Understand Document Configurators in SWIFT’s Supplier Contract Module

In order to create and process a contract document electronically through SWIFT, you will need to choose the correct “document configurator.”

Based on the document type you select, SWIFT uses document configurators or wizards to set up the correct contract document template. In some cases, you will need to respond to a series of questions to guide SWIFT in selecting the appropriate configurator.

Currently, there are Document Configurators for only these contract documents.

<table>
<thead>
<tr>
<th>Document Configurator</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ALP and Acquisitions</td>
<td>A group of different contracts for purchases and acquisitions within the Authority for Local Purchase (ALP) for a buyer or contract coordinator.</td>
</tr>
<tr>
<td>Grant Contracts</td>
<td>Contracts that are financial assistance or services furnished by the agency via a third party to an eligible recipient.</td>
</tr>
<tr>
<td>Professional/Technical Contracts</td>
<td>A group of different contracts for professional or technical services (P/T). P/T services are intellectual in character, including consultation, analysis, evaluation, predication, planning, or programming, or recommendation, and result in the production of a report or the completion of a task. P/T contracts do not include the provision of supplies or materials except by the approval of the commissioner (of Administration) or except as incidental to the provision of professional or technical services.</td>
</tr>
</tbody>
</table>

Each of these document configurators contain the contract document templates that are currently available for that document type. The Office of State Procurement or the Office of Grants Management may update these templates.

All the examples in this guide assume that an agency buyer has already created the contract shell. The buyer now wants to create and process a contract document electronically through SWIFT. The buyer also has accessed the contract shell and the Document Management page for that contract shell.

This guide provides an overview each of the document configurators.

| P/T Contract            | Generally, professional/technical services contract may be used when:  
  • An agency requires highly specialized work, for which no qualified state employee is capable or available;  
  • OR state employees do not have the time to perform the work required;  
  • OR a contract is determined to be the most efficient and least costly method of accomplishing the work.                                             |
| P/T Contract & Exhibit  | P/T Contract document that includes a list of exhibits.                                                                                                                                                           |
| P/T Master Contract     | A Master Professional/Technical Services Contract is an umbrella document that provides the general framework for using services of multiple contractors. A master contract program is not set up with just one vendor. The contract document identifies, in detail, rates, conditions and products for each kind of service defined for multiple contractors. It also very specifically identifies how to use the service, the specific document that is to be used and how it is to be filled out. |
| P/T Work Order Contract | A work order contract:  
  • Is issued from a master contract;  
  • Is THE legally binding document (when it incorporates the Master Contract in to it);  
  • Has funds encumbered against it;  
  • Gives the specific tasks to be completed; and  
  • Gives the specific information about compensation to the contractor.                                                                                       |
