Center Unit Program Goals

As a summation of program developments the last several months in Center, we have reached the following conclusions:

Spruce, Laurel, and Rose continue their high level of program achievement. Osage which last time was in the beginning stages of program development has made substantial strides forward and with the additional work being done in the ward areas should reach a good level of success.

Pine and Mohawk continue to be problem areas. During the next month Mrs. Gates will review the situation in Mohawk and attempt to determine solutions. It was agreed that Mr. Morgan had been effective in ...assisting the staff in implementing program goals in Laurel. As there has been on increased activity in Mohawk, there is some question as to his effectiveness there. There also is the question of the effectiveness of the ward staff at Mohawk.
