CHS Part 6: Decay

## Prior Felony Offenses: Age of Prior Offenses

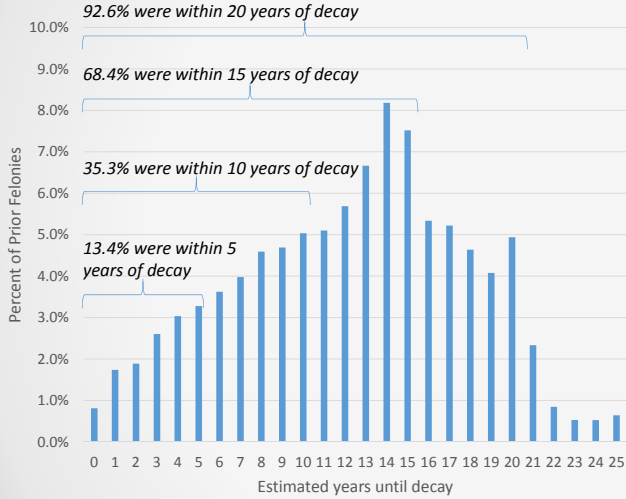

In 2015, the 16,763 offenders sentenced had 32,848 prior non-decayed felonies in their criminal histories. For those priors, staff calculated the time elapsed between the disposition dates of the prior offense and the current offense. The chart displays the age distribution of the prior offenses as a percentage of the total. (Not shown: 0.2% of priors were more than 25 years old.)

CHS Part 6: Decay

### Prior Felony Offenses: Estimated Time Until They Reach Decay

In 2015, the 16,763 offenders sentenced had 32,848 prior non-decayed felonies in their criminal histories. For those priors, staff calculated the estimated remaining time until decay. The chart displays the estimated percentage of prior felony offenses that would decay within each future year. (Not shown: 2.5% of priors would decay after 25 years.)
