Create a Grant Contract

Grant contracts provide funding to an outside entity to provide services or support to a third party who is not employed by the state. The Office of State Procurement (OSP) categorizes grant contracts as Professional/Technical contracts. Use SWIFT’s Supplier Contract module to record them.

- Grant contracts may run for multiple years.
- Use the Category Code of “84101501” for grants in all SWIFT modules, including Supplier Contract.
- Use the Contract Document Type of “GRK” for grants.
- SWIFT encumbers grant funds under a “KEO” (Contract Encumbering Order) purchase order to a specific supplier. You can add the supplier to the contract that will be used on the purchase order.

This guide reviews the basic steps to create a grant contract in SWIFT. This process is commonly called creating a “contract shell” in SWIFT. It refers to Supplier Contract record in SWIFT.

Steps to complete

- Step 1: Navigate to the Contract Entry page
- Step 2: Enter header information to the Contract Entry page
- Step 3: Enter information in the Purchase Order BU Default section
- Step 4: Enter information in the contract lines section
- Step 5: Enter information in the Details for Line page (as needed)
- Step 6: Enter information on the Add/Create Document section

Step 1: Navigate to the Contract Entry page

<table>
<thead>
<tr>
<th>Navigation Options</th>
<th>Navigation Path</th>
</tr>
</thead>
<tbody>
<tr>
<td>Navigation Collection</td>
<td>Procurement, Supplier Contract, Create Contracts and Documents, Contract Entry page defaults.</td>
</tr>
</tbody>
</table>

On the Contract Entry page, select the Add a New Value tab and press the Add button.

- SWIFT automatically populates the SetID with “SHARE”
- Leave the Contract ID with the default of “NEXT”. Do not change this field. SWIFT will assign the next available number.
- On the Contract Process Options, ALWAYS select “Purchase Order” from the drop-down menu.

NOTE: The State of Minnesota does not use the other Contract Process Options because of State Statute 16.A.15. www.revisor.leg.state.mn.us/statutes/?id=16a.15
Step 2: Add header information to the Contract Entry page

1. The header is required for all contracts. It contains information that applies to the entire contract. As needed, enter information in the following fields.

Fields on the header of the Contract Entry page. Required fields are marked with an “*”.

<table>
<thead>
<tr>
<th>Field Name</th>
<th>Field Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Status</td>
<td>This field defaults to “Open” when you first enter a new contract.</td>
</tr>
<tr>
<td>* Administrator/Buyer</td>
<td>Add the Administrator/Buyer using the drop down menu. You can search by Buyer ID or by Name. Typically, the person entering the contract shell is the Administrator/Buyer.</td>
</tr>
<tr>
<td>* Supplier ID</td>
<td>A ten-digit identification number assigned to a supplier. You can list “Placeholdr” as the Supplier ID for grant contracts. Then, you can add suppliers or recipients of the grant later.</td>
</tr>
<tr>
<td>* Begin Date</td>
<td>Defaults to the current date. Depending upon the type of contract, you can update this field.</td>
</tr>
<tr>
<td>Expire Date</td>
<td>The date when the contract will expire. This field is not required for some document types. It is beneficial to enter the Expire Date to trace expiring contracts.</td>
</tr>
<tr>
<td>Supplier Contract Ref</td>
<td>Reference to identify a supplier contract number or some other identifier by which the supplier identifies this contract. The value can be used in searching for contracts.</td>
</tr>
<tr>
<td>* Description</td>
<td>Description of the grant contract. This field is available on reports. Most agencies create a standard use of these fields (e.g., Fiscal Year, Project/Grant and Purpose of Contract).</td>
</tr>
<tr>
<td>OSP Contract Release Nbr/T-Nbr</td>
<td>The Contract Release/T-Number represents one or more contracts in related groups. It is required for contracts created from master contracts. It is not typically needed for grants.</td>
</tr>
<tr>
<td>* Maximum Amount</td>
<td>Total amount that this contract should not exceed. The total released amount of all lines and the total amount for all category lines plus the amount released for open items must not exceed this amount and must be equal to this amount.</td>
</tr>
</tbody>
</table>
2. **IMPORTANT:** If you listed “Placeholdr” as the Supplier ID, you can add suppliers or recipients of the grant later. The **Add Supplier List** link allows you to create one grant contract in SWIFT where there are multiple grant recipients. This link appears on **Contract Entry** page after selecting “GRK” **Contract Type** on the **Add a Document** page and saving the contract.

**Step 3: Enter information in the Purchase Order BU Defaults section**

1. On the right side of the header, select the **Purchase Order BU Defaults** link. SWIFT opens the **PO Defaults** page.
   - Confirm the **Business Unit** and enter the **Origin**.
   - Your agency may wish to enter other ChartField information on this section if you want to make sure that this information is carried to all purchase orders created from this contract.
2. Scroll to the bottom of the page. Press **OK** to return to the header page.
Step 4: Enter information on the contract lines section

Contract lines are required for all contracts. They contain information about the goods or services that were approved for the purchase. You will enter contract line information on these sections: Details tab and the Release Amounts tab/Release Quantities tab.

1. Enter information on the Details tab.
   - Enter the Description. It is the description of the good or service being purchased on this line. Some agencies determine break out the lines by agency division. Others use functional categories (e.g., Training).
   - Enter the UOM. The Unit of Measure is how the good or service is measured such as “Each,” “Case,” or “Job.”
   - Enter the Category Code. All grants should use “84101501.”
   - Enter other information as needed.

2. Release the contract.
   - Typically, you will select the Release Amounts Tab.
   - Enter the Fiscal Year. You can add separate lines for different fiscal years. Make sure the description is not the same for these lines.
   - Enter the Maximum Amount for each line. The total of these lines must match the Maximum Amount listed on the header.
   - You may also select the Release Quantities tab.
3. Add another line as needed.
   - If you wish to create a contract with multiple lines, press the “+” button on the right side of a line tab.
   - SWIFT displays a message about the number of rows to add. Enter a number and select **OK**.

4. SWIFT adds another line. Complete all new lines as described earlier in this guide.

**Step 5: Enter information in the Details for Line page (as needed)**

1. On the **Details** tab, select the **Details for Line** icon for each line. It brings you to the **Details for Line** page.

2. On the **Details for Line** page, expand the fields for the **Pricing Information** section. Check the **Price Can Be Changed on Order** box (if applicable). It only works at the line level. This allows the price to be changed on purchase orders created referencing this contract.

3. Press **OK** to return to the contract.

4. Complete this for all new lines as described earlier in this guide.

5. Save the contract shell.
   - After you have entered information in all lines, scroll to the bottom of the page and select **Save**.
   - SWIFT will update your record. It will display the **Contract ID**. The **Status** remains “Open”.

**Step 5: Enter information on the Create Document section**

The **Create Document** section is required for all contracts. It specifies the contract type.

*Office of State Procurement highly recommends electronic processing of contract documents and their signatures.* You can create separate contract documents electronically through SWIFT that are part
of the contract shell. These contract documents may be agency-specific, contract boilerplates, state requirements for contracts, or other documents. Depending upon the type of document you choose, the SWIFT contract configurator will walk you through the process steps to create an electronic contract that fits the transaction. You can process the entire contract document through SWIFT, including electronic signatures.

Find out about how to create and process your contract documents electronically through SWIFT in the SWIFT Reference Guides.

1. To access the Create Document page, select the Add a Document button on the contract header.

2. On the Create Document page, select the Document Type of “Grant Contracts.”

3. SWIFT opens fields for the “Grant Contracts” Document Type. Enter information in the following required fields. Your agency may require other fields to be entered.

Fields on Create Document. Required fields are marked with an asterisk (*).

<table>
<thead>
<tr>
<th>Field Name</th>
<th>Field Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Additional Approver</td>
<td>Allows you to add an additional approver using the drop down menu that lists other contract administrators.</td>
</tr>
<tr>
<td>Additional Description</td>
<td>Allows you to add an additional description. This field allows you to add descriptions that were not part of the header description since that field is limited. Check with your agency about its use.</td>
</tr>
<tr>
<td>* Administrator</td>
<td>Defaults to the Employee ID/name of the employee entering the contract. It can be updated using the drop down menu that lists other contract administrators.</td>
</tr>
<tr>
<td>Agency Reference Field 1, 2</td>
<td>Optional fields for each agency to determine how to use.</td>
</tr>
<tr>
<td>Field Name</td>
<td>Field Description</td>
</tr>
<tr>
<td>-----------------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Configure ID</td>
<td>Provides a unique identifier for the contract documents that were created using the Configure Selector (Wizard). This option is not available for Construction Contracts, Income Contracts or Real Estate Lease Contracts.</td>
</tr>
<tr>
<td>* Contract Type</td>
<td>Choose “GRK” for Grant Contract.</td>
</tr>
</tbody>
</table>
| * CPV Contract Indicator | Cooperative Purchasing Venture (CPV) allows eligible government entities (members) to use State of Minnesota contracts. There are three CPV Contract Indicators.  
  - AGY: Opens up this contract to others in your agency.  
  - CPV: Opens up this contract to all CPV members.  
  - STW: Opens up this contract for all State agencies.                                                                                                           |
| Financial Department ID | The Fin Dept ID represents an organizational function to which expenditures and other activities are identified. The Department ChartField classifies transactions according to a defined organizational structure. Combined with other ChartField values, Department IDs form the basis for department budgets that track revenues and expenditures. |
| Last Signature Date   | Used for agencies that do not use SWIFT’s electronic signatures. It allows you to set the last date for signatures. This is important because suppliers are not allowed to start work until the date the last signature is obtained.                                                                                     |
| References MPK Contract | Only on the Professional/Technical Contracts and Master Work Order Document Type. Not typically needed for grant contracts.                                                                                                                                                           |
| Renewals Authorized   | Allows you to list the number of months that renewals can be authorized.                                                                                                                                                                                                                                                                           |
| Renewals Available    | Allows you to list the number of months that renewals are available.                                                                                                                                                                                                                                                                              |
| Retention Not to Exceed Amount | Retention is holding back full payment until the contract deliverables are completely fulfilled. Retention is required for some P/T contracts.                                                                                                                                                                  |
| * Contract Manager    | Agency person responsible for signing the contract. Important for e-Signatures.                                                                                                                                                                                                                                                                     |
| Sponsor               | Project or contract sponsor. Can be a name, position, division, agency or other sponsor.                                                                                                                                                                                                                                                            |
**Field Name** | **Field Description**
--- | ---
*Sourcing Method* | The method used to request or seek a bid in order to award the contract. The Office of State Procurement (OSP) uses this field. The options are governed by State statute or State policy. Contact them if you have questions about which method to choose.
  - **Alternative Construction Methods:** Contact OSP for the policies to use this field.
  - **Cooperative Purchasing:** OSP use only.
  - **Emergency:** Contact OSP for the policies to use this field.
  - **Other:** None of the other options fit this contract.
  - **RFB (Request for Bid):** Typically for purchasing commodities.
  - **RFP (Request for Proposal):** Typically, for purchasing grants and other P/T services.
  - **Single Source:** There is only one provider of the good or service. Documentation is required.

4. Add a *Statement of Purpose*. Select the *Statement of Purpose* link.

**IMPORTANT!** This field is open to the public on the Transparency MN website, located on the footer of the Minnesota Management and Budgets’ website.
  - Write a clear, concise, and easy to understand statement of purpose of the grant contract for the general public.
  - On the *Statement of Purpose* window, enter comments and then select **OK**.
5. Press Save at the bottom of the page.

After you have entered the document, press the Return to Contract Entry link at the top of the page. SWIFT returns you to the Contract Entry page.

6. Update the Status on the Contract Entry page.

On the header, update the Status from “Open” to “Approved.” An “Approved” status allows the contract to be used for releases (e.g., purchase orders). Do not set a contract status to “Approved” until it is fully executed.

You have successfully entered a grant contract shell into SWIFT.
