SUBJECT: Installation of seats on toilets in MI and MR institutions

We are in the process of arranging for seats we hope will soon be installed on toilets in MI and MR institutions.

For the past several weeks, Marsh Ward of the Minnesota Security Hospital has led the way in experimenting with various means of attaching seats to the existing bowls. Through many trials to ultimate success, a simple but satisfactory method has been found.

We will need the following information regarding the toilets in your facility that are without seats:

<u>Name or Number of Ward</u>	<u>Number of Toilets Without Seats</u>
-------------------------------	--

How many of these bowls are round or "normal"?
How many are elongated?

It is very important for this information to be accurate, since a regular seat does not fit well on an elongated bowl.

Please do not include in your list toilets in buildings which are soon to be torn down or those in buildings which are no longer used.

Thank you for helping in this important project.

If you have any question, please do not hesitate to call me.
