Dr. E. J. Engberg
Superintendent
School for the Feeble-Minded
Faribault, Minnesota

Dear Dr. Engberg:

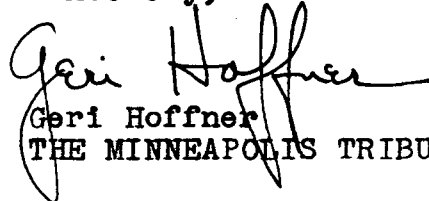

We would like to do a comprehensive story for Sunday, June 26, on what plans are being made to absorb the impact of Minnesota's new mental health program which goes into effect July 1.

We realize, of course, that there will not be complete and immediate change on July 2. But we would like to know, for example, what plans are being made for housing of new personnel, what changes are contemplated to allow a single standard of diet and what effect the new program will have on treatment.

You undoubtedly have many other plans for carrying out the new program, and we would greatly appreciate hearing about them as well as about the problems involved. We also would like to know about how long you think it will take you to convert completely to the new program-- will you be able to serve a single diet during July, for example?

We hope you will help us in presenting this information in a careful, documented manner. Your prompt reply will be very much appreciated.

Sincerely,

Geri Hoffner
