## Patient Assessment/Management – Medical

<table>
<thead>
<tr>
<th>Scenario #</th>
<th>Actual Time Started: __________</th>
<th>Possible Points</th>
<th>Points Awarded</th>
</tr>
</thead>
</table>

### Takes or verbalizes appropriate PPE precautions

1 point

### Scene Size-Up

- Determines the scene/situation is safe
  1 point
- Determines the mechanism of injury/nature of illness
  1 point
- Determines the number of patients
  1 point
- Requests additional EMS assistance if necessary
  1 point
- Considers stabilization of the spine
  1 point

### Primary Survey/Resuscitation

- Verbalizes the general impression of the patient
  1 point
- Determines responsiveness/level of consciousness (AVPU)
  1 point
- Determines chief complaint/apparent life-threats
  1 point
- Assesses airway and breathing
  - Assessment (1 point)
  - Assures adequate ventilation (1 point)
  - Initiates appropriate oxygen therapy (1 point)
  3 points
- Assesses circulation
  - Assesses/controls major bleeding (1 point)
  - Checks pulse (1 point)
  3 points
- Assesses skin [either skin color, temperature or condition] (1 point)

### Identifies patient priority and makes treatment/transport decision

1 point

### History Taking

- History of the present illness
  - Onset (1 point)
  - Quality (1 point)
  - Severity (1 point)
  - Provocation (1 point)
  - Radiation (1 point)
  - Time (1 point)
  8 points
- Clarifying questions of associated signs and symptoms related to OPQRST: 2 points
- Past medical history
  - Allergies (1 point)
  - Past pertinent history (1 point)
  - Events leading to present illness (1 point)
  3 points
- Medications (1 point)
  - Last oral intake (1 point)

### Secondary Assessment

- Assesses affected body part/system
  - Cardiovascular
  - Neurological
  - Integumentary
  - Reproductive
  3 points
- Pulmonary
  - Musculoskeletal
  - GI/GU
  - Psychological/Social
  3 points

### Vital Signs

- Blood pressure (1 point)
  1 point
- Pulse (1 point)
  1 point
- Respiratory rate and quality (1 point each)
  3 points

### States field impression of patient

1 point

### Interventions [verbalizes proper interventions/treatment]

1 point

### Reassessment

- Demonstrates how and when to reassess the patient to determine changes in condition
  1 point
- Provides accurate verbal report to arriving EMS unit
  1 point

### Actual Time Ended: __________

### Total Points

42 points

### Critical Criteria

- Failure to initiate or call for transport of the patient within 15 minute time limit
- Failure to take or verbalize appropriate PPE precautions
- Failure to determine scene safety before approaching patient
- Failure to voice and ultimately provide appropriate oxygen therapy
- Failure to assess/provide adequate ventilation
- Failure to find or appropriately manage problems associated with airway, breathing, hemorrhage or shock
- Failure to differentiate patient’s need for immediate transportation versus continued assessment or treatment at the scene
- Performs secondary examination before assessing and treating threats to airway, breathing and circulation
- Orders a dangerous or inappropriate intervention
- Failure to provide accurate report to arriving EMS unit
- Failure to manage the patient as a competent EMT
- Exhibits unacceptable affect with patient or other personnel
- Uses or orders a dangerous or inappropriate intervention

You must factually document your rationale for checking any of the above critical items on the reverse side of this form.
