Hold, Stop, or Restart a Scheduled Recurring Query

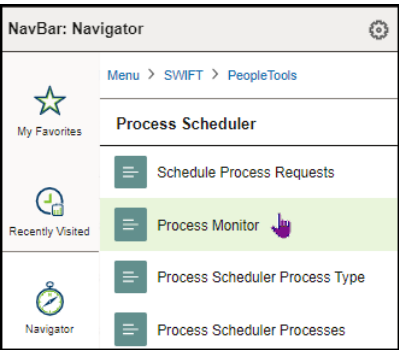

Once you have scheduled a recurring query or report, you can stop or hold (pause) them, for example, when on a much-needed vacation. You can also restart the recurring schedule.

Step 1: Navigate to the Process Monitor.

- 1. Select the **NavBar** icon. It looks like a compass and is in the upper-right hand corner of SWIFT.

Navigation Option	Navigation Path
NavBar	Navigator, SWIFT, PeopleTools, Process Scheduler, Process Monitor

- 2. Select **Process Monitor**.

Step 2. Select the Recurrence icon in the Process List section.

Select	Instance	Seq.	Run Control ID	Process Type	Process Name		User	Run Date/Time	Run Status	Distribution Status	Details	Actions
<input type="checkbox"/>	44859581		ARDJ	Application Engine	PSQUERY		01152500	02/12/2024 4:25:09PM CST	Success	Posted	Details	Actions
<input type="checkbox"/>	44859580		ARDJ	Application Engine	PSQUERY		01152500	03/01/2024 5:00:00AM CST	Queued	N/A	Details	Actions

Note: You may need to expand the length of time for which the Process Monitor shows requests.

Step 3. Choose Hold, Stop, or Restart buttons, depending on your need. Active buttons depend on the status of the request.
