Olmstead Subcabinet Meeting Agenda
Monday, August 27, 2018 • 3:00 p.m. to 5:00 p.m.
Minnesota Housing – Lake Superior Conference Room, 400 Wabasha Street North, Suite 400, St Paul

1) Call to Order

2) Roll Call

3) Agenda Review

4) Approval of Minutes
   a) Subcabinet meeting on July 23, 2018

5) Reports
   [Agenda items 1-5d 3:00 – 3:10] 3
   a) Chair
   b) Executive Director
   c) Legal Office
   d) Compliance Office
   e) Housing Topic Presentation (DHS/MHFA) [3:10 – 3:55]

6) Action Items
   a) Proposed Annual Goal – Transportation Goal Five (Met Council) [3:55 – 4:00] 11
   b) August 2018 Quarterly Report [4:00 – 4:30] 15
   d) Adjustment to Workplan Activity
      1) Person-Centered Planning 4B.2 – Workforce report implementation plan/workplan (DHS/DEED) [4:35 – 4:40] 69

7) Informational Items and Reports
   a) Workplan activity reports to be presented to Subcabinet 73
      1) Education 3F – TRIO Student Support Services (MDE) [4:40 – 4:45] 75
      2) Quality of Life Survey 5C – Monthly report on implementation (OIO) [4:45 – 4:50] 77
   b) Follow up from June 25, 2018 Subcabinet meeting – Workplan Activity Employment 6A.2 (DHS) [4:50 – 4:55] 81

8) Public Comments [4:55 – 5:00]

9) Adjournment

Next Subcabinet Meeting: September 24, 2018 – 3:00 p.m. – 4:30 p.m.
Minnesota Housing – Lake Superior Conference Room, 400 Wabasha Street North, Suite 400, St Paul
Olmstead Subcabinet Meeting Agenda Item
August 27, 2018

Agenda Item:

4) Approval of Minutes
   a) Subcabinet meeting on July 23, 2018

Presenter:
Commissioner Tingerthal (Minnesota Housing)

Action Needed:
☑ Approval Needed
☐ Informational Item (no action needed)

Summary of Item:

Approval is needed of the minutes for the July 23, 2018 Subcabinet meeting.

Attachment(s):

4a- Olmstead Subcabinet meeting minutes – July 23, 2018
Olmstead Subcabinet Meeting Minutes
Monday, July 23, 2018 • 3:00 p.m. to 4:30 p.m.
Minnesota Housing – Lake Superior Conference Room, 400 Wabasha Street North, Suite 400, St Paul

1) Call to Order
Action: N/A
Commissioner Tingerthal welcomed everyone and provided meeting logistics.

2) Roll Call
Action: N/A
Subcabinet members present: Mary Tingerthal, Minnesota Housing; Colleen Wieck, Governor’s Council on Developmental Disabilities (GCDD)

Designees present: Claire Wilson, Department of Human Services (DHS); Jeremy Hanson Willis, Department of Employment and Economic Development (DEED); Gil Acevedo, Minnesota Department of Health (MDH); Deb Kerschner, Department of Corrections (DOC) and Rowzat Shipchandler, Minnesota Department of Human Rights (MDHR); Tim Henkel, Department of Transportation (DOT)

Guests present: Mike Tessneer, Rosalie Vollmar, Darlene Zangara, Diane Doolittle, Sue Hite-Kirk and Shannon Eckman, Olmstead Implementation Office (OIO); Megan Ryan (Minnesota Housing); Erin Sullivan Sutton, Sarah Knoph, Adrienne Hannert and Alex Bartolic (DHS); Marikay Litzau, Emily Jahr, Monica Rasmussen and Holly Anderson (MDE); Maura McNellis-Kubat (Office of Ombudsman for Mental Health and Developmental Disabilities); Darielle Dannen and Steven Kuntz (DEED); Stephanie Lenartz, Martha Burton Santibanez and Nicole Stockert (MDH); Kristie Billiar (DOT); Christina Schaffer (MDHR); Joan Willshire (Minnesota Council on Disability); Erica Klein (Management Analysis and Development); Gerri Sutton (Met Council); Pamela Hoopes and Hannah Camilleri (Minnesota Disability Law Center); Alicia Munson (The Arc Minnesota); Mary Kay Kennedy (Advocating Change Together); Dan Rietz (TSE Inc.); Todd Kemery (Paralyzed Veterans of America); Melika Fahmy, David Fredrickson, Judy Harris, Katie Hoffman and Staci McIntyre (Lutheran Social Services); Beth Tollefson and Julie Manworren (Living Well); Chet Tschetter and Julie Kramme (Institute on Community Integration); Natalie Kallas (Accra Care); Jane McClure, Tim Benjamin and Chris Immel (Access Press); Chris Serres (Star Tribune); Kelly Kausel, Jane Strauss, Carla Friese, Dorothy Lund, Lindalee Soderstrom, Michelle Lacy, Patricia Hoy, Mohamed Moursi-Alfash and Jeff Bangsberg (members of the public)

Guests present via telephone: Anni Simons, Barbara Kleist and Kim Pettman (members of the public)

Sign Language and CART providers: Mary Catherine (Minnesota Housing); ASL Interpreting Services, Inc.; Paradigm Captioning and Reporting Services, Inc.

3) Agenda Review
Commissioner Tingerthal asked if there were any changes needed to the agenda. She reminded any attendees interested in providing public comment to sign up in the back of the room.
4) Approval of Minutes
   a) Subcabinet meeting on June 22, 2018
      Commissioner Tingerthal asked if there were any changes needed to the June 22, 2018
      Subcabinet meeting minutes. No edits were requested.

      Motion: Approve June 22nd Subcabinet meeting minutes
      Action: Motion - Henkel  Second – Wieck  In Favor - All

5) Reports
   a) Chair
      Commissioner Tingerthal provided a brief summary of the Status Conference:
      • Status conference was held by the Court on July 12th on both Olmstead and the
        underlying Jensen litigation.
      • Present were Commissioner Tingerthal, OIO staff, Daron Korte (MDE), Chuck Johnson
        (DHS), and other DHS staff and attorneys. Also present were Colleen Wieck (GCDD) and
        Roberta Opheim (OMHDD) in their roles as consultants to the Court.
      • The Court was provided an update on Olmstead, including:
        o An update on actions taken since the last status conference in December 2017.
        o Notable areas of success and areas that need improvement, which incorporated data
          reported in the December 2017 Annual Report, the February and May 2018 Quarterly
          Reports.
        o Update on the Quality of Life Baseline Survey and the next steps in that process.
        o An overview of the process used to revise the Olmstead Plan, adopted in March 2018.
        o The ongoing strategic review process.
      • The expectation is that there will be another status conference in six months.

   b) Executive Director
      Darlene Zangara (OIO) provided an update on the Community Engagement Workgroup.
      A report on the status of the Quality of Life Survey is included in agenda item 7a6.

   c) Legal Office
      No report.

   d) Compliance Office
      No report.

6) Action Items
   a) Direct Care/Support Workforce Report recommendations (PC 4B.1a)
      Commissioner Tingerthal introduced the next item and clarified that the action to be taken by
      the Subcabinet at this meeting is to accept the report. In September, the agencies will
      present an implementation plan and workplan to the Subcabinet for review.
      Members of the workforce workgroup gave a presentation on the recommendations related
      to the workforce shortage report. The presentation included a PowerPoint presentation.
      Presenters were: Linda Wolford (DHS), Dena Belisle (PCA provider and Parent Advocate), Jeff
      Bangsberg (Disability Advocate) and Dan Newman (DHS).
Questions/Comments:

- Commissioner Tingerthal expressed her gratitude to the workgroup for the detail, time and thoughtfulness put into the rankings and the overall high quality work. It is noted that the review of recommendations at this meeting are only the highest ranking recommendations. All participants of the workgroup are listed in the report beginning on page 65 of 130 of the Subcabinet packet.

- Deputy Commissioner Shipchandler (MDHR) also expressed her thanks for the very thorough report and the workgroup’s time. She asked if the committee looked at other states that might be making progress in this area.

Linda Wolford (DHS) indicated that they had reviewed other states. Maryland is going through a similar process. New York passed some legislation on complex care which developed a tiered system with people with higher needs getting a higher reimbursement level. However, it may be limited to people with developmental disabilities. The University of Minnesota Research and Training Center assisted with some of the research of other states for the workgroup.

Jeff Bangsberg added that the state of Ohio brought in a tiered rate structure and raised the rates two dollars an hour to deal with the crisis. North Dakota pays their workers $16 to $20 per hour.

Linda Wolford (DHS) further stated that Minnesota’s reimbursement rate for a PCA is $17.40 an hour. That goes to the agency and PCAs get paid out of that amount.

- Assistant Commissioner Wilson (DHS) thanked the workgroup for their work which far exceeded expectations in terms of depth of the outline. She also thanked those providing public comment. She further stated that recommendations will be addressed and DHS will consider where these strategies align with the Olmstead workplans and how they inform us in the plan for transition in the coming year. DHS will seriously look at internally what can be done from a policy, legislative and community collaboration standpoint, but also how DHS can support this work outside of the agency.

- Deputy Commissioner Hanson Willis (DEED) thanked the workgroup and everyone involved. DEED also takes this seriously and will be an active partner. Some of the largest legislative requests in recent years have been specifically in this area. This is a huge crisis facing our state because it affects people with disabilities and the rapidly aging older population.

Public Comment:
Commissioner Tingerthal had those who signed up for public comment speak to the Subcabinet on this agenda item.
Michelle Lacy (member of the public)
Michelle indicated she has cerebral palsy and is a recipient of PCA services. She has needed more and more assistance over the years. Highlights of her testimony included:
• It is difficult to find PCAs to cover extended hours.
• It is even more of a struggle with the low pay the PCAs receive.
• She prefers to stay in her home and be as independent as she can be.

Carla Friese (member of the public)
Carla stated she is a quadriplegic and receives PCA services. She expressed appreciation for the workgroup. Highlights of her testimony included:
• To remain independent, difficult choices need to be made just to survive.
• Some people are moving to PCA traditional services through an agency from PCA choice because it is too exhausting to find staff on their own.
• Some agencies are telling clients they need to go to a different agency due to overtime which they cannot bill
• There is a shortage of caregivers
• There is a need to increase reimbursements for PCAs

Jane Strauss (member of the public)
Jane stated she is a parent of a 20 year old son with multiple disabilities. She provided a written copy of her comments to Subcabinet members. Her comments will be filed appropriately. Highlights of her testimony included:
• Male PCAs are a challenge to find.
• She quit her day job because care for her son was not consistent or reliable.
• Many profiles on Direct Support Connect system have no names attached to them.
• Her son cannot stay in the community unless an appropriate PCA is found.

Todd Kemery (Paralyzed Veterans of America)
Todd stated he is a quadriplegic and is service connected and receives health care through the Veteran’s Administration. Highlights of his testimony included:
• PCA problems for veterans is the same as others have stated today.
• He encourages the Subcabinet to take into consideration the PCA concerns expressed.

Motion: Accept the recommendations in the report. An implementation plan and workplan will be up for review by the Subcabinet at the September meeting.
Action: Motion – Wieck  Second – Wilson   In Favor – All

b) Workplan Compliance Report for July
Commissioner Tingerthal (Minnesota Housing) reported that 49 workplan activities were reviewed. There are no exceptions to report. The list of activities reviewed is attached to the Workplan Compliance report.

Motion: Approve July Compliance Report
Action: Motion – Hanson Willis  Second – Henkel   In Favor - All
7) Informational Items and Reports
   a) Workplan activity reports to be presented to Subcabinet

   1) Person-Centered Planning 1H/1I – Annual report on training activities and tools (DHS)
      Alex Bartolic (DHS) presented the report to the Subcabinet. There were no questions.

   2) Employment 5A.5 – Semi-annual report on impact of WIOA (DEED)
      i. Vocational Rehabilitation Services (VRS)
      ii. State Services for the Blind (SSB)
      Darielle Dannen (DEED) presented these two related reports to the Subcabinet.
      There were no questions.

   3) Preventing Abuse/Neglect PR2 1D – Public education campaign (MDH)
      Nicole Stockert (MDH) presented the report to the Subcabinet. There were no questions.

   4) Preventing Abuse/Neglect PR2 2A – Quarterly report on ICFs/IID citations (MDH)
   5) Preventing Abuse/Neglect PR2 2B – Quarterly report on SLFs citations (MDH)
      Nicole Stockert (MDH) presented these two related reports to the Subcabinet.

   Questions/Comments
   Colleen Wieck (GCDD) stated that the previous presentation on the workforce shortage
   talked about the possibility of collecting data about hospital admissions due to inadequate
   staffing. In the past, MDH has reported that one or two hospitals demonstrated a good
   way of reporting abuse. Are there lessons learned from these reports that could assist the
   workforce workgroup with collection of that data? Ms. Stockert responded that she would
   connect with someone on the workforce workgroup to follow up.

   6) Quality of Life Survey 5C – Monthly report on survey implementation (OIO)
      Darlene Zangara (OIO) presented the report to the Subcabinet. There were no questions.

   b) Workplan activity report to be reviewed by Subcabinet
      The remaining reports were not presented to the Subcabinet. Agency staff were available to
      answer any questions from the Subcabinet. No action was needed at this time.

   1) Community Engagement 1D/1E – Quarterly report on community contacts (OIO)
   2) Preventing Abuse/Neglect PR3 2A – State Quality Council strategies (DHS)
   3) Preventing Abuse/Neglect PR4 3E – Annual report on school districts and mandated
      reporter training (MDE)
8) Public Comments
Commissioner Tingerthal asked those who signed up for public comment to speak to the Subcabinet.

Kim Pettman (member of the public)
Kim stated the phone connection was not very good and that she prefers public comment at the beginning of the meeting. After the Subcabinet meeting Kim provided an email outline with links related to her public comments. The outline will be filed appropriately. Highlights included:

- Hospitals and clinics often are unaware of ADA, Section 504.
- She recommended again, that ADA certification training program be implemented.
- She recommended that the Odyssey Conference, which is held every two years in Duluth, be rotated to different locations to be more inclusive of people with disabilities.
- Minnesota Council on Transportation Access and Regional Transportation Coordinating Councils are good examples of public participation.
- Quote: “Those closest to the problem are closest to the solution.” (author unknown)

Linda Soderstrom (member of the public)
Linda provided an email outline of her public comments after the Subcabinet meeting. The outline will be filed appropriately. Highlights included:

- Individuals in subsidized housing are at risk of losing their homes. She has lost her home twice and currently has had to move 100 miles out of the Metro area to find affordable housing.
- Renters, tenants, and owners were not appointed to the Governors Housing Task Force (GHTF), however, she attended the meetings.
- She recommends that individuals impacted by Olmstead be at the table vs. attending meetings as guests, panelists and visitors

Commissioner Tingerthal thanked Lindalee for her attendance at the Governor’s Task Force on Housing meetings. This task force has heard many comments on the increasing difficulty of finding rental properties in the open market that will accept various kinds of rental vouchers. This will be included as one of the recommendations.

Darlene Zangara (OIO) commented that information about what has been learned from the Task Force will be reported on in August. Announcements will be provided through Facebook and the OIO newsletter.

9) Adjournment
Commissioner Tingerthal adjourned the meeting at 4:30 p.m.

Next Subcabinet Meeting: August 27, 2018 – 3:00 p.m. – 5:00 p.m.
Minnesota Housing – Lake Superior Conference Room, 400 Wabasha Street North, Suite 400, St Paul
Olmstead Subcabinet Meeting Agenda Item
August 27, 2018

Agenda Item:

6 (a) Proposed Annual Goal - Transportation Goal Five

Presenter:

Gerri Sutton (Met Council)

Action Needed:

☒ Approval Needed

☐ Informational Item (no action needed)

Summary of Item:

Transportation Goal Five – The March 2018 Olmstead Plan provided that annual goals be established for this goal. An annual goal is being proposed to the Subcabinet. If the proposed goal is approved by the Subcabinet it will be incorporated into the August 2018 Quarterly Report.

Attachment(s):

6a - Proposed Goal for Review – Transportation Goal Five
Proposed Annual Goal for Review

Transportation Goal Five was adopted in the March 2018 Revised Olmstead Plan provides that by April 30, 2018, annual goals will be established. The proposed goal below is being presented to the Subcabinet for review at the August 27, 2018 meeting. If approved, the baseline will be incorporated into the August 2018 Quarterly Report.

**TRANSPORTATION GOAL FIVE:** By 2040, 100% percent of the target population will be served by regular route level of service for prescribed market areas 1, 2, and 3 in the seven county metropolitan area.

**BASELINE:** The percentage of target population served by regular route level of service for each market area is as follows: Market Area 1 = 95%; Market Area 2 = 91%; and Market Area 3 = 67%.

<table>
<thead>
<tr>
<th>Time Period</th>
<th>Percentage of population serviced by regular route level of service</th>
</tr>
</thead>
<tbody>
<tr>
<td>Baseline - June 2017</td>
<td>Market Area 1: 95%  Market Area 2: 91%  Market Area 3: 67%</td>
</tr>
</tbody>
</table>

2018 Goal
- By April 30, 2018, annual goals will be established

**RESULTS**
The 2018 goal to establish annual goals was met. [PENDING APPROVAL]

**Proposed Annual Goal:**
- By 2025, the percentage of target population served by regular route level of service for each market area will be:
  - Market Area 1 will be 100%
  - Market Area 2 will be 95%
  - Market Area 3 will be 70%

The percentage for each market area will be reported on an annual basis to determine if progress is being made toward the goals.

**COMMENT ON PERFORMANCE:**
Metro Area Public Transit utilization is measured by distinct market areas for regular route level of service. This measure estimates demand potential for all users of the regular route system. The market area is created based on analysis that shows the demand for regular route service is driven primarily by population density, automobile availability, employment density and intersection density (walkable distance to transit). This measure is based on industry standards incorporated into the Transportation Policy Plan’s - Regional Transit Design Guidelines and Performance Standards. The Metro Area also provides non-regular route services in areas that are not suitable for regular routes, such as dial-a-ride transit. Policy Plan Guidelines/Standards [https://metrocouncil.org/METC/files/63/6347e827-e9ce-4c44-adff-a6af8b48106.pdf](https://metrocouncil.org/METC/files/63/6347e827-e9ce-4c44-adff-a6af8b48106.pdf)

**TIMELINESS OF DATA:**
Data will be collected in January of each year. In order for this data to be reliable and valid, it will be reported four months after the end of the reporting period.

I. PURPOSE OF REPORT

This quarterly report provides the status of work being completed by State agencies to implement the Olmstead Plan. The goals related to the number of people moving from segregated settings into more integrated settings; the number of people approved for waiver funding at a reasonable pace; and the quality of life measures will be reported in every quarterly report.

Reports are compiled on a quarterly basis. For the purpose of reporting, the measurable goals are grouped in four categories:

1. Movement of people with disabilities from segregated to integrated settings
2. Timeliness of waiver funding
3. Quality of life measurement results
4. Increasing system capacity and options for integration

This quarterly report includes data acquired through July 31, 2018. Progress on each measurable goal will be reported quarterly, semi-annually, or annually. Information reported for each goal includes: the overall goal, annual goal, baseline, results for the reporting period, analysis of data, comment on performance and the universe number when available. The universe number is the total number of individuals potentially impacted by the goal. This number provides context as it relates to the measure.

This quarterly report also includes Olmstead Implementation Office (OIO) compliance summary reports on the status of workplans. Reports are reviewed and approved by the Olmstead Subcabinet. After reports are approved they are made available to the public on the Olmstead Plan website at Mn.gov/Olmstead.

EXECUTIVE SUMMARY

This quarterly report covers twenty-one measurable goals. As shown in the chart below, eight of those goals were either met or on track to be met. Seven goals were categorized as not on track, or not met. For those seven goals, the report documents how the agencies will work to improve performance on each goal. Six goals are in process.

Progress on movement of people with disabilities from segregated to integrated setting

- More individuals are leaving ICF/DD programs to more integrated settings. During this quarter, 62 individuals left ICF/DD programs to more integrated settings. After two quarters, the total number is 104 which exceeds the annual goal of 72. (Transition Services Goal One A)
- More individuals with disabilities under age 65 in a nursing facility longer than 90 days, are leaving for more integrated settings. During this quarter, 201 individuals moved from nursing facilities to more integrated settings. After two quarters, 54% of the annual goal of 750, has been achieved. (Transition Services Goal One B)
• More individuals are leaving other segregated settings to more integrated settings. During this quarter, 297 individuals moved from other segregated settings to more integrated settings. After two quarters, the total number is 595 which exceeds the annual goal of 500. (Transition Services Goal One C)
• Planning for individuals experiencing a transition has improved over the last three quarters. Adherence to Transition Protocols has improved from 52.2% to 68.2% and most recently to 88.2%. (Transition Services Goal Four)
• The utilization of the Person Centered Protocols has improved over the last three quarters. Of the eight person centered elements measured in the protocols, performance on all elements improved over the 2017 baseline. Seven of the eight elements show consistent progress, and four of the eight are at 90% or greater in this quarter. (Person-Centered Planning Goal One)

Timeliness of Waiver Funding Goal One
• There are fewer individuals waiting for access to a DD waiver. At the end of the current quarter there were 94 individuals who have funding approval pending compared to 237 people the same quarter last year.

Increasing system capacity and options for integration
• The number of reports of use of emergency use of manual restraints is lower at 904 reports this quarter compared to 955 in the previous quarter. (Positive Supports Goal Two)
• The number of individuals approved for the emergency use of mechanical restraints at the end of the quarter is 13, which is on track to meet the annual goal of 13. (Positive Supports Goal Three B)
• More students with Developmental Cognitive Disabilities (DCD), ages 19 – 21 entered into competitive integrated employment. During the last year, an additional 179 students entered into competitive integrated employment. (Employment Goal Three)
• More students had active consideration of assistive technology (AT) during their Individualized Education Program team meetings. During the last year 94.9% had active consideration of AT. (Education Goal Three)
• More individuals with disabilities participated in Governor appointed Boards and Commissions and Olmstead Subcabinet workgroups. During the last year there were 197 individuals participating who self-identified as having a disability. (Community Engagement Goal One)

Listed below are measurable goals targeted for improvement. Proposed steps for improvement are included in this report.
• Transition Services Goal Two to decrease the percent of people at AMRTC who no longer meet hospital level of care and are currently awaiting discharge to the most integrated setting.
• Transition Services Goal Three to increase the number of individuals leaving the MSH to a more integrated setting.
• Positive Supports Goal Three A to reduce the number of reports of emergency use of mechanical restraints with approved individuals.
• Crisis Services Goal One and Two to increase the percent of children and adults who remain in the community after a mental health crisis.
• Crisis Services Goal Three to decrease the number of people who discontinue disability services after a crisis.
• Community Engagement Goal Two and Preventing Abuse and Neglect Two will be modified during the Plan amendment process, as it was determined that measures were not available to gather reliable and valid data.
II. MOVEMENT FROM SEGREGATED TO INTEGRATED SETTINGS

This section reports on the progress of five separate Olmstead Plan goals that assess movement of individuals from segregated to integrated settings.

QUARTERLY SUMMARY OF MOVEMENT FROM SEGREGATED TO INTEGRATED SETTINGS

The table below indicates the cumulative net number of individuals who moved from various segregated settings to integrated settings for each of the five goals included in this report. The reporting period for each goal is based on when the data collected can be considered reliable and valid.

Net number who moved from segregated to integrated settings: 593

More detailed information for each specific goal is included below. The information includes the overall goal, annual goal, baseline, results for the reporting period, analysis of the data and a comment on performance and the universe number when available. The universe number is the total number of individuals potentially impacted by the goal. This number provides context as it relates to the measure.
TRANSITION SERVICES GOAL ONE: By June 30, 2020, the number of people who have moved from segregated settings to more integrated settings will be 7,138.

Annual Goals for the number of people moving from (A) ICFs/DD; (B) nursing facilities; and (C) other segregated housing to more integrated settings are set forth in the following table.

A) INTERMEDIATE CARE FACILITIES FOR PERSONS WITH DEVELOPMENTAL DISABILITIES (ICFs/DD)

2018 goal
- For the year ending June 30, 2018 the number of people who have moved from ICFs/DD to a more integrated setting will be 72

Baseline: January - December 2014 = 72

RESULTS:
The goal is on track to meet the 2018 goal of 72.

ANALYSIS OF DATA:
From October – December 2017, the number of people who moved from an ICF/DD to a more integrated setting was 62. This is 20 more people than in the previous quarter. During the first two quarters, the total number is 104 which exceeds the annual goal of 72. The goal is on track.

COMMENT ON PERFORMANCE:
DHS provides reports to counties about persons in ICFs/DD who are not opposed to moving with community services, as based on their last assessment. As part of the current reassessment process, individuals are being asked whether they would like to explore alternative community services in the
next 12 months. Some individuals who expressed an interest in moving changed their minds, or they would like a longer planning period before they move.

For those leaving an institutional setting, such as an ICF/DD, the Olmstead Plan reasonable pace goal is to ensure access to waiver services funding within 45 days of requesting community services. DHS monitors and provides technical assistance to counties in providing timely access to the funding and planning necessary to facilitate a transition to community services.

DHS continues to work with private providers and Minnesota State Operated Community Services (MSOCS) that have expressed interest in voluntary closure of ICFs/DD. Providers are working to develop service delivery models that better reflect a more community–integrated approach requested by people seeking services. A total of 12 out of 15 MSOCS ICFs/DD converted since January 2017. DHS is working with one county to determine the best way to serve the 12 adults currently being served in these three settings. No timeline for conversion of these homes has been confirmed.

During calendar year 2017, 191 ICF/DD beds were closed. This total includes a number of beds that were vacant. Of the 191 beds closed in 2017, 54 closed during the current reporting period. Forty-one (41) were converted to adult foster care settings serving 4 or fewer people.

**UNIVERSE NUMBER:**
In June 2017, there were 1,383 individuals receiving services in an ICF/DD.

**TIMELINESS OF DATA:**
In order for this data to be reliable and valid, it is reported six months after the end of the reporting period.

### B) NURSING FACILITIES

**2018 goal**
- For the year ending June 30, 2018, the number of people who have moved from Nursing Facilities (for persons with a disability under 65 in facility longer than 90 days) to a more integrated setting will be **750**.

**Baseline:** January - December 2014 = 707

**RESULTS:**
The goal is **on track** to meet the 2018 goal of 750.

</tbody>
</table>
ANALYSIS OF DATA:
From October – December 2017, the number of people under 65 in a nursing facility for more than 90 days who moved to a more integrated setting was 201. This is 1 fewer person than in the previous quarter. After two quarters, the number is 54% of the annual goal of 750. The goal is on track.

COMMENT ON PERFORMANCE:
DHS reviews data and notifies lead agencies of people who accepted or did not oppose a move to more integrated options. Lead agencies are expected to work with these individuals to begin to plan their moves. DHS continues to work with partners in other agencies to improve the supply of affordable housing and knowledge of housing subsidies.

In July 2016, Medicaid payment for Housing Access Services was expanded across waivers. Additional providers are now able to enroll to provide this service. Housing Access Services assists people with finding housing and setting up their new place, including a certain amount of basic furniture, household goods and/or supplies and payment of certain deposits.

UNIVERSE NUMBER:
In June 2017, there were 1,502 individuals with disabilities under age 65 who received services in a nursing facility for longer than 90 days.

TIMELINESS OF DATA:
In order for this data to be reliable and valid, it is reported six months after the end of the reporting period.

C) SEGREGATED HOUSING

2018 goal
- For the year ending June 30, 2018, the number of people who have moved from other segregated housing to a more integrated setting will be 500.

BASELINE: During July 2013 – June 2014, of the 5,694 individuals moving, 1,121 moved to a more integrated setting.

RESULTS:
The goal is on track to meet the 2018 annual goal of 500.

<td>245 (8.6%)</td>
</tr>
</tbody>
</table>
ANALYSIS OF DATA:
From October – December 2017, of the 1,381 individuals moving from segregated housing, 297 individuals (21.5%) moved to a more integrated setting. During the first two quarters, the total number is 595 which exceeds the annual goal of 500. The goal is on track.

COMMENT ON PERFORMANCE:
There were significantly more individuals who moved to more integrated settings (21.5%) than who moved to congregate settings (8.4%). This analysis also illustrates the number of individuals who are no longer on MA and who are not receiving residential services as defined below.

The data indicates that a large percentage (61.8%) of individuals who moved from segregated housing are not receiving publicly funded residential services. Based on trends identified in data development for Crisis Services Goal Four, it is assumed the majority of those people are housed in their own or their family’s home and are not in a congregate setting.

COMMENT ON TABLE HEADINGS:
The language below provides context and data definitions for the headings in the table above.

Total Moves: Total number of people in one of the following settings for 90 days or more and had a change in status during the reporting period:

- Adult corporate foster care
- Supervised living facilities
- Supported living services (DD waiver foster care or in own home)
- Board and Care or Board and Lodge facilities

Moves are counted when someone moves to one of the following:

- More Integrated Setting (DHS paid)
- Congregate Setting (DHS paid)
- No longer on Medical Assistance (MA)
- Not receiving residential services (DHS paid)
- Deaths are not counted in the total moved column

Moved to More Integrated Setting: Total number of people that moved from a congregate setting to one of the following DHS paid settings for at least 90 days:

- Adult family foster care
- Adult corporate foster care (when moving from Board and Care or Board and Lodge facilities)
- Child foster care waiver
- Housing with services
- Supportive housing
- Waiver non-residential
- Supervised living facilities (when moving from Board and Care or Board and Lodge facilities)

Moved to Congregate Setting: Total number of people that moved from one DHS paid congregate setting to another for at least 90 days. DHS paid congregate settings include:

- Board and Care or Board and Lodge facilities
- Intermediate Care Facilities (ICFs/DD)
- Nursing facilities (NF)
No Longer on MA: People who currently do not have an open file on public programs in MAXIS or MMIS data systems.

Not Receiving Residential Services: People in this group are on Medical Assistance to pay for basic care, drugs, mental health treatment, etc. This group does not use other DHS paid services such as waivers, home care or institutional services. The data used to identify moves comes from two different data systems: Medicaid Management Information System (MMIS) and MAXIS. People may have addresses or living situations identified in either or both systems. DHS is unable to use the address data to determine if the person moved to a more integrated setting or a congregate setting; or if a person’s new setting was obtained less than 90 days after leaving a congregate setting.

Based on trends identified in data development for Crisis Services Goal Four, it is assumed the majority of these people are housed in their own or their family’s home and are not in a congregate setting.

TIMELINESS OF DATA:
In order for this data to be reliable and valid, it is reported six months after the end of the reporting period.
TRANSITION SERVICES GOAL TWO: By June 30, 2019, the percent of people under mental health commitment at Anoka Metro Regional Treatment Center (AMRTC) who do not require hospital level of care and are currently awaiting discharge to the most integrated setting will be reduced to 30% (based on daily average).

2018 goal
- By June 30, 2018, the percent of people at AMRTC awaiting discharge will be reduced to ≤ 32%

Baseline: From July 2014 - June 2015, the percent of people at AMRTC who no longer meet hospital level of care and are currently awaiting discharge to the most integrated setting was 36% on a daily average. ¹

RESULTS:
The 2018 goal of ≤ 32% was not met.

<table>

<td>36.9%</td>
</tr>
</tbody>
</table>

ANALYSIS OF DATA:
From July 2017 – June 2018, 36.9% of those under mental health commitment at AMRTC no longer meet hospital level of care and are currently awaiting discharge to the most integrated setting. The annual goal for June 30, 2018 (the percent awaiting discharge will be reduced to ≤ 32%) was not met. However the annual average of 36.9% was an 8% improvement from 44.9% the previous year. In addition, the percentage of individuals awaiting discharge who were civilly committed after being found incompetent improved by 5.5% from 29.3% in the previous year to 23.8% this year.

From July 2017 – June 2018, 46 individuals at AMRTC under mental health commitment left and moved to an integrated setting. The table below provides information about those individuals who left AMRTC. It includes the number of individuals under mental health commitment and those who were civilly committed after being found incompetent on a felony or gross misdemeanor charge who moved to integrated settings.

1 The baseline included individuals at AMRTC under mental health commitment and individuals committed after being found incompetent on a felony or gross misdemeanor charge (restore to competency).
2 This data for July 2015 - June 2016 was reported as a combined percentage for individuals under mental health commitment and individuals committed after being found incompetent on a felony or gross misdemeanor charge (restore to competency). After July 2016, the data is reported for the two categories.
Quarterly Report on Olmstead Plan Measurable Goals

| Time period               | Total number of individuals leaving | Transfers | Deaths | Net moved to integrated setting | Moves to integrated setting by Mental health commitment | Committed after finding of incompetency

| Quarter 3 (Jan – March 2018) | 60                                 | 42        | 0      | 18                              | 10                                                     | 8                                
| Quarter 4 (April – June 2018) | 66                                 | 54        | 0      | 12                              | 9                                                      | 3                                
| **Annual Totals**           | **274**                            | **197**   | **0**  | **77**                          | **46**                                                   | **31**                           

COMMENT ON PERFORMANCE:

AMRTC continues to serve a large number of individuals who no longer need hospital level of care, including those who need competency restoration services prior to discharge. During the last year there was a higher percentage of individuals awaiting discharge for those under mental health commitment (36.9%) than for those who were civilly committed to AMRTC after being found incompetent (23.8%). However, the percentage of patients hospitalized at AMRTC who are civilly committed after being found incompetent continues to increase and is currently around 75%.

Individuals under mental health commitment have more complex mental health and behavioral support needs. When they move to the community, they may require 24 hour per day staffing or 1:1 or 2:1 staffing. Common barriers that can result in delayed discharges for those at AMRTC include a lack of housing vacancies and housing providers no longer accepting applications for waiting lists.

Community providers often lack capacity to serve individuals who exhibit these behaviors:
- Violent or aggressive behavior (i.e. hitting others, property destruction, past criminal acts);
- Predatory or sexually inappropriate behavior;
- High risk for self-injury (i.e. swallowing objects, suicide attempts); and
- Unwillingness to take medication in the community.

Ongoing efforts are facilitated to improve the discharge planning process for those served at AMRTC:
- Improvements in the treatment planning process to better facilitate collaboration with county partners. AMRTC has increased collaboration efforts to foster participation with county partners...
to aid in identifying more applicable community placements and resources for individuals awaiting discharge.

- Improvements in AMRTC’s notification process for individuals who no longer meet hospital criteria of care to county partners and other key stakeholders to ensure that all parties involved are informed of changes in the individual’s status and resources are allocated towards discharge planning.
- Improvements in AMRTC’s notification process to courts and parties in criminal cases for individuals who were civilly committed after a finding of incompetency who no longer meet hospital criteria of care.

In order to meet timely discharge, individual treatment planning is necessary for individuals under mental health commitment who no longer need hospital level of care. This can involve the development of living situations tailored to meet their individualized needs which can be a very lengthy process. AMRTC continues to collaborate with county partners to identify, expand, and develop integrated community settings.

DHS has convened a cross-division, cross-administration working group to improve the timely discharge of individuals at MSH and AMRTC to identify: barriers, current and future strategies, and any needed efficiencies that could be developed between AMRTC and MSH to support movement to the community. Counties and community providers will be consulted and engaged in this effort as well. DHS will provide a status update to the Subcabinet on the working group efforts by September 30, 2018. Annual reporting to the Olmstead Subcabinet on these efforts will begin by December 31, 2018.

**UNIVERSE NUMBER:**
In Calendar Year 2017, 383 patients received services at AMRTC. This may include individuals who were admitted more than once during the year. The average daily census was 91.9.

**TIMELINESS OF DATA:**
In order for this data to be reliable and valid, it is reported one month after the end of the reporting period.
TRANSITION SERVICES GOAL THREE: By December 31, 2019, the average monthly number of individuals leaving Minnesota Security Hospital to a more integrated setting will increase to 10 individuals per month.

2018 goal
- By December 31, 2018 the average monthly number of individuals leaving to a more integrated setting will increase to ≥ 9

Baseline: From January – December 2014, the average monthly number of individuals leaving Minnesota Security Hospital (MSH) to a more integrated setting was 4.6 individuals per month.

RESULTS: The goal is not on track to meet the 2018 goal of 9.

ANALYSIS OF DATA:
From April – June 2018, the average monthly number of individuals leaving Forensic Services\(^3\) to a more integrated setting was 7. The average number moving to an integrated setting increased from 5 in the previous quarter. The goal is not on track to meet the annual goal of 9.

Beginning January 2017, Forensic Services began categorizing discharge data into three areas. These categories allow analysis surrounding continued barriers to discharge. The table below provides detailed information regarding individuals leaving Forensic Services, including the number of individuals who moved to integrated settings (those civilly committed after being found incompetent on a felony or gross misdemeanor charge, those who are committed as Mentally Ill and Dangerous (MI&D), and Other committed).

\(^3\) MSH includes individuals leaving MSH, Transition Services, Forensic Nursing Home and the Competency Restoration Program at St Peter. These four programs are collectively called Forensic Services.

**COMMENT ON PERFORMANCE:**

MSH, Transition Services, Forensic Nursing Home, and the Competency Restoration Program (CRP) at St. Peter serve different populations for different purposes. Together the four programs are known as Forensic Services. DHS efforts continue to expand community capacity. In addition, Forensic Services continues to work towards the mission of Olmstead through identifying individuals who could be served in more integrated settings.

Legislation in 2017 increased the base funding for state operated facilities to improve clinical direction and support to direct care staff treating and managing clients with complex conditions, some of whom engage in aggressive behaviors. The funding will enhance the current staffing model to achieve a safe, secure and therapeutic treatment environment. Of the 65 additional funded positions, 54 FTEs have been filled as of June 22, 2018. These positions are primarily in direct care positions such as registered nurses, forensic support specialists and human services support specialists. The positions that remain to be filled are in professional areas such as psychologists, social workers, recreational and occupational therapists.

**MI&D committed and Other committed**

MSH and Transition Services primarily serve persons committed as Mentally Ill and Dangerous (MI&D), providing acute psychiatric care and stabilization, as well as psychosocial rehabilitation and treatment.
services. The MI&D commitment is for an indeterminate period of time, and requires a Special Review Board recommendation to the Commissioner of Human Services, prior to approval for community-based placement (Minnesota Stat. 253B.18). MSH also serves persons under other commitments. Other commitments include Mentally Ill (MI), Mentally Ill and Chemically Dependent (MI/CD), Mentally Ill and Developmentally Disabled (MI/DD).

One identified barrier is the limited number of providers with the capacity to serve:
- Individuals with Level 3 predatory offender designation;
- Individuals over the age of 65 who require either adult foster care, skilled nursing, or nursing home level care;
- Individuals with DD/ID with high behavioral acuity; and
- Individuals who are undocumented.

Some barriers to discharge identified by the Special Review Board (SRB), in their 2017 MI&D Treatment Barriers Report as required by Minnesota Statutes 253B.18 subdivision 4c(b) included:
- The patient lacks an appropriate provisional discharge plan
- A placement that would meet the patient’s needs is being developed
- Funding has not been secured

Ongoing efforts are facilitated to enhance discharges for those served at Forensic Services, including:
- Collaboration with county partners to identify those individuals who have reached maximum benefit from treatment.
- Collaboration with county partners to identify community providers and expand community capacity (with specialized providers/utilization of Minnesota State Operated Community Services).
- Utilization of the Forensic Review Panel, an internal administrative group, whose role is to review individuals served for reductions in custody (under MI&D Commitment), and who may be served in a more integrated setting.
- The Forensic Review Panel also serves to offer treatment recommendations that could assist the individual’s growth/skill development, when necessary, to aid in preparing for community reintegration. As a result of these efforts, in 2018, Forensic Services recommended reductions-in-custody to the Special Review Board for 14 individuals, 12 of which were granted.
- Collaboration within DHS to expand community capacity and individualized services for a person’s transitioning.

Committed after finding of incompetency
Forensics also admits and treats individuals who are civilly committed after being found incompetent on felony or gross misdemeanor charges. These individuals are provided mental health treatment and competency education.

DHS has convened a cross-division, cross-administration working group to improve the timely discharge of individuals at MSH and AMRTC to identify barriers, current and future strategies, and any needed efficiencies that could be developed between AMRTC and MSH to support movement to community. Counties and community providers will be consulted and engaged in this effort as well. DHS will provide
a status update to the Subcabinet on the working group efforts by September 30, 2018. Annual reporting to the Olmstead Subcabinet on these efforts will begin by December 31, 2018.

**UNIVERSE NUMBER:**
In Calendar Year 2017, 581 patients received services at MSH. This may include individuals who were admitted more than once during the year. The average daily census was 358.4.

**TIMELINESS OF DATA:**
In order for this data to be reliable and valid, it is reported one month after the end of the reporting period.

**TRANSITION SERVICES GOAL FOUR:** By June 30, 2020, 100% of people who experience a transition will engage in a process that adheres to the Person-Centered, Informed Choice and Transition protocol. Adherence to the transition protocol will be determined by the presence of the ten elements from the My Move Plan Summary document listed below. [People who opted out of using the My Move Summary document or did not inform their case manager that they moved are excluded from this measure.]

[Revised March 2018]

**Baseline:** For the period from October 2017 – December 2017, of the 26 transition case files reviewed, 3 people opted out of using the My Move Plan Summary document and 1 person did not inform their case manager that they moved. Of the remaining 22 case files, 15 files (68.2%) adhered to the transition protocol.

**RESULTS:**
This goal is in process.

<td>15 of 17 (88.2%)</td>
</tr>
</tbody>
</table>

**ANALYSIS OF DATA:**
For the period from January – March 2018, of the 25 transition case files reviewed, 5 people opted out of using the My Move Plan document and 3 people did not inform their case manager that they were moving. Of the remaining 17 case files, 15 files (88.2%) adhered to the transition protocol. Adherence to the transition protocols has improved over the last three quarters.

The plan is considered to meet the transition protocols if all ten items below (from “My Move Plan” document) are present:

1. Where is the person moving?
2. Date and time the move will occur.
3. Who will help the person prepare for the move?
4. Who will help with adjustment during and after the move?
5. Who will take the person to new residence?
6. How will the person get his or her belongings?
7. Medications and medication schedule.
8. Upcoming appointments.
9. Who will provide support after the move; what they will provide and how to contact those people (include informal and paid support), including supporting the person to adjust to the changes?
10. Back-up plans for what the person will do in emergencies, such as failure of service provider to show up on schedule, unexpected loss of provider or mental health crisis.

In addition to reviewing for adherence to the transition protocols (use of the My Move Plan document), case files are reviewed for the presence of person-centered elements. This is reported in Person-Centered Planning Goal One.

**COMMENT ON PERFORMANCE:**
In January 2018, Lead Agency Review began requiring lead agencies to remediate missing or non-compliant person-centered review protocols. When findings from case file review indicate files did not contain all required documentation, the agency is required to bring all cases into full compliance by obtaining or correcting the documentation. Corrective action plans will be required when patterns of non-compliance are evident. Because the move occurred prior to the Lead Agency site review, transition measures related to the contents of the My Move Plan Summary cannot be remediated. However, Lead Agencies are provided information about which components of the My Move Plan were compliant/non-compliant for each of the transition cases that were reviewed.

**TIMELINESS OF DATA:**
In order for this data to be reliable and valid, it is reported three months after the end of the reporting period.
III.  **TIMELINESS OF WAIVER FUNDING**

This section reports progress of individuals being approved for home and community-based services waiver funding. An urgency categorization system for the Developmental Disabilities (DD) waiver waiting list was implemented on December 1, 2015. The system categorizes urgency into three categories including Institutional Exit, Immediate Need, and Defined Need. Reasonable pace goals have been established for each of these categories. The goal reports the number of individuals that have funding approved at a reasonable pace and those pending funding approval.

**TIMELINESS OF WAIVER FUNDING GOAL ONE:** Lead agencies will approve funding at a reasonable pace for persons: (A) exiting institutional settings; (B) with an immediate need; and (C) with a defined need for the Developmental Disabilities (DD) waiver.  

_Baseline:_ From January – December 2016, of the 1,500 individuals assessed, 707 individuals or 47% moved off the DD waiver waiting list at a reasonable pace. The percent by urgency of need category was: Institutional Exit (42%); Immediate Need (62%); and Defined Need (42%).

ANALYSIS OF DATA:
From January – March 2018, of the 389 individuals assessed for the Developmental Disabilities (DD) waiver, 272 individuals (70%) had funding approved within 45 days of the assessment date. In the previous quarter, of the 367 individuals assessed, 229 individuals (62%) had funding approved within 45 days of assessment. This quarter achieved the highest proportion of people being approved for funding within 45 days since the measure has been in place.
COMMENT ON PERFORMANCE:
Lead agencies receive monthly updates regarding the people who are still waiting for DD funding approval through a web-based system. Using this information, lead agencies can view the number of days a person has been waiting for DD funding approval and whether reasonable pace goals are met. If reasonable pace goals are not met for people in the Institutional Exit or Immediate Need categories, DHS directly contacts the lead agency and seeks remediation. DHS continues to allocate funding resources to lead agencies to support funding approval for people in the Institutional Exit and Immediate Need categories.

Lead agencies may encounter individuals pending funding approval on an intermittent basis, requiring DHS to engage with each agency to resolve individual situations. When these issues arise, a lead agency may be unfamiliar with the reasonable pace funding requirement due to the infrequency of this issue at their particular agency. DHS continues to provide training and technical assistance to lead agencies as pending funding approval issues occur and has added staff resources to monitor compliance with reasonable pace goals.

Not all persons who are assessed are included in the above tables. Only individuals who meet the criteria of one of the three urgency categories are included in the table. If an individual’s need for services changes, they may request a reassessment or information will be collected during a future assessment.

Below is a summary table with the number of people still waiting for funding approval at specific points of time. Also included is the average and median days waiting of those individuals who are still waiting for funding approval. The average days and median days information has been collected since December 1, 2015. This data does not include those individuals who had funding approved within the 45 days reasonable pace goal. The total number of people still waiting for funding approval as of July 1, 2018 (94) has decreased since October 1, 2017 (152).

*During the verification process in preparing this report, DHS identified a data discrepancy for this time period. DHS is working to resolve the issue and will report the updated data in the November 2018 Quarterly Report.

**TIMELINESS OF DATA:**

In order for this data to be reliable and valid, it is reported four months after the end of the reporting period.
IV. QUALITY OF LIFE MEASUREMENT RESULTS

NATIONAL CORE INDICATORS (NCI) SURVEY
The results for the 2016 NCI survey for individuals with intellectual and developmental disabilities will be reported in the November 2018 Quarterly Report.

QUALITY OF LIFE SURVEY
The Quality of Life Survey is designed to be a longitudinal survey, which means participants will be resurveyed in the future. The Quality of Life Baseline Survey was conducted between February and November 2017. At completion, 2,005 people, selected by random sample, participated in the survey. This survey was designed specifically for people with disabilities of all ages in all settings. In Minnesota, the survey was targeted to people who are authorized to receive state-paid services in potentially segregated settings. This survey sought to talk directly with individuals to get their own perceptions and opinions about what affects their quality of life.

The Olmstead Plan Quality of Life Survey Baseline Report was accepted by the Olmstead Subcabinet on March 26, 2018. Key baseline results were included in the May 2018 Quarterly Report and the full report was attached as an exhibit.

It is expected that subsequent Quality of Life Surveys will be conducted two or three times during the following three years to measure changes from the baseline. The next survey will be completed in December of 2018. Future surveys are subject to adequate funding.

The difference between the baseline survey and follow-up surveys will be used to better understand whether increased community integration and self-determination are occurring for people with disabilities receiving services in selected settings.

The first follow-up survey is currently underway. The 2018 Quality of Life Survey began in June 2018 and will continue throughout October 2018. The goal is to capture 500 completed surveys. The surveys will be analyzed and compared to the results from the baseline survey.

As of August 7, 2018, 21% of the 500 individuals have been interviewed or are scheduled for an interview. This includes the following activities:
- 750 calls made
- 347 guardians and/or individuals reached
- 105 consents received
- 71 interviews completed
- 33 interviews scheduled

Other key activities that have occurred to date include:
- Outreach to providers, guardians and individuals with disabilities to establish interviews;
- Interviews are currently being conducted;
- Regular meetings with Olmstead Implementation Office, DHS, DEED, Quality of Life Advisory Group and the Improve Group to monitor progress; and
- Development of research questions and analysis plan for the final report.

The Quality of Life Survey Results final report is expected to be presented to the Olmstead Subcabinet by December 31, 2018.
V. INCREASING SYSTEM CAPACITY AND OPTIONS FOR INTEGRATION

This section reports on the progress of measurable goals related to increasing capacity of the system and options for integration that are being reported in each quarterly report. The information for each goal includes the overall goal, annual goal, baseline, results for the reporting period, analysis of the data and a comment on performance and the universe number, when available. The universe number is the total number of individuals potentially impacted by the goal. This number provides context as it relates to the measure.

PERSON-CENTERED PLANNING GOAL ONE: By June 30, 2020, plans for people using disability home and community-based waiver services will meet protocols. Protocols are based on the principles of person-centered planning and informed choice. [Revised March 2018]

Baseline: In state fiscal year 2014, 38,550 people were served on the disability home and community-based services. From July 1, 2016 – June 30, 2017 there were 1,201 disability files reviewed during the Lead Agency Reviews. For the period from April – June 2017, in the 215 case files reviewed, the eight required criteria were present in the percentage of files shown below.

1. The support plan describes goals or skills that are related to the person’s preferences. (74%)
2. The support plan includes a global statement about the person’s dreams and aspirations. (17%)
3. Opportunities for choice in the person’s current environment are described. (79%)
4. The person’s current rituals and routines are described. (62%)
5. Social, leisure, or religious activities the person wants to participate in are described. (83%)
6. Action steps describing what needs to be done to assist the person in achieving his/her goals or skills are described. (70%)
7. The person’s preferred living setting is identified. (80%)
8. The person’s preferred work activities are identified. (71%)

RESULTS:
This goal is in process.

ANALYSIS OF DATA:
For the period from January – March 2018, in the 628 case files reviewed, the eight required criteria were present in the percentage of files shown above. Performance on all eight elements has improved over the 2017 baseline. Seven of the eight elements show consistent progress, and four of the eight are at 90% or greater this quarter.

*Agencies visited are sequenced in a specific order approved by Centers for Medicare and Medicaid Services (CMS).

**COMMENT ON PERFORMANCE:**

The Lead Agency Review team looks at twenty-five person-centered items for the disability waiver programs (Brain Injury (BI), Community Alternative Care (CAC), Community Alternatives for Disability Inclusion (CADI) and Developmental Disabilities (DD)). Of those twenty-five items, DHS selected eight items as being cornerstones of a person-centered plan.

\(^4\) The MN Prairie Alliance includes Dodge, Steele, and Waseca counties.

\(^5\) The SW Alliance includes Lincoln, Lyon, Murray, Pipestone, Redwood, and Rock counties.
In January 2018, Lead Agency Review began requiring lead agencies to remediate missing or non-compliant person-centered review protocols. When findings from case file review indicate files did not contain all required documentation, the agency is required to bring all cases into full compliance by obtaining or correcting the documentation. Corrective action plans will be required when patterns of non-compliance are evident. For the purposes of corrective action person-centered measures are grouped into two categories: development of a person-centered plan and support plan record keeping.

For the lead agencies reviewed during this time period, all three counties reviewed were required to develop corrective action plans in at least one category for at least one disability waiver program.

**UNIVERSE NUMBER:**
In Fiscal year 2017 (July 2016 – June 2017), 47,272 individuals received disability home and community-based services.

**TIMELINESS OF DATA:**
In order for this data to be reliable and valid, it will be reported three months after the end of the reporting period.

**POSITIVE SUPPORTS GOAL ONE:** By June 30, 2018, the number of individuals receiving services licensed under Minn. Statute 245D, or within the scope of Minn. Rule, Part 9544, (for example, home and community based services) who experience a restrictive procedure, such as the emergency use of manual restraint when the person poses an imminent risk of physical harm to themselves or others and it is the least restrictive intervention that would achieve safety, will decrease by 5% or 200.

2018 Goal
• By June 30, 2018, the number of people experiencing a restrictive procedure will be reduced by 5% from the previous year or 46 individuals

Annual Baseline: From July 2013 – June 2014 of the 35,668 people receiving services in licensed disability services, e.g., home and community based services, there were 8,602 BIRF reports of restrictive procedures, involving 1,076 unique individuals.

RESULTS:
The 2018 goal is in process.
ANALYSIS OF DATA:
From January – March 2018, the number of individuals who experienced a restrictive procedure was 267. This is an increase of 2 from the previous quarter. It’s important to note that the June 30, 2018 overall goal to reduce the number of people experiencing restrictive procedures by 200 has already been reached. The quarterly numbers are duplicated counts. Individuals may experience restrictive procedures during multiple quarters in a year. The quarterly numbers can be used as indicators of direction, but cannot be used to measure annual progress.

COMMENT ON PERFORMANCE:
There were 267 individuals who experienced a restrictive procedure this quarter:

• 239 individuals were subjected to Emergency Use of Manual Restraint (EUMR) only. Such EUMRs are permitted and not subject to phase out requirements like all other “restrictive” procedures. These reports are monitored and technical assistance is available when necessary.

• 28 individuals experienced restrictive procedures other than EUMRs (i.e., mechanical restraint, time out, seclusion, and other restrictive procedures). DHS staff and the External Program Review Committee (EPRC) provide follow up and technical assistance for all reports involving restrictive procedures other than EUMR. It is anticipated that focusing technical assistance with this subgroup will reduce the number of individuals experiencing restrictive procedures and the number of reports (see Positive Supports Goal Three).

Under the Positive Supports Rule, the EPRC convened in February 2017 has the duty to review and respond to Behavior Intervention Reporting Form (BIRF) reports involving EUMRs. Beginning in May 2017, the EPRC conducted outreach to providers in response to EUMR reports. It is anticipated the EPRC’s work will help to reduce the number of people who experience EUMRs through the guidance they provide to license holders regarding specific uses of EUMR. The purpose of EPRC engagement in these cases is to provide guidance to help reduce the frequency and/or duration of future emergency uses of manual restraint.

During this quarter, the EPRC offered technical assistance to the treatment teams of 17 individuals identified as having high-frequency use of EUMR as reported through BIRF reports.

UNIVERSE NUMBER:
In Fiscal Year 2017 (July 2016 – June 2017), 42,272 individuals received services in licensed disability services, e.g., home and community-based services.

TIMELINESS OF DATA:
In order for this data to be reliable and valid, it is reported three months after the end of the reporting period.
**POSITIVE SUPPORTS GOAL TWO:** By June 30, 2018, the number of Behavior Intervention Reporting Form (BIRF) reports of restrictive procedures for people receiving services licensed under Minn. Statute 245D, or within the scope of Minn. Rule, Part 9544, (for example, home and community based services) will decrease by 1,596.

**Annual Goals**
- By June 30, 2018, the number of reports of restrictive procedures will be reduced by **369**.

**Annual Baseline:** From July 2013 – June 2014 of the 35,668 people receiving services in licensed disability services, e.g., home and community based services, there were 8,602 BIRF reports of restrictive procedures, involving 1,076 unique individuals.

**RESULTS:**
The 2018 goal is **in process**.

<table>

</tr>
<tr>
<td>Quarter 3 (January – March 2018)</td>
<td>904</td>
<td>N/A – quarterly status of annual goal</td>
</tr>
</tbody>
</table>

**ANALYSIS OF DATA:**
From January – March 2018, the number of restrictive procedure reports was 904. This was a decrease of 51 from 955 during the previous quarter. It is important to note that the June 30, 2018 overall goal to reduce the number of reports people by 1,596 has already been reached.

**COMMENT ON PERFORMANCE:**
There were 904 reports of restrictive procedures this quarter. Although the overall number of people experiencing restrictive procedures continues to decrease, there are more instances of increased use with specific people. The biggest driver is the increase in emergency use of manual restraint; this is where engagement/intervention by the External Program Review Committee is increasing.

Of the 904 reports:
- **706 reports** were for emergency use of manual restraint (EUMR). Such EUMRs are permitted and not subject to phase out requirements like all other “restrictive” procedures. These reports are monitored and technical assistance is available when necessary.
  - Under the Positive Supports Rule, the External Program Review Committee has the duty to review and respond to BIRF reports involving EUMRs. Convened in February 2017, the Committee’s work will help to reduce the number of people who experience EUMRs through the guidance they provide to license holders regarding specific uses of EUMR.
  - Beginning in May 2017, the External Program Review Committee conducted outreach to providers in response to EUMR reports. The impact of this work toward reducing the number of EUMR reports will be tracked and monitored over the next several quarterly reports.
  - This quarter shows a decrease of 23 reports of EUMR from the previous quarter.
198 reports involved restrictive procedures other than EUMR (i.e., mechanical restraint, time out, seclusion, and other restrictive procedures). DHS has monitoring and outreach functions in place to identify and engage with providers. The close monitoring and engagement by the EPRC with the approved cases of emergency use of procedures enables DHS to help providers work through some of the most difficult cases of ongoing use of mechanical restraints. DHS staff provide follow up and technical assistance for all reports involving restrictive procedures that are not implemented according to requirements under 245D or the Positive Supports Rule. The External Program Review Committee provides ongoing monitoring over restrictive procedures being used by providers with persons under the committee’s purview. Focusing existing capacity for technical assistance primarily on reports involving these restrictive procedures is expected to reduce the number of people experiencing these procedures, as well as reduce the number of reports seen here and under Positive Supports Goal Three.
  - There was a decrease of 28 non-EUMR restrictive procedure reports from the previous quarter.

40 uses of seclusion involving 10 people were reported this quarter:
  - 19 uses involving 5 people occurred at Minnesota Security Hospital, in accordance with the Positive Supports Rule (i.e., not implemented as a substitute for adequate staffing, for a behavioral or therapeutic program to reduce or eliminate behavior, as punishment, or for staff convenience).
  - 17 uses involving 1 person occurred as part of an approved Positive Support Transition Plan during the 11-month phase out period.
  - 1 use involved an individual at the Minnesota Sex Offender Program
  - 3 reports involving 3 different people were inaccurately coded and did not involve the use of seclusion by a DHS license holder.

UNIVERSE NUMBER:
In Fiscal Year 2017 (July 2016 – June 2017), 42,272 individuals received services in licensed disability services, e.g., home and community-based services.

TIMELINESS OF DATA:
In order for this data to be reliable and valid, it is reported three months after the end of the reporting period.

POSITIVE SUPPORTS GOAL THREE: Use of mechanical restraint is prohibited in services licensed under Minn. Statute 245D, or within the scope of Minn. Rule, Part 9544*vi, with limited exceptions to protect the person from imminent risk of serious injury. (Examples of a limited exception include the use of a helmet for protection of self-injurious behavior and safety clips for safe vehicle transport).
  - By December 31, 2019, the emergency use of mechanical restraints will be reduced to (A) < 93 reports and (B) < 7 individuals.

2018 Goal
  - By June 30, 2018, reduce mechanical restraints to no more than
    (A) 185 reports of mechanical restraint
    (B) 13 individuals approved for emergency use of mechanical restraint
Baseline: From July 2013 - June 2014, there were 2,038 BIRF reports of mechanical restraints involving 85 unique individuals.

RESULTS:
(A) The goal is not on track to meet the 2018 goal to reduce to 185 reports.
(B) The goal is on track to meet the 2018 goal to reduce to no more than 13 individuals.

<table>
<thead>
<tr>
<th>Time period</th>
<th>(A) Number of reports during the time period</th>
<th>(B) Number of individuals at end of time period</th>
</tr>

<td>167</td>
<td>13</td>
</tr>
<tr>
<td>Quarter 3 (January – March 2018)</td>
<td>158</td>
<td>13</td>
</tr>
</tbody>
</table>

ANALYSIS OF DATA:
This goal has two measures.

- From January to March 2018, the number of reports of mechanical restraints was 158. This is a decrease of 9 from 167 in Quarter 2. This is not on track to meet the annual goal to reduce to 185.
- At the end of the reporting period (March 2018), the number of individuals for whom the emergency use of mechanical restraint was approved was 13. This remains unchanged from the previous quarter, and is on track to meet the 2018 goal of 13.

COMMENT ON PERFORMANCE:
Under the requirements of the Positive Supports Rule, in situations where mechanical restraints have been part of an approved Positive Support Transition Plan to protect a person from imminent risk of serious injury due to self-injurious behavior and the use of mechanical restraints has not been successfully phased out within 11 months, a provider must submit a request for the emergency use of these procedures to continue their use.

These requests are reviewed by the External Program Review Committee (EPRC) to determine whether or not they meet the stringent criteria for continued use of mechanical restraints. The EPRC consists of members with knowledge and expertise in the use of positive supports strategies. The EPRC sends its recommendations to the DHS Commissioner’s delegate for final review and either time-limited approval or rejection of the request. With all approvals by the Commissioner, the EPRC includes a written list of person-specific recommendations to assist the provider to reduce the need for use of mechanical restraints. In situations where the EPRC believes a license holder needs more intensive technical assistance, phone and/or in-person consultation is provided by panel members. Prior to February 2017, the duties of the ERPC were conducted by the Interim Review Panel.

Of the 158 BIRFs reporting use of mechanical restraint in Quarter 3:
- 127 reports involved 11 of the 13 people with review by the EPRC and approval by the Commissioner for the emergency use of mechanical restraints during the reporting quarter.
  - This is a decrease of 16 reports from Quarter 2.
For 2 people approved for emergency use reported, there were no uses of mechanical restraint during this quarter.

- There were 2 reports of unapproved use of mechanical restraints this quarter. Technical assistance was provided by DHS in both cases.
- 28 reports, involving 4 people, were submitted by Minnesota Security Hospital for uses of mechanical restraint that were not implemented as a substitute for adequate staffing, for a behavioral or therapeutic program to reduce or eliminate behavior, as punishment, or for staff convenience.
- 1 report involving 1 person was submitted by a provider whose use was within the 11-month phase out period.

**TIMELINESS OF DATA:**
In order for this data to be reliable and valid, it is reported three months after the end of the reporting period.

**CRISIS SERVICES GOAL THREE:** By June 30, 2017, the number of people who discontinue waiver services after a crisis will decrease to 45 or fewer. (Leaving the waiver after a crisis indicates that they left community services, and are likely in a more segregated setting.)

**Baseline:** State Fiscal Year 2014 baseline of 62 people who discontinued waiver services (3% of the people who received crisis services through a waiver).

**RESULTS:**
The 2017 overall goal was reported in the February 2018 Quarterly Report. The status of the goal will continue to be reported.

<table>
<thead>
<tr>
<th>Time period</th>
<th>Number of people who discontinued disability waiver services after a crisis</th>
</tr>
</thead>
<tbody>
<tr>
<td>2015 Annual (July 2014 – June 2015)</td>
<td>54 (unduplicated)</td>
</tr>
<tr>
<td>2016 Annual (July 2015 – June 2016)</td>
<td>71 (unduplicated)</td>
</tr>
<tr>
<td>2017 Annual (July 2016 – June 2017)</td>
<td>62 (unduplicated)</td>
</tr>
<tr>
<td>Quarter 1 (July – September 2017)</td>
<td>17 (duplicated)</td>
</tr>
<tr>
<td>Quarter 2 (October – December 2017)</td>
<td>17 (duplicated)</td>
</tr>
</tbody>
</table>

**ANALYSIS OF DATA:**
From October – December 2017, the number of people who discontinued disability waiver services after a crisis was 17. The quarterly numbers are duplicated counts. People may discontinue and resume disability waiver services after a crisis in multiple quarters in a year. The quarterly numbers can be used as indicators of direction, but cannot be used to measure annual progress.

**COMMENT ON PERFORMANCE:**
Given the small number of people identified in any given quarter as part of this measure, as of March 2017, DHS staff is conducting person-specific research to determine the circumstances and outcome of each identified waiver exit. This will enable DHS to better understand the reasons why people are exiting the waiver within 60 days of receiving a service related to a behavioral crisis and target efforts where needed most to achieve this goal.
Of the 17 people who discontinued waiver services because of a behavior crisis in Quarter 2:

- 13 people have since reopened to waiver services
- 2 people and/or their guardian have chosen to receive services in an ICF/DD.
- 1 person exited the nursing facility, returned to a housing facility in the community, and declined a health risk assessment and therefore did not reopen waiver services.
- 1 person planned to return to the community and had been screened for relocation assistance but passed away while still in the nursing facility.

TIMELINESS OF DATA:
In order for this data to be reliable and valid, it is reported seven months after the end of the reporting period.
SEMI-ANNUAL AND ANNUAL GOALS

This section includes reports on the progress of measurable goals related to increasing capacity of the system and options for integration that are being reported semi-annually or annually. Each specific goal includes: the overall goal, the annual goal, baseline, results for the reporting period, analysis of the data and a comment on performance.

EMPLOYMENT GOAL THREE: By June 30, 2020, the number of students with developmental cognitive disabilities, ages 19-21 that enter into competitive, integrated employment will be 763.

2018 Goal
- By June 30, 2018, the number of additional students with Developmental Cognitive Disabilities (DCD) in competitive, integrated employment will be 150.

Baseline: 2014 group total in competitive, integrated employment = 313 (35%) (N=894)
2017 group total in competitive, integrated employment = 450 (50%) (N=900)

RESULTS:
The 2018 goal of 150 was met.

<table>
<thead>
<tr>
<th>Time Period</th>
<th>Number of students with DCD, ages 19-21 that enter into competitive, integrated employment</th>
</tr>
</thead>
<tbody>
<tr>
<td>October 2015 to June 2016</td>
<td>137</td>
</tr>
<tr>
<td>October 2016 to June 2017</td>
<td>192</td>
</tr>
<tr>
<td>October 2017 to June 2018</td>
<td>179</td>
</tr>
</tbody>
</table>

ANALYSIS OF DATA:
During the 2017 - 2018 school year, 179 students with developmental cognitive disabilities (101 males and 78 females), ranging in ages from 19-21 participated in competitive, integrated employment. The 2018 goal of 150 was met.

All students worked part-time vs. full-time as their primary job was that of being a secondary student. Students were employed in a variety of businesses with wages ranging from $9.50 an hour to $14.00 an hour. Students received a variety of supports including: employment skills training, job coaching, interviewing skill development, assistive technology, job placement and the provision of bus cards.

COMMENT ON PERFORMANCE:
Twenty school districts provided supports to students through the Employment Capacity Building Cohort (ECBC) during the 2017-2018 school year. The ECBC teams surpassed the competitive, integrated employment goal by 29 students because they used multiple strategies learned during the ECBC training sessions. Impactful team activities included: information sessions on Workforce Innovation and Opportunity Act (WIOA) and limitations on the use of subminimum wages; Pre-Employment Transition Services; DB101 estimator sessions; utilization of the Informed Choice Conversation and Informed Choice Toolkit materials; piloting a new customized Minnesota Career Information System (MCIS) for students with disabilities; conducting individual career interest and learning style inventories; and learning about essential job development strategies.
The local ECBC teams are ensuring that students with developmental cognitive disabilities, ages 19-21 have choices and opportunities for competitive, meaningful, and sustained employment in the most integrated setting before exiting from secondary education. All of the 2017-2018 ECBC teams have expressed interest in continuing in the cohort model. In addition, two additional district teams will be invited to the ECBC for the 2018-2019 school years.

TIMELINESS OF DATA:
In order for this data to be reliable and valid, it is reported three months after the end of the reporting period.

EDUCATION GOAL THREE: By June 30, 2020, 96% of students with disabilities in 31 target school districts will have active consideration of assistive technology (AT) during the student’s annual individualized education program (IEP) team meeting. The framework to measure active consideration will be based upon the “Special factors” requirement as described in Individuals with Disabilities Education Act (IDEA) of 2004. [Revised March 2018]

2018 Goal
• By June 30, 2018, the percent of students who have active consideration of assistive technology during the annual IEP team meeting will increase to 94%.

Baseline: From October – December 2016, of the 28 students with IEPs, 26 (92.8%) had active consideration of assistive technology during their annual IEP team meeting.

RESULTS:
The 2018 goal to increase to 94% was met.

<table>
<thead>
<tr>
<th>Time period</th>
<th>Number of student IEP team meetings</th>
<th>Number with active consideration of AT</th>
<th>Percent with active consideration</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td>January – June 2017</td>
<td>80</td>
<td>77</td>
<td>96.3%</td>
</tr>
<tr>
<td>July 2017 – June 2018</td>
<td>274</td>
<td>260</td>
<td>94.9%</td>
</tr>
</tbody>
</table>

ANALYSIS OF DATA:
During the 2017-2018 school year, Assistive Technology Teams Project (ATTP) members in 21 school districts completed a total of 274 Assistive Technology (AT) Consideration Surveys with all district teams responding. Almost ninety-five percent (94.9%) of the completed surveys reported that the IEP teams met the criteria for active consideration of AT during the IEP meeting. The 2018 annual goal of 94% was met. During the 2017-2018 school year, there were 38,547 students with IEPs in the 21 school districts.

Active consideration is defined as IEP team consideration of at least one element of the Student, Environments, Tasks and Tools (SETT) Framework as measured by the AT Consideration Survey. For the 5.1% in which the criteria for active consideration were not met, ATTP team members reported that teams considered the student, environment, task(s), and/or tool(s) of the SETT Framework but not specifically in the context of AT. This is the first full school year that specific data was collected regarding active consideration including student factors, environment(s), task(s) and tool(s) in the SETT Framework.
COMMENT ON PERFORMANCE:
To support the implementation of the SETT Framework, MDE offers the AT Teams Project (ATTP), an intensive, three-year project to support schools and districts to meet their AT needs through a cohort design that includes professional development. For the 2018-19 school year, 14 districts will continue into the second and third year ATTP training cohorts, and 11 new districts will begin the first year cohort. All regions in Minnesota are represented within the 2018-19 cohort. Based on statewide scale-up of the ATTP, MDE expects a larger number of sampled IEP meetings, for a larger number of students with disabilities, while improving the percentage of those IEP meetings in which criteria are met for active consideration of AT. MDE looks forward to sharing additional data under the new annual goal set for June 30, 2019.

TIMELINESS OF DATA:
In order for this data to be reliable and valid, it is reported two months after the end of the reporting period.

CRISIS SERVICES GOAL ONE: By June 30, 2018, the percent of children who receive children’s mental health crisis services and remain in their community will increase to 85% or more.

2018 Goal
• By June 30, 2018, the percent who remain in their community after a crisis will increase to 85%

Baseline: In State Fiscal Year 2014 of 3,793 episodes, the child remained in their community 79% of the time.

RESULTS:
The 2018 goal is not on track to meet the goal to increase to 85%.

<table>

• Community = emergency foster care, remained in current residence (foster care, self or family), remained in school, temporary residence with relatives/friends.
• Treatment = chemical health residential treatment, emergency department, inpatient psychiatric unit, residential crisis stabilization, residential treatment (Children’s Residential Treatment).
• Other = children’s shelter placement, domestic abuse shelter, homeless shelter, jail or corrections, other.

ANALYSIS OF DATA:
For the semi-annual reporting period of July – December 2017, of the 1,176 crisis episodes, the child remained in their community after the crisis 841 times or 71.5% of the time. This is below the baseline
and is 8.4% decrease from the 2017 annual goal performance of 79.9%. The goal is not on track to meet the 2018 goal of 85%.

**COMMENT ON PERFORMANCE:**
There has been an overall increase in the number of episodes of children receiving mental health crisis services, with likely more children being seen by crisis teams. In particular the number of children receiving treatment services after their mental health crisis has increased by more than 30% since baseline and by almost 50% since December of 2016. While children remaining in the community after crisis is preferred, it is important for children to receive the level of care necessary to meet their needs at the time. DHS will continue to work with mobile crisis teams to identify training opportunities for serving children in crisis, and to support the teams as they continue to support more children with complex conditions and living situations.

When children are served by mobile crisis teams, they are provided a mental health crisis assessment in the community and receive further help based on their mental health need. Once risk is assessed and a crisis intervention is completed, a short term crisis plan is developed to assist the individual to remain in the community, if appropriate.

Mobile crisis teams focus on minimizing disruption in the life of a child during a crisis. This is done by utilizing a child’s natural supports the child already has in their home or community whenever possible. It is important for the child to receive the most appropriate level of care. Sometimes that can be in the community and sometimes that may be a higher level of care. A higher level of care should not necessarily be perceived as negative if it is the appropriate level of care. There is no way to predict who will need which level of care at any given time or why. Having an assessment from the mobile crisis team will increase the likelihood that the person has the opportunity to be assessed and have a plan developed that will help them stay in the least restrictive setting possible when appropriate.

DHS has worked with mobile crisis teams to identify training opportunities that would help increase their capacity to address the complexities they are seeing and has committed to providing trainings in identified areas specific to crisis response. This increases the teams’ ability to work with individuals with complex conditions/situations effectively. DHS will continue to work with providers to explore trends that might be contributing to children presenting in crisis with the need for a higher level of care.

**TIMELINESS OF DATA:**
In order for this data to be reliable and valid, it is reported six months after the end of the reporting period.
CRISIS SERVICES GOAL TWO: By June 30, 2019, the percent of adults who receive adult mental health crisis services and remain in their community (e.g., home or other setting) will increase to 64% or more.

2018 Goal
• By June 30, 2018, the percent who remain in their community after a crisis will increase to 62%

Baseline: From January to June 2016, of the 5,206 episodes, for persons over 18 years, the person remained in their community 3,008 times or 57.8% of the time.

RESULTS:
The 2018 goal is **not on track** to meet the goal to increase to 62%.

• Community = remained in current residence (foster care, self or family), temporary residence with relatives/friends.
• Treatment = chemical health residential treatment, emergency department, inpatient psychiatric unit, residential crisis stabilization, intensive residential treatment (IRTS)
• Other = homeless shelter, jail or corrections, other.

ANALYSIS OF DATA:
For the semi-annual reporting period of July – December 2017, of the 5,498 crisis episodes, the adult remained in their community after the crisis 2,874 times or 52.3% of the time. This is below the baseline and is a 1.7% decrease from the 2017 annual goal performance of 54.0%. The goal is not on track to meet the 2018 goal of 62%.

COMMENT ON PERFORMANCE:
When individuals are served by mobile crisis teams, they are provided a mental health crisis assessment in the community and receive further help based on their mental health need. Once risk is assessed and a crisis intervention is completed, a short term crisis plan is developed to assist the individual to remain in the community, if appropriate.

Mobile crisis teams focus on minimizing disruption in the life of an adult during a crisis by utilizing the natural supports an individual already has in their home or community for support whenever possible. It is important for individuals to receive the most appropriate level of care. Sometimes that can be in the community and sometimes that may be a higher level of care. A higher level of care should not necessarily be perceived as negative if it is the appropriate level of care. There is no way to predict who will need which level of care at any given time or why. Having an assessment from the mobile crisis team will increase the likelihood that the person has the opportunity to be assessed and have a plan developed that will help them stay in the least restrictive setting possible when appropriate. DHS has worked with mobile crisis teams to identify training opportunities that would help increase their
capacity to address the complexities they are seeing and has committed to providing trainings in identified areas specific to crisis response. This increases the teams’ ability to work with more complex clients/situations effectively.

DHS will continue to work with providers to ensure timely and accurate reporting and explore trends that might be contributing to individuals presenting in crisis with the need for a higher level of care. DHS will also continue to work with mobile crisis teams in order to identify training opportunities and provide support most needed for serving people in crisis.

**TIMELINESS OF DATA:**
In order for this data to be reliable and valid, it is reported six months after the end of the reporting period.

**COMMUNITY ENGAGEMENT GOAL ONE:** By June 30, 2020, the number of individuals with disabilities who participate in Governor appointed Boards and Commissions, the Community Engagement Workgroup, Specialty Committee and other Workgroups and Committees established by the Olmstead Subcabinet will increase to 245 members. [Revised March 2018]

**2018 Goal**
- By June 30, 2018, the number of individuals with disabilities participating in Governor’s appointed Boards and Commissions, Community Engagement Workgroup, Specialty Committee, and other Workgroups and Specialty Committees established by the Olmstead Subcabinet will increase to 184.

**Baseline:** Of the 3,070 members listed on the Secretary of State’s Boards and Commissions website, 159 members (5%) self-identified as an individual with a disability. In 2017, the Community Engagement Workgroup and the Specialty Committee had 16 members with disabilities.

**RESULTS:**
The 2018 goal of 184 was met.

<table>
<thead>
<tr>
<th>Time Period</th>
<th>Number of individuals on Boards and Commissions with a disability</th>
<th>Number of individuals on Olmstead Subcabinet workgroups with a disability</th>
<th>Total number</th>
</tr>
</thead>
<tbody>
<tr>
<td>June 30, 2017 (Baseline)</td>
<td>159</td>
<td>16</td>
<td>175</td>
</tr>
<tr>
<td>As of July 31, 2018</td>
<td>171</td>
<td>26</td>
<td>197</td>
</tr>
</tbody>
</table>

**ANALYSIS OF DATA:**
Of the 3,240 members listed on the Secretary of State’s Boards and Commissions website, 171 members (approximately 5%) self-identify as an individual with a disability. In addition, 26 individuals on Olmstead Subcabinet workgroups (Community Engagement Workgroup and Preventing Abuse and Neglect Specialty Committee) self-identified as individuals with a disability. The 2018 goal to increase the number to 184 was met. While, the number of individuals on Boards and Commissions with a disability increased, the percentage of members with disabilities remained the same (at 5 percent).

The number of individuals may contain duplicates if a member participated in more than one group throughout the year. There may also be duplicates from year to year if an individual was a member of a group during the previous year and the current year.
COMMENT ON PERFORMANCE:
The Minnesota Department of Human Rights, the Olmstead Implementation Office (OIO) and the Governor’s Office collaborated to engage in outreach and recruitment efforts in both the Metro area and Greater Minnesota. A project was initiated which included two types of sessions. The first included a series of five informational sessions held throughout the state with people of color and individuals with disabilities. The purpose was to help participants learn more about serving on Governor-appointed Boards and Councils and the process for applying for and receiving an appointment. The second type of session was a facilitated training session for members of Governor’s appointed Boards and Commissions on strategies for creating more accessible and inclusive Boards and Councils.

The outcome of these efforts produced very small numbers of individuals with disabilities who attended the events and who subsequently applied for positions with Boards and Commissions. The number of individuals with disabilities appointed was extremely small. The collaborators agreed that new measures will be taken to strategically outreach and recruit people with disabilities. A revamped effort with regional forums will take place in October 2018. The planning session is currently underway for new series of targeted outreach activities. The events will obtain evaluation results and data will be analyzed for impact.

TIMELINESS OF DATA:
In order for this data to be reliable and valid, it is reported one month after the end of the reporting period. Data is accessed through the Secretary of State’s website.

COMMUNITY ENGAGEMENT GOAL TWO: By June 30, 2020, the number of individuals with disabilities involved in planning publicly funded projects identified through bonding bills will increase by 5% over baseline. [Adopted March 2018]

2018 Goal to increase the number of individuals involved in planning publicly funded projects:
• By April 30, 2018, establish a baseline and annual goals

RESULTS:
The 2018 goal to establish a baseline was not met.

COMMENT ON PERFORMANCE:
To achieve this goal of establishing a baseline and annual goals, the Olmstead Implementation Office (OIO) reviewed the 2017 bonding bills that were approved through legislation. It was determined that the OIO would select one bonding bill to analyze and learn more about tracking the impact of the law and any engagement with people with disabilities. With this information, a baseline and annual goals would be established.

OIO identified the “accommodation for hard of hearing in state-funded capital projects” as the focus for this task. This law went into effect in January 2018.

After researching the project and meeting with a variety of experts in the area, OIO concluded that it is not possible to establish a baseline or maintain consistency with a tracking system. The findings to support this decision include:
• The law requires that commissioners or agency heads may only approve a contract for publicly funded capital improvement when it meets the conditions for accommodating hard of hearing.
There is no requirement for this project or any bonding project to engage with people with disabilities or to track such engagement efforts.

Because there is no requirement to track the engagement of individuals with disabilities in this process, there is no reliable or valid data available.

OIO will propose a new goal that focuses on engagement efforts with people with disabilities and the impact of those efforts. The new proposed goals and strategies are expected to be presented to the Subcabinet in December 2018.

**PREVENTING ABUSE AND NEGLECT GOAL TWO:** By January 31, 2020, the number of emergency room (ER) visits and hospitalizations of vulnerable individuals due to abuse and neglect will decrease by 50% compared to baseline. [Revised March 2018]

**2018 GOAL:**

- By January 31, 2018, the number of emergency room visits and hospitalizations due to abuse and neglect will be reduced by 10% compared to baseline.

**Baseline:** From 2010-2014, there were a total of 199 hospital treatments that reflect abuse and/or neglect to a vulnerable individual. The calculated annual baseline is 40 (199/5 years = 40).

**RESULTS:**
The 2018 goal was not met (due to unreliable data).

**COMMENT ON PERFORMANCE:**
The strategy targeted in this measurable goal was to utilize data from the Minnesota hospitals to identify vulnerable individuals who had been the victim of abuse and neglect. This data would be used to identify patterns and geographic locations for targeted prevention strategies.

The Minnesota Department of Health (MDH) identified the codes used to identify cases of abuse or neglect associated with treatment provided by the hospitals. After analysis of the data, it was determined that this data source would not be valid or reliable for this purpose.

MDH is proposing a collaboration with DHS to determine which databases they maintain that could be used as a data source. The data would be utilized by MDH epidemiologists to identify patterns of abuse and neglect and geographic locations for targeted prevention strategies.

A new measurable goal, associated strategies, and a baseline will be proposed at the December, 2018 Subcabinet meeting. The intent is to describe trends across person, place and time and thus offer Minnesota a public health surveillance indicator.
PROPOSED ANNUAL GOALS

Transportation Goal Five was adopted in the March 2018 Revised Olmstead Plan provides that by April 30, 2018, annual goals will be established. The proposed baseline below is being presented to the Subcabinet for review at the August 27, 2018 meeting. If approved, the baseline will be incorporated into the August 2018 Quarterly Report.

TRANSPORTATION GOAL FIVE: By 2040, 100% percent of the target population will be served by regular route level of service for prescribed market areas 1, 2, and 3 in the seven county metropolitan area. [Adopted March 2018]

2018 Goal to increase the number of individuals involved in planning publicly funded projects:
• By April 30, 2018, annual goals will be established

Baseline: The percentage of target population served by regular route level of service for each market area is as follows: Market Area 1 = 95%; Market Area 2 = 91%; and Market Area 3 = 67%.

<table>
<thead>
<tr>
<th>Time Period</th>
<th>Market Area 1</th>
<th>Market Area 2</th>
<th>Market Area 3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Baseline – June 2017</td>
<td>95%</td>
<td>91%</td>
<td>67%</td>
</tr>
</tbody>
</table>

RESULTS:
The 2018 goal to establish annual goals was met. [PENDING APPROVAL]

Proposed Annual Goal:
• By 2025, the percentage of target population served by regular route level of service for each market area will be:
  o Market Area 1 will be 100%
  o Market Area 2 will be 95%
  o Market Area 3 will be 70%

The percentage for each market area will be reported on an annual basis to determine if progress is being made toward the goals.

COMMENT ON PERFORMANCE:
Metro Area Public Transit utilization is measured by distinct market areas for regular route level of service. This measure estimates demand potential for all users of the regular route system. The market area is created based on analysis that shows the demand for regular route service is driven primarily by population density, automobile availability, employment density and intersection density (walkable distance to transit). This measure is based on industry standards incorporated into the Transportation Policy Plan’s - Regional Transit Design Guidelines and Performance Standards. The Metro Area also provides non-regular route services in areas that are not suitable for regular routes, such as dial-a-ride transit. Policy Plan Guidelines/Standards https://metrocouncil.org/METC/files/63/6347e827-e9ce-4c44-adff-a6afd8b48106.pdf

TIMELINESS OF DATA:
Data will be collected in January of each year. In order for this data to be reliable and valid, it will be reported four months after the end of the reporting period.
VI. COMPLIANCE REPORT ON WORKPLANS AND MID-YEAR REVIEWS

This section summarizes the monthly review of workplan activities and review of measurable goals completed by OIO Compliance staff.

WORKPLAN ACTIVITIES

OIO Compliance staff reviews workplan activities on a monthly basis to determine if items are completed, on track or delayed. Any delayed items are reported to the Subcabinet as exceptions. The Olmstead Subcabinet reviews and approves workplan implementation, including workplan adjustments on an ongoing basis.

The first review of workplan activities occurred in December 2015. Ongoing monthly reviews began in January 2016 and include activities with deadlines through the month prior and any activities previously reported as an exception.

The summary of those reviews are below.

MID-YEAR REVIEW OF MEASURABLE GOALS REPORTED ON ANNUALLY

OIO Compliance staff engages in regular and ongoing monitoring of measurable goals to track progress, verify accuracy, completeness and timeliness of data, and identify risk areas. These reviews were previously contained within a prescribed mid-year review process. OIO Compliance staff found it to be more accurate and timely to combine the review of the measurable goals with the monthly monitoring process related to action items contained in the workplans. Workplan items are the action steps that the agencies agree to take to support the Olmstead Plan strategies and measurable goals.

OIO Compliance staff regularly monitors agency progress under the workplans and uses that review as an opportunity to identify any concerns related to progress on the measurable goals. OIO Compliance staff report on any concerns identified through the reviews to the Subcabinet. The Subcabinet approves any corrective action as needed. If a measurable goal is reflecting insufficient progress, the quarterly report identifies the concerns and how the agency intends to rectify the issues. This process has evolved and mid-year reviews are utilized when necessary, but the current review process is a more efficient mechanism for OIO Compliance staff to monitor ongoing progress under the measurable goals.
ENDNOTES

i Reports are also filed with the Court in accordance with Court Orders. Timelines to file reports with the Court are set out in the Court’s Orders dated February 12, 2016 (Doc. 540-2) and June 21, 2016 (Doc. 578). The annual goals included in this report are those goals for which data is reliable and valid in order to ensure the overall report is complete, accurate, timely and verifiable. See Doc. 578.

ii Some Olmstead Plan goals have multiple subparts or components that are measured and evaluated separately. Each subpart or component is treated as a measurable goal in this report.

iii This goal measures the number of people exiting institutional and other segregated settings. Some of these individuals may be accessing integrated housing options also reported under Housing Goal One.

iv Transfers refer to individuals exiting segregated settings who are not going to an integrated setting. Examples include transfers to chemical dependency programs, mental health treatment programs such as Intensive Residential Treatment Settings, nursing homes, ICFs/DD, hospitals, jails, or other similar settings. These settings are not the person’s home, but a temporary setting usually for the purpose of treatment.

v As measured by monthly percentage of total bed days that are non-acute. Information about the percent of patients not needing hospital level of care is available upon request.

vi As of the May 2018 Quarterly Report The terminology changed from “Restore to Competency” to “Committed after Finding of Incompetency.” The change clarifies the status of the individual when they enter the program that works on competency (Rule 20). The population being measured in this goal did not change.

vii Minnesota Security Hospital is governed by the Positive Supports Rule when serving people with a developmental disability.

viii All approved adjustments to workplans are reflected in the Subcabinet meeting minutes, posted on the website, and will be utilized in the workplan review and adjustment process.

</tbody>
</table>

At the July 23, 2018 Subcabinet meeting, members of the working group presented their prioritized recommendations for strategies and activities to recruit, train and retain workers to better meet Minnesota’s Direct Care/Support Workforce needs.

Activity PC 4B.2 calls for DEED and DHS to develop an implementation plan and workplan based upon the recommendations presented at the July 23, 2018 meeting. The current deadline for this activity is September 30, 2018. This time frame does not provide sufficient time to complete this collaborative work across the agencies. DHS and DEED are requesting an adjustment to the deadline for this activity.

OVERVIEW
TRIO Student Support Services serve students at accredited institutions of higher education by assisting eligible students in beginning and completing a postsecondary education. TRIO programs provide comprehensive academic support, integrated learning courses, learning communities, academic English enhancement and leadership development for low to moderate income, first generation college students and students with disabilities.

During the 2017-2018 school year, TRIO Student Support Services programs at Normandale Community College, North Hennepin Community College and Bemidji State University conducted outreach activities. Outreach activities included a presentation to staff on the Minnesota Olmstead Plan, Education Goal Two and the strategy to increase postsecondary enrollment of recent high school graduates, specifically Black and American Indian students with disabilities. Normandale Community College and North Hennepin Community College participated in the outreach activities. Additional attempts were initiated with Bemidji State University. Each site received 40 copies of the Minnesota Postsecondary Resource Guide:
Successfully Preparing Students with Disabilities for the Postsecondary Environment\(^1\) to disseminate to students with disabilities within their TRIO program. MDE will disseminate the resource guide to two additional sites, Hennepin Technical College and Minneapolis Community and Technical College, during the 2018-2019 school year.

**REPORT**

This report includes the results of three outreach activities: dissemination of the Postsecondary Resource Guide; learning sessions; and online training module access.

- **Minnesota Postsecondary Resource Guide Dissemination**
  The Minnesota Postsecondary Resource Guide was disseminated as follows:
  - 40 copies were disseminated to North Hennepin Community College
  - 40 copies were disseminated to Normandale Community College
  - 768 copies were disseminated to schools in Anoka, St Paul and the Metropolitan Educational Cooperative Service Unit during the 2017-2018 school year.

- **Onsite Learning Sessions**
  During a career-planning class on February 21, 2018, a group of 15 students from the TRIO Program at North Hennepin Community College reviewed the Minnesota Postsecondary Resource Guide. They felt that the overall content was helpful and should be shared more at the high school level vs. the postsecondary level. The areas found most helpful were:
  - Learning strategies to prepare for postsecondary education (pages 9 – 13)
  - Entrance requirements and ways to pay for college (pages 14 -17)
  - Essential components of college disability documentation (page 24)
  - Reasonable accommodations that may be available in college (25 – 29)
  - Minnesota Career Fields, Clusters and Pathways information (42 – 43)

- **Online Training Module Access**
  Learning sessions also include online postsecondary training modules training modules which are available at http://www.normandale.edu/osdresources. The table below provides the direct link to the module and includes the number of online views in 2017-2018.

OVERVIEW

OIO will implement the Quality of Life Follow-up Survey as part of the longitudinal study to assess and track the quality of life for residents with disability. Quality of life will be measured through a field test survey instrumentation developed by the Center for Outcome Analysis tailored to meet the Minnesota Olmstead Plan’s requirements.

The Quality of Life instrument measures changes in quality of life as people with disabilities choose to move to more integrated settings. The survey will be used to measure changes in the lives of people with disabilities over time. The Quality of Life Baseline Survey was conducted in 2017-2018. The follow-up survey will assess a smaller group from the baseline data to indicate whether increased community integration and self-determination are occurring for people with disabilities.

Olmstead Subcabinet Meeting Agenda Item
August 27, 2018

Agenda Item:

(7b) Informational Items and reports- Follow up from June 25, 2018 meeting

Presenter:

Erin Sullivan Sutton (DHS)

Action Needed:

☐ Approval Needed
☒ Informational Item (no action needed)

Summary of Item:

This report includes response to a question raised at the June Subcabinet Meeting regarding an Employment workplan activity. This is informational only.

Attachment(s):

7b- Follow up from previous Subcabinet meeting - June Subcabinet Meeting – Employment workplan activity 6A2
Olmstead Subcabinet Meeting Agenda Item
Follow-up from Previous Subcabinet Meeting

Date of Subcabinet Meeting: June 25, 2018
Agenda Item: 7a1 – Workplan Report – Employment 6A.2a – Status of recommendations to implement home and community-based services rule to support competitive integrated employment (DHS)

1- Question asked at meeting

Roberta Opheim (OMHDD) asked a question about the report on workplan activity EM 6A.2a. She asked if there would be sufficient capacity of day training and habilitation centers for individuals who do not choose competitive integrated employment. Ryan Merz (DHS) stated work with stakeholders would be important to determine the needed capacity. The goal is to make day training and habilitation centers geared towards community inclusion and prevocational services.

Roberta Opheim asked if DHS Licensing will regulate, monitor and assess whether or not people are getting services required under the waiver status.

Agency Response

DHS licensing division will license to the standards in 245D.07, subdivision 1, which reads: The license holder must provide services as assigned in the coordinated service and support plan. The provision of services must comply with the requirements of this chapter and the federal waiver plans. This means that DHS Licensing Division will monitor/regulate/assess to make sure that services are being provided in accordance with the federal waiver plan for the service that is authorized as well as in accordance with the person’s Coordinated Service and Support Plan (CSSP) developed by the case manager.

To specifically monitor compliance with the HCBS rule requirements, DHS plans to use the following strategies:

Licensure: Setting requirements for the CMS rule are or will be included in state licensing standards (i.e., home and community-based service license, residential and day service setting licenses, foster care license, home care license) to allow licensors to assure ongoing compliance for individual settings. We will use the results from each year of licensing reviews to inform the state if additional changes to the system are needed. The licensing-review process is used to conduct ongoing monitoring of providers and includes desk audits (e.g. policy review) and site visits (e.g. observations, interviews).

Provider enrollment/revalidation: All home and community-based services providers will be required to submit an assurance of compliance with waiver requirements as part of new enrollment (new provider record), re-enrollment (inactive to active) or revalidation (review of enrollment documents of currently active record) as a Medicaid provider. DHS will add assurances to this process related to compliance with the CMS rule at the provider level. Re-validation of providers occurs every five years.

Person’s experience assessment: The state worked with the University of Minnesota Institute of Community Integration (ICI) to develop the person’s experience assessment experience questions to measure a person’s experience receiving HCBS. ICI researched valid and reliable survey tools, ensuring questions are person-centered and are asked in a manner that allows us to capture measurable information. We based the tool on recommendations from the National Quality Forum
report, *Quality in Home and Community-Based Services to Support Community Living: Addressing Gaps in Performance Measurement*. Lead agencies assign a case manager to each person receiving HCBS services and will assess their experience annually. This assessment will evaluate whether a person’s experience is consistent with the standards and expectations under the settings rule. We will use the person’s experience assessment to trigger remediation at an individual level when a person’s experience differs from the requirements of the settings rule.

**Assessing lead agencies:** Minnesota conducts reviews of all five Medicaid waiver programs and the Alternative Care program in each lead agency responsible for administering these programs (counties, tribes and health plans).

HCBS lead agency reviews of counties and tribes:

- Site visits include a review of participant case files, interviews and focus groups with staff and a review of lead agency data. DHS developed this review to monitor compliance with state and federal requirements, identify promising practices that improve the quality of service to HCBS participants, track local improvements and obtain feedback about DHS
- The lead agency review evaluates components of person-centered planning and practices in HCBS programs. Under the *Person-Centered, Informed Choice and Transition Protocol*, lead agencies must provide people with increased choices and opportunities for community inclusion
- We share performance measures and operational indicators during the HCBS lead agency review site visit.
- We have incorporated the elements needed to monitor and enforce compliance with the settings rule into this process. Protocols and review elements can be found on the DHS HCBS Lead Agency Review website.

Managed care audits:
Managed care organizations (MCOs) conduct annual audits of all of their enrollees’ care plans, including people on the Elderly Waiver (EW), through the care plan audit protocol. MCOs have incorporated requirements of the *Person-Centered, Informed Choice and Transition Protocol* into the audit protocol. At the completion of each annual audit, MCOs report their findings to DHS.

**Assessing the system:** As required by statute, DHS conducts a Gaps Analysis Study every two years to gather data from lead agencies about the capacity and gaps in long-term services and supports and housing to support older adults, people with disabilities, children and youth with mental health conditions and adults living with mental illnesses in Minnesota.

DHS will use the existing national core indicator process to capture quality-of-life and community-engagement data to inform quality-assurance activities and quality-improvement priorities across the system.
## More Places to Call Home: Investing in Minnesota’s Future

### Goals and Recommendations

<table>
<thead>
<tr>
<th>COMMIT TO HOMES AS A PRIORITY</th>
<th>PRESERVE THE HOMES WE HAVE</th>
<th>BUILD MORE HOMES</th>
<th>INCREASE HOME STABILITY</th>
<th>LINK HOMES AND SERVICES</th>
<th>SUPPORT &amp; STRENGTHEN HOMEOWNERSHIP</th>
</tr>
</thead>
<tbody>
<tr>
<td>Create a broader and stronger public commitment to the urgent need for more homes that are more affordable.</td>
<td>Keep the homes we already have, especially those that are most affordable.</td>
<td>Build 300,000 new homes by 2030, across all types, prices, and locations to stabilize prices and meet demand.</td>
<td>When you lose your home, you lose your community—and the consequences of this major life disruption can last for decades. By doubling our investment in rental assistance, promoting voucher acceptance, preventing displacement, and improving protections for renters, we can reverse this trend, so kids learn, parents earn, and communities grow stronger.</td>
<td>Build stronger links between where we live and the services we may need to live stable lives.</td>
<td>Create pathways to sustainable homeownership, with a focus on removing barriers for households of color.</td>
</tr>
</tbody>
</table>

Like roads and bridges, homes are building blocks—assets that will be around for decades. By investing in our homes, we improve outcomes in education, health, and economic opportunity. Homes are our starting place.

Let’s begin by securing our existing assets. The most cost-effective way to provide homes that are affordable for Minnesotans is to maintain and preserve the homes and apartments we already have.

Minnesota has built a reputation of livability and opportunity, with homes people can afford as a key ingredient. To ensure our neighborhoods and communities remain strong and healthy, we need to use all the tools and innovation at our disposal to enable the private sector to build to meet the demand.

When you lose your home, you lose your community—and the consequences of this major life disruption can last for decades. By doubling our investment in rental assistance, promoting voucher acceptance, preventing displacement, and improving protections for renters, we can reverse this trend, so kids learn, parents earn, and communities grow stronger.

At some point in our lives, most of us will need a helping hand. Many of us will be seniors who require assistance to stay in the place we’ve long called home. Other Minnesotans have experienced trauma or need health services. We can achieve better outcomes in a more cost-effective way when we coordinate services to meet people where they live.

Our wealth and our retirement savings are concentrated in our homes. Most Minnesotans want to own a home, and everyone who can sustain homeownership should be offered the tools, coaching, and access to financing they need to make this investment in their own future and in our communities.

### 1. Support & Strengthen Homeownership

- Create pathways to sustainable homeownership, with a focus on removing barriers for households of color.
- Focus on increasing access to homeownership resources for the large number of income-ready households of color who want to buy.
- Promote alternative models of building wealth through homeownership, such as community land trusts, cooperatively owned housing and manufactured home parks.
- Encourage employers and foundations to support home purchases.
- Increase funding for financial education and counseling programs that expand the capacity of households to pursue homeownership.
- Expand mortgage products and provide extra support to local community banks to expand financing options.
- Expand available down-payment assistance programs.

1. **Commit to HOMES AS A PRIORITY**
   - Launch a public-private partnership to forecast demand, set goals and measure progress.
   - Create dedicated, permanent funding sources for affordable homes in addition to current funding sources.
   - Invite all Minnesotans to recognize homes as a central and critical part of the economic and social well-being of all residents and communities in Minnesota.

2. **Preserve the Homes We Have**
   - Position Minnesota as a national leader in the advancement of housing innovation and technology.
   - Grow the pool of talent in Minnesota’s building trades to enable the sector to meet current and future demand.
   - Increase the capacity of local leaders to implement tools and solutions to address the home-affordability needs of their communities.
   - Expand the range of housing types across Minnesota communities.

3. **Build More Homes**
   - Expand and streamline existing rental rehabilitation programs to preserve critical rental assets.
   - Incentivize private-market owners to keep rental units affordable to low-wage families by using targeted support from local and state government.

4. **Increase Home Stability**
   - Enhance and expand state and local rental assistance programs to complement federal programs that are too small to meet the need.
   - Define and crack down on predatory rental practices, including excessive evictions and poor condition of rental units.
   - Strengthen protections for renters in the private market.
   - Increase the speed and flexibility of emergency resources to prevent people from losing their homes.

5. **Link Homes and Services**
   - Provide a dependable stream of funding for social services that help households maintain stable homes.
   - Provide access to a full range of services for families and individuals transitioning into stable homes before, during, and after the transition.
   - Improve health outcomes and reduce costs for tenants by developing better partnerships between health care and housing providers.

6. **Support & Strengthen Homeownership**
   - Increase funding for financial education and counseling programs that expand the capacity of households to pursue homeownership.
   - Expand alternative models of building wealth through homeownership, such as community land trusts, cooperatively owned housing and manufactured home parks.

7. **Goals and Recommendations**
   - Provide assistance to residents with disabilities by identifying gaps and potential program enhancements to ensure statewide coverage.
   - Expand programs and providers who assist individuals in finding, securing, and retaining affordable rental homes.

8. **More Places to Call Home**
   - Identify the tools, coaching, and access to financing they need to make this investment in their own future and in our communities.
