Speech therapy program

At our Executive Committee meeting yesterday it was learned that no arrangements could be made immediately for speech therapy from the public schools as money is not immediately available. However, we should determine whether this service could be rendered by the Faribault Public Schools and if so, the details, so that they could consider making this arrangement until a speech therapist becomes available on a more permanent basis than at present. Shall appreciate it if you will keep this as an active item for consideration until Miss Mullen's program is terminated.
