OVERVIEW:
Database Analytics and Management- Overseeing and analyzing the I-94 access database of community comments. The Rethinking I-94 Project Office is seeking a qualified person to analyze the community comments database, making connections of these comments to project purpose and need, and developing evaluation criteria for the purpose of shaping/informing the range of project alternatives. Additionally, analyzing the non-transportation issues pertinent to and determining how we address those (housing, economic development, etc ...) when not part of the environmental document.

WHAT YOU WILL LEARN:
Any successful applicant will get firsthand experience in the MnDOT environmental process and project development. Additionally, they will gather significant hands-on experience in community engagement and project outreach. The successful application will serve as a liaison with MnDOT’s Office of Community Connections as well as the Rethinking I-94 Policy and Land Use Committee. Lastly, the position will evaluate the themes and lessons learned from the first phase of Rethinking I-94, as well as other corridor projects, and how aid in determining how to apply these to the Rethinking I-94 environmental process and subsequent project development.

WHAT WE REQUIRE:
A graduate degree or will soon earn a graduate degree and in political science, urban planning, transportation planning, governmental policy, or similar degree and who demonstrate an interest in a career in public service.

ADDITIONAL INFORMATION:
A graduate degree or will soon earn a graduate degree and in political science, urban planning, transportation planning, governmental policy, or similar degree and who demonstrate an interest in a career in public service.
