REPORT OF THE SUPERINTENDENT
OF THE
MINNESOTA SCHOOL FOR FEEBLE-MINDED
AT FARIBAULT.

Hon. D. L. Kiehle, Superintendent of Public Instruction:

DEAR SIR:—In our report two years ago we referred to the general objects of the school for feeble-minded and explained the fact that its beneficiaries included three classes, viz.:

First—School children, or those children whose mental deficiency is such that they can not be successfully educated in the common schools.

Second—Epileptics for whom hospital treatment is provided.

Third—Those whose degree of mental infirmity or age combined with mental deficiency is such that no marked improvement can be hoped for.

Since the last report provision has been made for those who can not be materially improved and they are soon to occupy their own building, enabling the main centre and north wing of the school plant to be used entirely for educational purposes. We have been enabled to do more in the way of manual training which is carried on in connection with the work in the school room.

In reply to the oft repeated question "What do you teach?" the following scheme will partially answer:
