

m MINNESOTA SCHOOL TRUST LANDS

Minnesota's school trust lands total 2.5 million acres. Additionally, the state holds approximately one million acres of school trust lands severed mineral interests. More than two million acres, or 92%, of Minnesota's school trust lands are located in ten northern Minnesota counties. The remaining school trust lands are dispersed through other parts of the state, with less than 500 acres remaining in the southern third of the state. Much of the land is intermingled with county, federal, tribal, private, and other state lands.
