Add, Edit or Delete a Bid Factor on an Event

In the Strategic Sourcing module, bid factors are questions bidders must answer about their products, services, or company. Bid factors may exist in the header and lines of an event.

The way bid factors default on an event has been changed. There are currently only 2 bid factors that will default into the event header.

- The Office of State Procurement (OSP) reviewed all header bid factors. They will likely be included in a “Responders Declaration Document”. This document will likely include the General Terms and Conditions, a sample contract, and any other necessary legal language.
- Event buyers will need to attach this “Responders Declaration Document” to the event.
- It is up to the event buyer if they want to pull in header bid factors. The existing list of bid factors is still available and any can be added to an event.

If you need a bid factor on an event that is not in the “Responders Declaration Document”, there are several ways that you can add it to an event.

- You can add or modify an existing bid factor from the drop down list of existing bid factors.
- You can create an ad hoc bid factor that exists only for that individual event. It is not available for future events.
- You can also delete any bid factors after you create them.

**IMPORTANT:** You can create or edit factors only before you post the initial version of an event. You can update the bid factor language after you post an event. Be careful if there are existing bidders for this updated event.

This guide provides steps to add or edit a bid factor on a new event. It also describes the steps to delete a bid factor on an existing event.

Steps to add or edit a bid factor on a new event

- Step 1: Access the Event Summary page
- Step 2: Populate the required sections on the Event Summary page
- Step 3: Add a bid factor on the header of the Event Summary page (as needed)
- Step 4: Create a new ad hoc bid factor on the lines (as needed)

Steps to delete an existing bid factor on an existing event

- Step 1: Access the event in the Event Workbench
- Step 2: Delete a bid factor on the header (as needed)
- Step 3: Delete a bid factor on the line (as needed)
Steps to add or edit a bid factor on a new event

Step 1: Access the Event Summary page

• Navigate to the Add a New Value page.

<table>
<thead>
<tr>
<th>Navigation Options</th>
<th>Navigation Path</th>
</tr>
</thead>
<tbody>
<tr>
<td>Navigation Collection</td>
<td>Procurement, Strategic Sourcing, Create Event, Create Events page, Add a New Value tab.</td>
</tr>
<tr>
<td>WorkCenter</td>
<td>Procurement, Strategic Sourcing, Contract/Sourcing WorkCenter. Left Menu, Sourcing, Create Events page, Add a New Value tab.</td>
</tr>
</tbody>
</table>

• On the Add a New Value page, enter the following information: Business Unit, Origin, Event ID should remain as “NEXT”, Event Format should be “Buy”, and Event Type should be “RFx”.

• Press the Add button.

SWIFT displays the Event Summary page.

Step 2: Populate the required sections on the Event Summary page

• Enter the required information in the header on the Event Summary page.
• Enter the required information on the Define Event Basics section.
• Enter the required information on the Configure Line Items section.
• Save the event.

Step 3: Add a bid factor on the header of the Event Summary page (as needed)

1. On the Define Event Basics section, select the Event Header Bid Factors link.

• SWIFT displays the Event Bid Factors page.

2. To add a bid factor from the existing list on the Event Bid Factors page, use the look up icon to find the desired bid factor.

• IMPORTANT. Update the Weighting field to 100. If you add more bid factors, the total must equal 100%. You can weigh individual bid factors at 0 if the total equals 100.
• If you want to add additional bid factors, select the Add a New Row icon for each new bid factor.
3. To add an ad hoc bid factor, select the **Add a New Row** icon (i.e., plus sign). Add the following information to the blank bid factor.

- Name the bid factor in **Bid Factor** field. The name is used internally only. SWIFT will not display it to bidders. This new ad hoc bid factor will not be available for future event. Do not put any spaces in the name.
- On the **Type** field, select appropriate option for the bid factor. This example shows an “Attachment” type, which requires the bidder to attach a document on their bid.
- On the **Question** section, add a question that describes the bid question for the bidder to respond to.
- Review the text boxes. Check the boxes that fit the event. This example shows a “Bid Factor Response Required”.

**IMPORTANT:** If you have a **Text** type, do not select the “Ideal Response Required” checkbox because SWIFT will not accept any responses that are not exactly as you type them in the box.

**Fields on the Event Bid Factors page.** Required fields are marked with an asterisk (*).

<table>
<thead>

<td>Select this checkbox to remove the bid factor.</td>
</tr>
<tr>
<td>Delete Selected Records button</td>
<td>Delete records selected for deletion.</td>
</tr>
</tbody>
</table>

4. Edit an existing bid factor.

Depending upon the bid factor, you can edit many of the fields on an existing bid factor for the event. SWIFT will not keep those changes for future events.

5. Save the changes.
   - After you have entered the required fields, go the bottom of the page and select the **Save Event Changes** button.
Then, press the **Return to Event Overview** link.

SWIFT displays the **Event Summary** page.

**Step 4: Create a new ad hoc bid factor on the lines (as needed)**

1. On the **Configure Line Items** section, select the **Line Items** link.

Step 2: **Configure Line Items**

Create line listings for this event.

*Line Items*

SWIFT displays the **Line Items** page.

2. On the **Line Items** section of the **Line Items** page, open the **Advance Definition** tab.

   ![Line Items page](image)

   - On the line you wish to add an ad hoc bid factor, select the **Bid Factors** link. SWIFT displays the **Line Bid Factors** page.
   - SWIFT defaults in the **What is the price per unit?** bid factor. Keep this default for each line.
   - Select the **Add a New Row** icon (i.e., plus sign) for each of the bid factors you wish to add on the line.

   ![Line Bid Factors](image)

   - SWIFT displays an open bid factor.
Just like the header, there are three ways to create an ad hoc bid factor on the line in an event. Follow the instruction listed in Step 5 of this guide.

(a) Create your own bid ad hoc factor
(b) Add an existing bid factor
(c) Edit an existing bid factor

- After you have entered the required fields, go the bottom of the page and select the Return to Event Lines Page link.

SWIFT returns you to the Line Items page.
- Add any new bid factors for additional lines as needed.
- Go the bottom of the page and select the Save Event Changes button.
- Then, press the Return to Event Overview link.

You have successfully added a bid factor to a new event.

Steps to delete an existing bid factor on an existing event.

NOTE: You cannot delete a bid factor after you post the event.

Step 1: Access the event in the Event Workbench
1. Navigate to the Event Workbench page.

<table>
<thead>
<tr>
<th>Navigation Options</th>
<th>Navigation Path</th>
</tr>
</thead>
<tbody>
<tr>
<td>Navigation Collection</td>
<td>Procurement, Strategic Sourcing, Maintain Events, Event Workbench page.</td>
</tr>
<tr>
<td>WorkCenter</td>
<td>Procurement, Strategic Sourcing, Contract/Sourcing WorkCenter. Left Menu, Sourcing, Event Workbench page.</td>
</tr>
</tbody>
</table>

2. On the Event Workbench page, enter search criteria and then select the Search button.
3. SWIFT opens the Search Results section. On the right side, select Edit icon (e.g., pencil) for the desired event.

SWIFT displays the Event Summary page for that event.

Step 2: Delete a bid factor on the header (as needed)
1. On the Define Event Basics section of the Event Summary page, select the Event Header Bid Factors link.

SWIFT displays the Event Bid Factors page.

2. Delete an individual bid factor on the Event Bid Factors page, as needed.

Select the (-) icon on the bid factor you want to delete. Select OK at the warning. Then, press the Save Event Changes button.
3. Delete all bid factors as needed on the **Event Bid Factors** page.

If you wish to delete all the bid factors, go to the bottom right of the page. Press the **Select All** icon (box with 3 lines) and press the **Delete Selected Records** button.

4. Save the changes you made at the header.
   - After you have entered the required fields, go the bottom of the page and select the **Save Event Changes** button.
   - Then, press the **Return to Event Overview** link.
   - SWIFT displays the **Event Summary** page. Continue to process the event.

**Step 3: Delete a bid factor on the line (as needed)**

1. On the **Configure Line Items** section of the **Event Summary** page, select the **Line Items** link. SWIFT displays the **Line Items** page.

2. On the **Line Items** section of the **Line Items** page, open the **Advance Definition** tab.

   - On the event line you wish to edit, select the **Bid Factors** link.
   - Select the (-) icon on the bid factor you want to delete. Select **OK** at the warning. Then, press the **Return to Event Lines page** link.
5. Delete all bid factors as needed.
   - If you wish to delete all the bid factors, go to the bottom right of the page.
   - Press the Select All icon (box with 3 lines) and press the Delete Selected Records button.
   - After you have made your changes to each line, go to the bottom of the page and select the Return to Event Lines Page link.

   SWIFT returns you to the Line Items page.
   - Go to the bottom of the page and select the Save Event Changes button.
   - Then, press the Return to Event Overview link.

   SWIFT returns you to the Event Summary page. Continue to process the event.

   You have successfully deleted a bid factor.
