

TENNESSEN NOTICE

State of Minnesota Automated COVID-19 Workplace Entry Health Screen

The data collected about you in the State of Minnesota Automated COVID-19 Workplace Entry Health Screen is classified as private under the Minnesota Government Data Practices Act.

We will use this data to screen individuals before they enter the workplace for potential COVID-19 related health risks to try to avoid the potential of spreading COVID-19. The data helps us to determine whether risk factors are present and whether you will be denied admission to the workplace for the protection of agency staff and/or the public.

This is not a COVID-19 test and is not a determination of whether or not an individual is infected with or has been exposed to COVID-19.

This data will be gathered to determine whether to permit you to enter the workplace. You are not legally required to provide this data. However, if you refuse to provide the data, you will not be admitted to the workplace. A refusal to provide the data may also result in employment consequences, as determined by your agency. The data collected from you may be shared with your agency's HR staff, safety administrator, and supervisors and managers, and other persons or entities authorized by law.
