Medical Services Division

SUBJECT: Schedule for Campus Development

Attached are proposed schedules for the development of multi-purpose campuses at the various state hospital locations. I distribute these in accordance with the discussion at Goals Seminar on October 17, 1969, in preparation for Goals Seminar on December 18, 1969. When you study these schedules, it should be with the following points in mind:

1. These are tentative, unofficial, and relatively non-specific. They are first approximations only. It will be up to Goals Seminar and regional, subregional, and area groups to carry the discussion further, to modify the plan as appropriate and fill in the specifics.

2. They may contain errors and inconsistencies.

3. The material in the major categories was prepared by the respective program offices (I am acting director of the Mental Illness Program Office.)

4. The schedules herein for mentally retarded assume that each hospital will have eventually a complete range of programs for the mentally retarded, across the board. This idea is not yet officially adopted; I feel that further studies are needed.

5. The schedules, except occasionally where a figure appears in parentheses, do not specify unit size. It is assumed, however, that where there is a date given there will be an actual unit in existence on the campus and that this will be programmatically a discrete and separate unit. The schedules do not deal with the administrative complexities that arise from this assumption.

6. Where the schedule says "Out by (date) ... " this means that admissions for that group will cease by that date. It does not refer to a transfer of existing hospital residents from that area.
7. The schedules do not deal with the following patient categories:

   a. *Pre-adolescent mentally ill:* The assumption is that over a suitable period of time the children's (MRTC) unit at Anoka State Hospital will cease trying to serve the entire state, but will become a special resource to the metro area and that meanwhile this type of service will be decentralized on a regional basis.

   b. *Adolescent mentally ill:* This is a highly specialized problem. Beyond stating the general expectation that we will continue to move in the same direction we have been, I have nothing concrete to offer.

   c. *Adolescent mentally retarded -- disturbed:* This refers to a distinct subgroup that we have attempted to handle at Owatonna State School in the past. They will stay on at Brainerd State Hospital for a time, but eventually I would expect to see capabilities on behalf of this group developed regionally (*Note:* This does not mean that the regional programs would have to be located on state hospital campuses or run by the state; the same goes for the pre-adolescent mentally ill group referred to in 7a above.)

   d. *Dangerous women:* There is no plan for establishing a statewide-serving unit for women as now exists at the Minnesota Security Hospital for men.

8. The schedule does not deal with the following units:

   a. *Minnesota Valley Social Adaptation Center:* This poses complex planning problems relating to type of patient, the receiving district, admission policies, etc., that I have assigned as a special project to the Mental Retardation Program Office working conjointly with MVSAC staff.

   b. *Lake Owasso Children's Home:* This is a special project assigned to the Mental Retardation Program Office working conjointly with the Lake Owasso Children's Home and Cambridge State Hospital staffs; possibly to be developed as a special resource for the metro area.
c. **Minnesota Security Hospital**: No major changes are contemplated as to Minnesota Security Hospital programs. There is strong sentiment in favor of limiting transfers to Minnesota Security Hospital to persons who are dangerous and not simply management problems. This would of necessity produce changes in other hospitals in the direction of providing closer supervision, possibly in closed units.

9. The schedule touches on the following problem groups, wherein it would be well to elaborate:

a. **Hard core narcotic addicts**: It is proposed that we develop a special state-wide-serving unit at Willmar State Hospital for this purpose. (see Willmar State Hospital schedule).

b. **Sex offenders**: The 1969 legislature enacted an important amendment to Chapter 253 whereby a great spectrum of persons convicted of sex offenses must have a pre-sentence investigation. It is proposed herein that rather than have all such persons remanded to the Minnesota Security Hospital, they be committed to the local regional mentally ill units for both the pre-sentence investigation and post-sentence treatment (if that is the court's disposition) unless they are dangerous in which case they would go to the Minnesota Security Hospital.

* * *

There are probably other points I have missed, but we can bring them up for discussion on December 18, 1969.

Thank you.

Campus: Moose Lake State Hospital

Areas:
- Duluth
- Grand Rapids
- Virginia
- Braham

Mental Illness: will continue will continue will continue will continue. Out by September 1970

Inebriacy:
Detoxification: These programs will all continue as they have been with the possible exception of Braham.

Hard Core Alcoholic

Mental Retardation:
- 1970 -- Program V (75)
- 1971 -- Program VI
- 1973 -- Programs I and IV
- 1974 -- Programs II and III
- 1975 -- Diagnostic-evaluation center
Campus: Willmar State Hospital

Areas: St. Cloud * Willmar Laverne Marshall

Mental Illness: will continue will continue will continue will continue

Inebriacy:
Detoxification: All programs will continue. Programs for hard core alcoholics at Anoka and other metro-serving units may reduce the load.
General Service: Hard Core Alcoholic

Hard Core Narcotic: Willmar State Hospital is expected to have a program for hard-core narcotic addicts by January 1971; a security unit for this group, if necessary, by January 1972.

Mental Retardation:
1970 -- Programs V and VI
1971 -- Programs I and IV
1974 -- Programs II and III
1976 -- Diagnostic-evaluation Center

* To include Wright County by July 1970.
