

Hospital Faribault State School & Hospital

Date 4-6-62

INSTRUCTIONS

(Report for December, January and February)

1. Wards - open or closed? See page 2. As of date in question simply check one and only one box for each ward in your hospital according to this definition:

1. Open, At least the front door is open (i.e., unlocked) eight hours a day or more. Implies a home-like atmosphere: reasonable freedom of movement within ward, i.e., to day rooms, sleeping areas, dining room, bathrooms, etc., and access to leisure-time equipment.
2. Partially open. One or more locked areas within building containing patients in a group, even though front door is open.
3. Closed. Front door locked. N.B.: A ward with locked door is closed, be there ever so many patients on ground privileges.

For predominating patient type use Reitmann classification:

- | | | |
|-----------------------------|--------|---|
| I. Geriatric Infirm | VI. -A | Psyobiatric Aerate Intensive Treatment" |
| .. II. Geriatric Ambulatory | VI. -B | Comprehensive Continued Treatment Group |
