To Whom it May Concern,

It has come to our attention that the Tidal Wave Vape 3.5mg contains from 13.5% to 40.7% THC which is above the legal limit for hemp based products. According to OCM testing the product also contains some non-allowable forms of THC (THCO/THCA) in addition to the D9/D8.

Please post the recall notice at your locations and contact any customers who have purchased the product from you, if possible.

Respond to the email noted (sully@oceanwholesale.com) and indicate the number of units you have remaining of the disposable vape product and instructions will be given on either return or destruction, and credit/refund.

We are sorry for any inconvenience this has caused you or your customers.

Thank You,

Ocean Wholesale
