Minutes

1. The minutes of the previous Joint Conference Committee meeting were not discussed.

The annual Ward Living Conditions survey was discussed. It was pointed out that Faribault has improved in its overall average from 3.16% for 1967 to 3.80% for 1968. The rate of improvement considering the facts of overcrowding and the institution being for the mentally retarded was very great. There was some question about some living units being rated too high.
