Program Goals in Green Acres Unit

The entire staff of the Green Acres Unit is to be commended upon the grand development in their area in the last year. This last program review of the old Green Acres Unit was very satisfying to me as I observed a number of kinds of programs in operation.

The meal situation in Maple was very pleasant. In Cedar for the fourth consecutive time I found all the young ladies with their clothing on. This taken back to the beginnings of programming in Cedar would have been an impossible goal and is now obtainable.

The presence of day activity centers in operation at Linden and Birch was also very pleasing. I think that if the staff is able to look back over the year with the ability to be retrospective they will find that they have made outstanding progress.

Thank you. And by the way, the residents thank you too.
