Dear Committee Chairs:

The 1999 Legislature authorized the Department of Corrections (DOC) to collect supervision fees from offenders on probation and supervised release pursuant to M.S. §241.272 and directed the department to report annually on fees imposed and collected. According to this statute, the purpose of this fee is to help offset costs related to correctional services. The 2001 Legislature amended M.S. §241.272 at the DOC's request to allow supervision fees collected by DOC contract agents to be kept by the county and the fees collected by state agents deposited to the General Fund. This only has an impact on misdemeanor cases supervised by contract agents.

This report contains a 12-month cycle of imposing and collecting the fees and provides the following information requested in the statute: types of correctional services for which fees were charged, aggregate amount of fees imposed, and aggregate amount of fees collected.

Types of correctional services for which fees were charged

- Probation – assessed \$120 upon the offender's first visit and annually thereafter
- Supervised release and parole – assessed upon the offender's release from prison and annually thereafter
- Special supervised release which includes Intensive Supervised Release (ISR), Challenge Incarceration Program Phases II and III (CIP), and Conditional Release Program (CRP) – assessed upon the offender's release to the community and annually thereafter

Aggregate amount of fees imposed and collected

The following table illustrates the amount of supervision fees imposed and payments made during Fiscal Years 2007 and 2008. It is important to note that the fees imposed during any given year could be paid in a subsequent year as offenders are allowed up to one year to pay the fee. Therefore, a significant amount of fees imposed during one calendar year will be collected during the next calendar year.

When legislation was passed allowing collection of supervision fees, it was projected that \$720,000 would be collected each fiscal year after the first year of implementation. The initial projections assumed a 50 percent compliance rate with 12,000 adult offenders under active department supervision. This past fiscal year's fees were imposed on 15,474 offenders. The 50 percent compliance rate has been exceeded, but the original projection of 12,000 adult offenders did not take into consideration waivers or offenders not under active supervision (see Table 2).

It remains difficult to project the compliance rate and number of offenders. If the department's experiences continue, the compliance rate and overall dollars collected can be expected to increase over time.
