Within her career she has held positions as a Corrections Officer, Corrections Program Therapist, Corrections Agent, Housing Coordinator, and in 2019 became the leader of the Community Stability Team. The focus of this team and the foundational elements of housing stability are synonymous – housing stability is necessary for an individual to successfully disengage with the cyclical churn of the criminal justice and corrections system. In order to support the prioritization of housing stability within the corrections system, Kate and the team focus on (1) the prevention and ending of homelessness; (2) outreach, engagement and community resource development; (3) transitions services; (4) focus individuals’ identities as parents and needs of families. Kate is a graduate of Bemidji State University where she studied criminal justice, political science, and Native American studies; and has master’s degrees in public affairs and human services leadership from the University of Minnesota Humphrey Institute.

*Description of course:* Individuals with disabling conditions face many barriers to living with stability in communities across the state; and often their lives intersect with the criminal justice system due to experiences of poverty and homelessness. This course is designed to introduce you to touchpoints for resources and services so that you may introduce these opportunities to your clients. These resources and services are integral for your professional development in understanding the needs of individuals on correctional supervision and supporting their journeys through transformational change. Engaging with these resources and services in your daily work processes will support long term professional development.
