse (prior to incarceration) were interviewed and confirmed they were seen by psychologist within first two days of arrival and were offered follow up counseling if desired.

**Auditor Overall Compliance Determination**

- ☒ Exceeds Standard *(Substantially exceeds requirement of standards)*

- ☐ Meets Standard *(Substantial compliance; complies in all material ways with the standard for the relevant review period)*

- ☐ Does Not Meet Standard *(Requires Corrective Action)*

**Instructions for Overall Compliance Determination Narrative**

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor’s analysis and reasoning, and the auditor’s conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

Minnesota Department of Corrections Policy 202.057 Sexual Abuse/Harassment Prevention, Reporting, and Response, and 202.040 Offender Intake Screening and Processing requires risk screening information is used to determine housing, bed, work, education, and program assignments, with the goal of keeping separate those inmates at high risk of being sexually victimized from those at high risk of being sexually abusive. Determinations for these assignments are made on a case-by-case basis. Staff members assigned to conduct intake screening have been provided additional training and resource
materials. Policy 202.045 addresses the evaluation and placement of transgender and intersex offenders. In deciding whether to assign a transgender or intersex offender to a facility for male or female offenders, and in making other housing and programming assignments, the agency considers on a case-by-case basis whether a placement would ensure the offender’s health and safety, and whether the placement would present management or security problems. The DOC does not place lesbian, bisexual, transgender, and gender variant, or intersex offenders in dedicated facilities, units, or wings solely based on such identification or status. The DOC evaluates and places offenders who claim to be undergoing transgender or transsexual-related treatment, offenders who appear to be gender-variant, or offenders having other clinical conditions in which the gender assignment is unclear in a similar manner.

The agency has developed and implemented a transgender committee (TC) – comprised of the health services director, department medical director, intake/security representative, director of behavioral health, health services administrator from intake facility, department director of nursing, warden of the facility where the offender is currently housed, and any other department employee deemed necessary to make a decision. The offender’s own views regarding his or her own safety are considered in placements and job assignments. Policy mandates placement and programming assignments for each transgender or intersex inmate are reassessed at least once every six months.

The facility shower areas are modified to establish privacy from staff of the other gender. Inmates are also allowed to dress and complete bodily functions without being in view of person of the other gender.

Overall compliance of the standard was verified through review of policies, interviews with PREA Compliance Manager, Case Managers, Warden, and psychologist, other correctional staff, inmates and tour of the facility. There was 1 transgender inmate interviewed. The inmate has been at the facility for more than six months. The inmate was interviewed about 6-month review and the psychologist shared a copy of the 6-month review.

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor’s analysis and reasoning, and the auditor’s conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

Minnesota Department of Corrections Policy 202.057 mandates inmates at high risk for sexual victimization shall not be placed in involuntary segregated housing unless an assessment of all available alternatives has been made, and a determination has been made that there is no available alternative means of separation from likely abusers. Minnesota Department of Corrections Policy 301.85 Administrative Segregation requires that the use of administrative segregation reviews of placement on administrative segregation: each facility must develop an instruction for the administrative and behavioral health review of offenders on administrative segregation status. Facility instructions must meet the following minimum standards: 1. Staff must notify mental health personnel whenever an offender is placed on administrative segregation status due to medical/mental health issues; 2. The initial administrative review must occur within 24 hours of placement; 3. An administrative review occurs every seven days for the first 60 days after the initial administrative review; 4. An administrative review occurs every 30 days after 60 days placement on administrative segregation; 5. A behavioral health review must be conducted upon completion of 30 days on administrative segregation and conducted thereafter every 90 days; and 6. Behavioral health reviews must be recorded in the offender’s behavioral health record and retained accordingly. If a facility cannot conduct such an assessment immediately, the facility may hold the inmate in involuntary segregated housing for less than 24 hours while completing the assessment.

Inmates placed in segregated housing for high risk of sexual victimization shall have access to programs, privileges, education, and work opportunities to the extent possible. If the facility restricts access to programs, privileges, education, or work opportunities, the facility shall document: the opportunities that have been limited, the duration of the limitation; and the reasons for such limitations.

The facility has not placed inmates in segregation in response to an allegation of sexual abuse or sexual harassment.

Compliance was determined by review of the agency policy, interviews with PREA compliance manager, review of investigative files and interviews with inmate housed in the segregation unit and with staff assigned to supervise the segregation unit.

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor’s analysis and reasoning, and the auditor’s conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

Minnesota Department of Corrections Policy 202.057 affords offenders multiple ways to privately report sexual abuse and sexual harassment, retaliation by other inmates or staff for making a report, and staff neglect or violation of responsibilities that may have contributed to such incidents. Policy 302.020 Mail mandates correspondence to or from those state and federal officials designated by the department mail committee. The destination or return address must clearly indicate it is to or from one of these sources in order to be treated as special mail. Special mail does not need to be logged as legal mail and is opened only in offender's presence Staff interviews reflected a similar understanding of the means allowed, including an understanding that offenders can make reports verbally, as well as in writing, and all staff indicated that their first responsibility was to protect offenders who make such reports.

Inmates are provided training on reporting during their initial PREA orientation and are provided a form documenting they are aware of ways to report. All staff interviewed clearly understood that they can privately report sexual abuse and sexual harassment of offenders without fear of agency disciplinary action.

Inmates have unimpeded access to telephones and can call the Minnesota PREA Hotline or any law enforcement agency of their choosing. They can also report to a third party, who can make the report for them.

The facility does not hold individuals for civil immigration purposes. Sexual abuse and sexual harassment can be reported in writing, anonymously, privately, and from a third party. Staff documents all allegations. Staff members are trained to immediately report and document any sexual abuse or sexual harassment allegation. There are posters and other documents on display throughout the facility that also explain reporting methods. The facility provides a posting explaining at least one way for inmates to report sexual abuse or sexual harassment to an entity that is not part of the agency.

Minnesota has attempted to develop a Memorandum of Understanding (MOU) with Victims Advocate. In order to establish a victim advocate program Minnesota Department of Corrections has employed staff to coordinate with victim advocate services and provide victim support when needed. There are phone numbers posted on all PREA posting areas and next to telephones for inmates to contact PREA Hotline and a Victim Advocate services. Minnesota provides staff with a brochure that provides multiple ways for staff to report allegations of sexual abuse or sexual harassment. Interviews with staff and inmates; observations of posters addressing reporting methods; and an examination of policies, documentation, and interviews with Victim Advocate confirm compliance with this standard.

Minnesota Department of Corrections policy 107.007 Criminal Investigations requires prior to the investigation of an alleged sexual assault, the special investigator must offer the victim the right to have a victim advocate present during any stage of the investigation. The PREA coordinator provided a memo detailing attempts to secure the services of rape crisis centers. The agency has established a victim advocacy office to provide victim services including private reporting. This information is on Posters located next to telephones and on bulletin boards throughout the facility. The advocacy office will reach out to community-based rape crisis centers or provide sexual assault advocacy services when requested. The advocacy staff or trained in conducting advocacy services and would accompany inmates during forensic testing if requested. The service provider has provided two referral forms that provide information to inmates on victim services and reporting requirements. Inmates interviewed were aware of the program and how to get in contact with advocacy programs by confidential phone calls. Compliance was confirmed by review of department personnel action establishing position including a job description and minimum qualifications of staff assigned to these duties and review of interviews with staff providing this service.

Minnesota Department of Corrections Policy 202.057 Sexual Abuse/Harassment Prevention, Reporting, and Response mandates that all staff, contractors, and volunteers are required to immediately report any information regarding sexual abuse or sexual harassment or any staff neglect, action or violation that may contribute to an incident or an act of retaliation. The reporting is ordinarily made to the OIC but could also be made privately or to a third-party.

Policy requires the information concerning the identity of the alleged inmate victim and the specific facts of the case to be shared with staff who need-to-know because of their involvement with the victim’s welfare and/or the investigation of the incident. Medical and Mental Health staff were aware of their responsibilities to report allegation of sexual abuse or sexual harassment. Interviews with staff, and volunteers confirmed they were aware of their reporting duties. The facility has a check list for staff and supervisors to utilize to be certain that all information is private when an allegation of abuse or harassment is received by an inmate. Additional compliance with all aspects of the standard was verified through document and policy review. Most inmates that were interviewed indicated they felt comfortable reporting information to the shift supervisor. The facility does not house offenders under the age of 18.

This discussion must also include corrective action recommendations where the facility does not meet the standard. Minnesota Department of Corrections Policy 202.057 clearly state that if the DOC learns that an offender is subject to a substantial risk of imminent sexual abuse, it must take immediate action to protect the offender. This understanding was strongly stated and supported by all staff who were interviewed. Most stated that the protection of offenders was their highest priority. Most of the offenders interviewed that they had a great deal of trust in the staff to keep them safe. Staff interviewed stated their duties and responsibilities if they were aware of an inmate being subject to substantial risk. Staff stated they would act immediately to protect the inmate, including separating the inmates and alerting other staff of the situation. Additionally, staff provided steps they would take if they thought an inmate had been sexually abused such as separate inmates, secure the scene, protect possible evidence, not allow inmates to destroy possible evidence and contact their supervisor and medical staff.

In the previous 12 months there were one reported incidents of an inmate being subject to substantial risk of imminent sexual abuse. On this occasion the victim and predator were moved to the segregation unit. Compliance with this standard was verified through review of Policy, and interview with staff and PREA Compliance Manager. There has been one inmate found to be at a substantial risk within the last 12 months.

Instructions for Overall Compliance Determination Narrative

*The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor’s analysis and reasoning, and the auditor’s conclusions. Minnesota Department of Corrections Policy 202.057 Sexual Abuse/Harassment Prevention, Reporting, and Response states that upon receiving an allegation that an inmate was sexually abused while confined at another facility, the Superintendent will notify the head of the facility or appropriate office of the agency or facility where the sexual abuse allegedly occurred. Policy requires such notification will occur as soon as possible and no later than 72 hours of receiving the allegation. Documentation is required of any such notification.
There has been three (3) allegations of an inmate being sexually abused while confined at another facility during the previous 12 months. The facility provided copies of memo forwarded the same day the information was provided by the offender during intake at the facility.

Compliance with this standard was verified by reviewing Policy, memos and interview with Intake staff and St. Cloud Correctional Center PREA compliance manager and Warden.

**Auditor Overall Compliance Determination**

- ☐ **Exceeds Standard** *(Substantially exceeds requirement of standards)*

- ☒ **Meets Standard** *(Substantial compliance; complies in all material ways with the standard for the relevant review period)*
The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor’s analysis and reasoning, and the auditor’s conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

The facility operates under the Minnesota Department of Corrections Policy 202.057, “Sexual Abuse/Harassment Prevention, Reporting, and Response.” The Policy outlines duties, procedures and actions for first responders to an allegation of sexual abuse. The agency has developed a checklist to be utilized by staff to document first responder’s duties. The PREA training lesson plan outlines the duties and responsibilities for first responders and medical staff in the event an inmate is sexually abused. Inmates may report acts of sexual assault abuse, or harassment to any employee, contract employee, or volunteer.

Upon learning of an allegation that an inmate was sexually abused, if the responder is a correctional officer or other staff:
1. Separate the alleged perpetrator and victim so that neither one can hear or see the other.
2. Remain with the victim to provide safety and support, and to ensure that the victim does not wash, shower, change clothes, or otherwise compromise physical evidence on his/her body prior to examination.
3. With the exception of health services staff and the watch commander, the staff receiving the report must initiate the First Responder Sexual Abuse Response Checklist.
4. Inform the watch commander/designee of the alleged sexual abuse.
5. Secure the crime scene. Take photographs as needed.
6. Complete a confidential incident report.
7. Forward the First Responder Sexual Abuse Response Checklist and confidential incident report to the watch commander.

In the past 12 months there was no allegations staff were notified within a time period that still allowed for the collection of physical evidence. Staff were aware that in the case staff or first responders and within time to implement first responder’s duties staff would preserve and protect any crime scene until appropriate steps could be taken to collect any evidence: (2) Request that the alleged victim not take any actions that could destroy physical evidence, including, as appropriate, washing, brushing teeth, changing clothes, urinating, defecating, smoking, drinking, or eating; (3) Ensure that the alleged abuser does not take any actions that could destroy physical evidence, including, as appropriate, washing, brushing teeth, changing clothes, urinating, defecating, smoking, drinking, or eating. In this case the facility investigators had the forensic examination in order to forward to local police for investigations. This one occasion have been forwarded for prosecution. The case is ongoing. Compliance was verified through review of policy, training plan, investigative files, first responder checklist and interviews with correctional and non-correctional staff (including first responder).

Auditor Overall Compliance Determination

☐ Exceeds Standard *(Substantially exceeds requirement of standards)*

☒ Meets Standard *(Substantial compliance; complies in all material ways with the standard for the relevant review period)*

Instructions for Overall Compliance Determination Narrative

This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.*

Minnesota Department of Corrections Policy 202.057 Sexual Abuse/Harassment Prevention, Reporting, and Response addresses the requirements of this standard. The policy specifically prohibits any type of retaliation to any inmate or staff member who has reported sexual abuse, sexual harassment or has cooperated with such investigations. Minnesota Department of Corrections has developed a computerized tracking system to provide documentation of staff being assigned to monitor for retaliation. The Shift Supervisor interviews all inmates involved in sexual abuse, harassment or reporting to determine their safety and provides documentation of interview. The facility has designated PREA
Support Person that monitors the conduct or treatment of inmates who have reported sexual abuse to insure any type of retaliation does not occur.

When interviewed, the Retaliation monitor stated they would document and follow up on all potential cases to ensure policy is being enforced. They will conduct periodic status checks on the frequency of incident reports, housing reassignments, program changes, any negative consequences for reporting abuse and negative performance reviews/staff job reassignments (all steps required of 115.67c). If there was a concern that there was the potential for possible retaliation, the PSP stated they would monitor the situation indefinitely. The monitoring of any type of retaliation will be done for at least 90 days or as long as needed to make sure the inmate is safe from retaliation or the inmate is transferred.

Policy outlines the protection measures available and requires the prompt remediation of any type of retaliation. Minnesota Department of Corrections has developed a designated form to be used when retaliation is being monitored. This document maintains all of the requirements established in the standard for agency protection against retaliation. A review of the PSP files and interview with the inmate and PSP confirmed substantiated compliance with this standard.

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor’s analysis and reasoning, and the auditor’s conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

Minnesota Department of Corrections Policy 202.057, “Sexual Abuse/Harassment Prevention, Reporting, and Response and Minnesota Department of Corrections 107.005 Office of Special Investigations mandates that all PREA incidents are promptly, thoroughly and objectively investigated. The Office of Special Investigations (OSI) investigates allegations of felony level criminal activity by offenders and assists law enforcement agencies with conducting criminal investigations involving employees, volunteers, contractors, and visitors within the department. When the facility conducts investigations, the agency uses investigators who have received specialized training in conducting sexual abuse investigations in a confinement setting.

The facility had 63 allegations of sexual abuse or sexual harassment. Seven (7) of these allegations were for sexual abuse. A review of these allegations found that the allegations of sexual harassment and non-criminal sexual abuse were investigated by staff of the rank of Lieutenant or higher. The investigations include interviews with victims, witnesses, and predator. The investigations were timely and thorough. However, the investigations did not include a finding. The agency has a policy that provides directives on how facilities should manage inmate on inmate allegations of sexual abuse that would provide guidance on compliance with the standard. The auditor discussed with the facility of complying with agency policy and retrain investigators. Minnesota Department of Corrections PREA coordinator
provided guidance for PREA compliance manager and facility wardens on Minnesota Department of Corrections 202.057 Sexual Abuse/Harassment Prevention, Reporting, and Response section “Responding to reports of sexual harassment or staff sexual misconduct. The agency coordinator provided support in email indicating compliance with this standard.

OSI investigators investigated three (3) sexual abuse allegations. There were two (2) that were not founded. One of the investigations were conducted and was determined to be unsubstantiated. The OSI gather and preserve direct and circumstantial evidence, including any available physical and DNA evidence and any available electronic monitoring data. Investigators interview alleged victims, suspected perpetrators, and any other possible witnesses. Investigators review prior reports and complaints of sexual abuse involving the suspected perpetrator. The agency only conducts compelled interviews after consulting with prosecutors as to whether compelled interviews may be an obstacle for subsequent criminal prosecution.

Substantiated allegations of conduct that appear to be criminal are referred for prosecution. The credibility of an alleged victim, suspect or witness is assessed on an individual basis and is not determined by the person’s status as inmate or staff. The agency does not require an inmate who alleges sexual abuse to submit to a polygraph examination or other truth assessment device as a condition for proceeding with the investigation of such an allegation.

Criminal investigations are documented in a written report that contains a thorough description of the physical, testimonial, and documentary evidence. The agency retains all written reports pertaining to the administrative or criminal investigation of alleged sexual assault or for as long as the alleged abuser is incarcerated or employed by the agency, plus five years.

The agency does ensure that the departure of an alleged abuser or victim from the employment or control of the agency does not provide a basis for terminating an investigation. When an outside entity investigates sexual abuse, the facility cooperates with outside investigators and endeavors to remain informed about the progress of the investigation. Compliance was determined by review of OSI investigative files, facility investigative files and interviews with Lieutenants.

Auditor Overall Compliance Determination

☒ Meets Standard (Substantial compliance; complies in all material ways with the standard for the relevant review period)

☐ Does Not Meet Standard (Requires Corrective Action)

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor’s analysis and reasoning, and the auditor’s conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

Minnesota Department of Corrections 202.057 Sexual Abuse/Harassment Prevention, Reporting, and Response address offender disciplinary. Minnesota Department of Corrections published an Inmate Disciplinary Procedures that address the standard for compliance with PREA disciplinary sanctions for offenders. Information on inmate disciplinary sanctions is provided as part of the orientation process upon entry into the facility. Disciplinary handbook states that No offender shall request, solicit, or engage in consensual sexual behavior or consensual sexual contact, or be in a situation that gives evidence of such action. Sexual behavior includes, but is not limited to, kissing, embracing, hand holding, touching the intimate parts of another person, and exposing one’s intimate parts to another, and inappropriate masturbation. “Intimate part” means breast, penis, anus, buttocks, scrotum, or vaginal area, whether clothed or unclothed. No offender shall have nonconsensual sexual contact with another offender. This rule prohibits sexual contact if the victim does not consent, is coerced into such act by overt or implied threatening behavior, or is unable to consent or refuse. Inmates may be disciplined for sexual contact with staff only upon a finding that the staff member did not consent to such contact. The facility does not discipline inmates who make
an allegation in good faith, even if an investigation does not establish evidence sufficient to substantiate the allegation.

Interviews with investigators, psychologist and review of policy confirmed compliance with this standard. The disciplinary Lieutenant investigates sexual harassment charges. It the investigation determines that the action was unfounded and approved by Mental Health staff the disciplinary officer may file charge for falsifying reports. Compliance was determined by interviews with disciplinary Lieutenant, PREA compliance manager and mental health staff.

☒ Exceeds Standard (Substantially exceeds requirement of standards)

☐ Meets Standard (Substantial compliance; complies in all material ways with the standard for the relevant review period)

☐ Does Not Meet Standard (Requires Corrective Action)

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor’s analysis and reasoning, and the auditor’s conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

Minnesota Department of Corrections Policy 202.057 states that if through the screening process or a subsequent disclosure, staff learns information that indicates that an offender has experienced prior sexual victimization, whether it occurred in an institutional setting or in the community, staff must ensure that the offender is offered a follow-up meeting with a mental health practitioner within 14 days of the intake screening. Once OSI is contacted, OSI meets with the victim within 72 hours and explains the investigation options.

The policy also states that any information related to prior sexual victimization or abuse that occurred in an institutional setting must be limited to medical and mental health practitioners, OSI, and other staff, as necessary, to inform treatment plans, security, and management decisions, including such examples as housing, bed, work, education, and program assignments. The evaluation and treatment of a victim of prior sexual abuse/harassment or sexual misconduct includes follow-up services, a treatment plan, and referral for continued care following transfer to/placement in another facility. Referrals may also be provided when the offender is released from custody. When appropriate, staff refers the offender to appropriate community services such as a crisis center, support groups, mental health treatment, victim advocate services, and area law enforcement.

Minnesota Department of Corrections Behavioral Health Services has developed computerized screening, rescreening and an informed consent which requires inmate signing that they are aware of informed consent, unless the offender is under the age of 18. Medical and mental health provide consent from guardians prior to treatment of youthful offender. Saint Cloud does not house inmates under the age 18.

Interviews with Mental Health and Medical administrator provided a seamless system for the treatment of
inmates with history of victimization. Both medical and mental health information is shared from the time inmates enter into the Minnesota Department of Corrections, during screening upon arrival at St. Cloud after any referral from staff or OSI. The Mental Health staff provide follow-up meeting and develop a treatment plan as needed. Minnesota Department of Corrections has implemented an information memo that includes notification of Mental Health informed consent.

Compliance was confirmed through review of Mental Health referral documents, interviews with mental health and medical staff and facility staff.

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor’s analysis and reasoning, and the auditor’s conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

Minnesota Department of Corrections policy 202.057 Sexual Abuse/Harassment Prevention, Reporting, and Response addresses this standard and requires that each facility conduct a sexual abuse incident
review at the conclusion of every criminal or administrative sexual abuse investigation, unless the allegation has been determined to be unfounded. The PREA agency office has developed and implemented an incident report tracking system. Each person responsible for a review of incidents provides a response to determine each area identified in this standard. The area in the facility where an incident allegedly occurred is assessed by the incident review team as to whether physical barriers in the area may enable abuse. Additionally, the review team assesses the adequacy of staffing levels in the area of the facility where a sexual abuse incident allegedly occurred, during different shifts. The review team also assesses whether monitoring technology should be deployed or augmented to supplement supervision by staff on each incident. A written report of the incident review team’s findings, including any recommendations for improvement is developed and submitted to the Warden and PREA coordinator.

The incident review team provided documentation of incident reviews, completed investigative information, findings of Incident Reports and documentation supporting implementations or reasons for not implementing recommendations. Compliance with this standard was determined through interviews with a review team member, a review of policy, and a review of incident review team reports template.

**All Yes/No Questions must be answered by the Auditor to Complete the Report 115.403 (f)**

The agency has published on its agency website, if it has one, or has otherwise made publicly available, all Final Audit Reports within 90 days of issuance by auditor. The review period is for prior audits completed during the past three years PRECEDING THIS AGENCY AUDIT. In the case of single facility agencies, the auditor shall ensure that the facility’s last audit report was published. The pendency of any agency appeal pursuant to 28 C.F.R. § 115.405 does not excuse noncompliance with this provision. (N/A if there have been no Final Audit Reports issued in the past three years, or in the case of single facility agencies that there has never been a Final Audit Report issued.) ☒ Yes ☐ No ☐ NA

**Auditor Overall Compliance Determination**

☐ Exceeds Standard *(Substantially exceeds requirement of standards)*

☒ Meets Standard *(Substantial compliance; complies in all material ways with the standard for the relevant review period)*

☐ Does Not Meet Standard *(Requires Corrective Action)*

**Instructions for Overall Compliance Determination Narrative**

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor’s analysis and reasoning, and the auditor’s conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

All PREA Audit Reports are maintained on the Agency’s website. This was verified through reviewing the website. The website can be reviewed through [https://mn.gov/doc/family-visitor/prea-policy](https://mn.gov/doc/family-visitor/prea-policy)
