Working group (iris, etc.) will be decreased by 50 transfers to Brainerd this summer. 8 other female transfers are in other "bldgs. (Total 58). Willow provides space for some 25 handicapped admissions from the waiting list (total 58) by shifting appropriate age groups, etc.

One new building will replace 71 beds in Daisy (older trainable) and 57 beds in Iris of the working group which will continue to decrease in size. This new building should be flexible enough to care for any patient population other than disturbed. At this time it appears that it should be an open moderate security building serving the function of Hickory for the male population.
